University of Cincinnati - Education and Research Center (ERC)  
Pilot Research Project (PRP) Training Program

Award Information and Instructions for Proposal Submission

1. Deadline to submit: **4:30 pm on Monday, April 3, 2017**  
Submit applications (2 hard copies and 1 electronic copy (PDF file) to the following:  
Jessica Bloomer, ERC Program Coordinator, Education and Research Center (ERC),  
Department of Environmental Health, University of Cincinnati, Kettering Lab Rm 440,  
160 Panzeca Way, Mail Location #0056, Cincinnati, Ohio 45267-0056  
Phone: (513) 558-5710, E-mail: erccoor@uc.edu

2. The average award expected is $7,000 (contingent upon the availability of funds).
3. The budget period is from 7/1/2017 to 6/30/2018. All funds must be expended by the end of the budget period. Please see Budget section below for allowable and disallowable expenses.
4. Successful Candidate and/or Mentor will be required to travel to UC to present a poster of the study design of their project during the fall after their award notice and a podium presentation of the results of their project the following year at the annual PRP Symposium. Travel expenses will be reimbursed for one presenter to attend the annual symposium (which is not part of the project budget).

Eligibility Requirements

1. Only one Principal Investigator (PI) is allowed (no Co-PI).
2. PI must be at the pre-doctoral (PhD student or higher), postdoctoral, medical resident or junior faculty level. DNP students will be eligible for this award.
3. Occupational Safety and Health professionals cannot exceed the rank of assistant professor. A professor of any rank, however, can apply as long as they are new to the occupational safety and health field and wish to apply their expertise from another field to occupational safety and health issues.
4. PRP Grantees cannot receive more than two pilot research grants as a Principal Investigator. Grantees who are new to the occupational safety and health field cannot receive more than one pilot research grant as a Principal Investigator if their rank is higher than Junior Faculty level.
5. Preference will be given to members of the ERC-PRP consortium; AFI, BGSU, CSU, EKU, KSU, MSU, OU, PU, UC, UK, UT, and WKU. Submissions outside these institutions are encouraged to contact the ERC Coordinator prior to submitting applications.

Optional Additional Funding for  
Interdisciplinary Focus or ERC Strategic Priorities Focus

Applicants will have the opportunity to be considered for optional additional funding (up to $1000 per proposal, depending on availability of funds) based on receiving a competitively meritorious score in one of the following areas (Pick One):

**OPTION-1 Interdisciplinary Focus:** The proposed application must have a research focus that deals with at least two areas of ERC and/or related disciplines (e.g. all disciplines of engineering and medicine, psychology, physics, chemistry, geography, hospital management, fine arts, public health, construction management, veterinary science, firefighting science, nursing, rehabilitation science, etc). If the applicant institution does not have the above mentioned specific disciplines, then at least two disciplines of any field addressing occupational safety and health problems should be included. There should be at least one person on the research team representing each discipline.

**OPTION-2 ERC Strategic Priorities Focus:** The proposal must address an occupational safety and health issue among one of the following occupational groups (identified as priority areas for Cincinnati ERC): Firefighters and first responders; Healthcare workers; Low wage workers.
Application Format

In general, it is expected that your application follow the NIH PHS 398 format. You may obtain the PHS 398 forms by going on the NIH website [http://grants2.nih.gov/grants/funding/phs398/phs398.html](http://grants2.nih.gov/grants/funding/phs398/phs398.html). In addition, please convert the electronic version of your proposal into a single PDF file.

*NOTE – The UC Submission Checklist must be completed and submitted with your proposal.* Please review this checklist carefully to make sure your proposal contains all of the items listed (mark each item after you check that it is complete). Incomplete proposals with missing checklists will be returned without review. If you have any questions, please contact the ERC coordinator before your submission at erccoord@uc.edu or 513-558-5710.

I. PRP Grant Application Cover Sheet
   Download cover sheet from Pilot Project Research (PRP) Training Program website: [http://med.uc.edu/eh/centers/erc/programs/prp](http://med.uc.edu/eh/centers/erc/programs/prp)

