The NEW Risk Assessment Seminar Series presents

Using Causal Analysis for Evaluating Environmental and Health Issues
November 20, 2015 11-12 a.m.
Room G-17
Kettering Laboratory

Dr. Charles Menzie, Ph.D.

Dr. Charles Menzie is the Global Executive Director for the Society of Environmental Toxicology and Chemistry (SETAC) and also a Principal with Exponent Inc., a science and engineering consulting company. His professional practice involves risk assessment and causal analysis. Dr. Menzie is a Fellow of the SRA and a recipient of the Risk Practitioner Award. He works on problems involving exposures to humans as well as ecological receptors and ecosystems.

Sponsored by the TERA Center, Department of Environmental Health, College of Medicine
