Complion eRegulatory.
Complion eRegulatory is a system being implemented at UC and UC Health by the OCR and Complion, is a 21 CFR Part 11 compliant electronic platform which is built to hold clinical research regulatory documents. This system eliminates the need for paper files while standardizing filing processes and has electronic signature capacity. The goals of this implementation are to speed up document completion times, automate repetitive filing tasks and standardize methods of documentation and filing. The implementation for the UC Cancer Institute, the UC Heart, Lung and Vascular Institute and the Dept. of Neurology have been completed. Internal Medicine (encompassing all divisions within the COM Internal Medicine Dept.) is currently underway. Roll out will continue until all COM departments are using the Complion system. For questions on when your department will be expected to start implementing the system or for general questions on system features contact Emily.Werff@uchealth.com.

Nobel Laureate Elizabeth Blackburn to Speak about Research at UC.
Elizabeth Blackburn, PhD, Nobel laureate and professor emerita at the University of California, San Francisco, will present as part of the UC Cancer Institute Speaker Series. On Monday, April 22, she will present "Altered Telomere Maintenance and Regulation in Human Cancers and Other Common Disease Processes” from 4 to 5 p.m. in MSB E-351. Blackburn also will present "Journeying to the End (of the Chromosomes): from Basic Science to Human Well-Being” from noon to 1 p.m. Tuesday, April 23, in Tangeman University Center, Room 220, on the Uptown campus. Blackburn discovered the molecular structure of telomeres, the protective caps that preserve the ends of chromosomes. Her lab has made discoveries that have been key to understanding the relationship between telomere biology and human disease. With questions, contact Kelly Hummel at 513-558-2030.

Best Practices in Grants Management.
Attend the “Best Practices in Grants Management” on April 24th from Noon-5 p.m. in room 454, University Hall. This training is geared toward individuals responsible for managing anticipated and awarded grants and contracts in the UC Flex accounting system. It is offered every other month. Contact Cindy Lasonczyk at Sponsored Research Services for more information at cynthia.lasonczyk@uc.edu.
