UC Neurotrauma Symposium.
Join your research colleagues at the inaugural UC Neurotrauma Symposium on Saturday, May 11, at the new UC Gardner Neuroscience Institute building. The purpose of this event is to promote awareness and foster collaboration regarding cutting edge Traumatic Brain Injury research and patient care. Abstracts accepted through April 15. Up to 6 CME's are offered.

UC Health Office of Clinical Research.
To facilitate research in a timely manner, study teams are encouraged to make contact with ancillary research services such as IDS and Imaging well in advance of submission to IRB. The earlier the research services are made aware of a new study, the more time they have to review and approve. If this does not occur, a notification will be sent to the research services generated by the RAP system upon IRB submission. Please contact Research-Admin@UCHealth.com with questions.

Where Does the Indirect Cost Recovery (F&A) from My Grant Go?
100% of the F&A revenue generated by Laboratory Animal Medicine (LAMS) is returned to LAMS to support lab animal costs. The remaining indirect costs are distributed between General Funds (52%), a Research Cost Share fund (0.35%), UC Office of Research (23.4%), and 24.25% is returned to the college who generated it. At the College of Medicine, 21% is returned to the department of the faculty member awardee and the Dean’s office receives the remaining 3.25%.

Questions on Medical Student Research?
Answers to a number of frequently asked questions about medical student research are now posted on the UCCOM Research Opportunities website at: https://med.uc.edu/academicsupport/research/faq

The Bridge Funding Program.
The Bridge Funding Program (BFP) was established by the CoM to provide short-term bridge- or “gap”- funding for established and productive CoM researchers who have had previous NIH funding or federal funding and who have remained active in research. The BFP is open to UC-paid, CoM full-time faculty. Qualified investigators must have a grant application pending with the NIH. Applications must be submitted electronically through the SUBMISSION PORTAL by 5:00pm on Friday, May 3, 2019.