II. Face page (PHS 398 Face Page) with official signature

III. Abstract and Key Personnel (PHS 398 Form Page 2, Form Page 2 Continued)

IV. Budget and Justification (PHS 398 Form Page 4 and Page 5)
   A. Provide budget justification consistent with proposed study and timeline. If applying for optional additional funding with Interdisciplinary Focus or ERC Strategic Priorities Focus, include additional budget justification paragraph specifically for this additional amount.
   B. Allowable expenses include all relevant project expenses including support personnel, supplies and travel necessary to conduct research and small equipment items or portions thereof. It is not customary for 100% of equipment cost to be covered. Equipment purchased for the project becomes the property of the university sponsoring the principal investigator. Funds allocated for computer equipment cannot exceed $500, and a budget justification must be provided.
   C. Disallowable expenses include overhead/indirect costs, investigator and mentor salaries, student tuition and stipends, technical conference travel, routine clerical assistance and computer equipment exceeding $500. No fees are allowed for consultants who are faculty members. (On budget page, list PI and Mentor under Personnel but do not fill in effort and list salary as 0. Only RAs and student helpers should have salaries listed; include Fringe Benefits.)
   D. All PRP awardees are to make a poster presentation at the symposium held in the fall after their award notice. As such, the cost of poster printing should be included in the budget.

V. Biographical Sketch (PHS 398 Biographical Sketch Format Page)
   Provide a biographical sketch, including personal statement, for the principal investigator, mentor, co-investigators and consultants. If applying for Interdisciplinary Focus, the research team must include 2 or more areas of ERC and/or related disciplines which should be documented in their respective bio sketches.

VI. Project Description (PHS 398 Continuation Format Page) - Refer to Submission Checklist
   Interdisciplinary Focus Option or ERC Strategic Priorities Option – If applying for this optional additional funding, provide rationale and names of the research team with their expertise in a clearly labeled sub-section in the Research Design and Methods section (bio sketches should be included in previous section).

VII. Human Subjects/Vertebrate Animals Research - Institutional Review Board Approval
   If humans or vertebrate animals are used in the project, then a section on this matter must be included. (This section will not be part of the 5 page limit.) See PHS 398 Instructions at [http://grants.nih.gov/grants/funding/phs398/phs398.pdf](http://grants.nih.gov/grants/funding/phs398/phs398.pdf). For human subjects, see sections 5.5.6 – 5.5.9. For vertebrate animals, see section 5.5.10. A copy of the Human or Animal Research Review Board form showing approval or exemption must be sent to the University of Cincinnati Education and Research Center (ERC) before funds can be expended. It is strongly recommended to apply for approval.
while your proposal is under review. For additional requirements regarding human or animal research, please contact your institution’s Human or Animal Research Review Board. If neither human nor vertebrate animals are involved in the project, a statement verifying no human research will be required from IRB, if funded.

VIII. Letters of Support

A. From Mentor if PI is a Student

If the Principal Investigator (PI) is a PhD student, post doc or medical resident, a faculty mentor must be listed. Include a letter of support from the mentor indicating the student investigator’s ability to complete the proposed study in the timeline given, the student investigator’s potential as a researcher, and the potential for future funding. The letter from the mentor should also verify the student investigator’s status (enrolled in or accepted into PhD program, post doc, medical resident).

B. From Co-Investigators/Collaborators

Co-investigators and collaborators should indicate their agreement to collaborate and describe their role in the project. If applying for the optional additional funding, the letters of support should justify the proposed Interdisciplinary or ERC Strategic Priorities project and the research team with appropriate Interdisciplinary or ERC Strategic Priorities backgrounds.

C. Letter of Commitment from the PI

The letter of support from the PI should state one of the following:

1) The proposal has not been submitted elsewhere.
2) The proposal has been submitted elsewhere but there is no significant overlap between the proposals.
   OR,
3) If there is significant overlap between the proposals, funding for only one will be accepted.

The letter of commitment from the PI should also state the following:

“In the event that the grant is funded, I (P.I.) will attend the Pilot Research Program (PRP) Symposium during the first year of funding and then again at the end of my project to present the findings of my project. In the event I am not able to attend the symposiums, it will be my responsibility to have my mentor or another colleague attend the PRP Symposiums and carry out the above responsibilities on my behalf.”

Review Panel

A merit review process will evaluate the proposals. At least two members of the review panel will review each proposal. The list of eligible reviewers will include at least one member from each of the participating NIOSH Pilot Research Training Project institutions (University of Kentucky, Kentucky State University, Eastern Kentucky University, Western Kentucky University, Purdue University, Murray State University, University of Toledo, Air Force Institute of Technology, Ohio University, Bowling Green State University, Central State University and the University of Cincinnati). Additionally, there may be reviewers from other institutions.

The program director will serve as the non-voting Chairperson of the review panel and will only vote to break a tie. Reviewers may include those with expertise that may not be directly in your field. Please keep this in mind when preparing your application and avoid the use of jargon. Explain technical terms and include sufficient background information to enable reviewers to judge the soundness of your experimental plan and the significance of your hypothesis.

