Visiting Professor Program

The Visiting Professor Program of the Department of Surgery is extremely important for the education of both the faculty and the residents. It gives the residents a first-hand opportunity to come into contact with distinguished leaders in American surgery, participate in teaching rounds with them, and get to know them as individuals. In addition, the Visiting Professor gives presentations at Surgical Grand Rounds to faculty, residents and medical students.

Recent Visiting Professors:

March 2, 2016
J. Wesley Alexander Lectureship
**Kathryn Wood, DPhil, FMedSci**
Professor of Immunology
Transplantation Research Immunology Group
