MBSR often helps:
• Reduce anxiety and depression
• Improve focus and resilience
• Manage pain

For more information, contact susan.mcdonald@uc.edu

MBSR focuses on techniques such as mindfulness practices, movement (e.g. yoga, stretching), and group connection aimed at enhancing self-awareness and self-care. The program is facilitated by an expert MBSR-certified instructor, in collaboration with the UC Center for Integrative Health & Wellness at the UC College of Medicine.