Review Process

Each proposal will be evaluated according to the following criteria (each criterion will be rated on a scale of 1 =Exceptional to 9 =Poor; see attached Nine Point Proposal Rating Scale):

1) Significance (weight = 15%)
Does this study address an important problem? If the aims of the application are achieved, how will scientific knowledge be advanced? How will successful completion of the aims change the concepts, methods, technologies, treatments, services, or preventative interventions that drive this field?

2) Investigator(s) (weight = 15%)
Investigator is evaluated on the adequacy of the individual’s background in terms of appropriate training and ability to carry out this work. If the project is collaborative, do the investigators have complementary and integrated expertise; are their leadership approach, governance and organizational structure appropriate for the project?

Important: Remember that the principal investigator of a Pilot Grant application must:
♦ be at the pre-doctoral (PhD student or higher), postdoctoral, medical resident or junior faculty level (DNP students will be eligible)
♦ not exceed the rank of assistant professor if they are in the field of occupational safety and health. A professor of any rank can apply as long as they are new to the occupational safety and health field and wish to apply their expertise from another field to occupational safety and health issues. Please note that an applicant who qualifies under this category can only be a PI once if their rank is higher than Junior Faculty level. Other applicants cannot receive more than two pilot research grants as a Principal Investigator.
♦ be able to complete the project within limits of visa if not U.S. citizen
♦ name a mentor assisting with project if PI is a PhD student, post doc, or medical resident
♦ provide a biographical sketch on self, co-investigators, and consultants

3) Innovation (weight = 10%)
Does the project employ novel concepts, approaches or methods? Are the aims original and innovative? Does the project challenge existing paradigms or develop new methodologies or technologies?

4) Approach (weight = 30%)
Does this project involve multiple stakeholders (employees, employers, and academia)? Are the conceptual framework, design (including composition of study population), methods, and analyses adequately developed, well integrated, and appropriate to the aims of the project? Does the applicant acknowledge potential problem areas and consider alternative tactics? If the project involves human subject research, are the plans for 1) protection of human subjects from research risks, and 2) inclusion of minorities and members of both sexes/genders, as well as the inclusion of children, justified in terms of the scientific goals and research strategy proposed?

5) Environment (weight = 15%)
Does the proposed study contribute to ERC research training objectives? Does the proposed project increase the institution’s ability to conduct occupational health and safety research and contribute to regional needs? Does the scientific environment in which the work will be done contribute to the probability of success? Do the proposed experiments take advantage of unique features of the scientific environment or employ useful collaborative arrangements? Is there evidence of institutional support?

6) Future Funding Potential (weight = 15%)
Does the project have the potential of obtaining pilot data that may increase the probability of developing a fundable larger RO1-type or other type of grants or contracts in the future?

Overall Evaluation
Reviewers will briefly summarize the most important points of the Critique, addressing the strengths and weaknesses of the application in terms of the six review criteria, recommend their level of enthusiasm (very high, high, average, low, very low) for the proposal, reflecting the overall impact of the project on the field, weighting the review criteria as they feel appropriate for each application, make a comment regarding the acceptability or changes necessary in the budget requested, and identify any critical issue(s) that need to be clarified regarding the proposal.
Progress Reporting Requirements

1. Investigators are required to present a poster of the study design of their project during the fall after their award notice and a podium presentation of the results of their project the following year at the annual PRP Symposium. **The 2017 PRP Symposium will be held on October 5-6, 2017 at the University of Cincinnati.** In the event that extenuating circumstances prevent the PI from presenting at the Symposium, it is the PI’s responsibility to have a representative (preferably the PI’s mentor or co-investigator) to make the presentation on his/her behalf.

2. **A final written report needs to be submitted by Wednesday, August 9, 2018**
   a. This report should also document all presentations, publications and extramural funds that have resulted in part, directly or indirectly from this award.
   b. A statement of actual disposition of funds needs to be included in the final report.

3. Upon acceptance of the award, PI must agree to provide future updates to the PRP on publications and additional grant awards resulting from their PRP grant. The PI must acknowledge support from the National Institute for Occupational Safety and Health and the University of Cincinnati Education and Research Center’s Pilot Research Project Training Program in all their related publications, which resulted from the pilot grant award. The acknowledgement shall read as follows:

   “This research study was (partially) supported by the National Institute for Occupational Safety and Health and the Pilot Research Project Training Program of the University of Cincinnati Education and Research Center Grant #(fund number to be provided at a later date).”
