University of Cincinnati College of Medicine Office of Research
News for the week of July 15, 2019

**UC Health Office of Clinical Research.**
Attend the July’s Lunch and Learn on July 18, 2019 at noon in MSB E155. University of Cincinnati Biomedical Informatics’ Brett Harnett will present on the new upload process of IRB approved studies to UC Health’s website. This new process allows access, removal and editing rights to the study on the website. A great session for all research coordinators and Principal Investigators. For more information, please contact Nate Harris at Nate.Harris@uchealth.com.

**NIH will require ORCID iDs for individuals supported by research training, fellowship, research education, and career development awards beginning in FY 2020.**
ORCID iDs are unique, persistent digital identifiers that distinguish individual investigators and can be used to connect researchers with their contributions to science over time and across changes of name, location, and institutional affiliation. These free identifiers are assigned and maintained by the non-profit organization ORCID.

In response to recommendations from the Advisory Committee to the NIH Director and the National Science and Technology Council’s Working Group on Research Business Models that federal agencies adopt tools and approaches to simplify applicant reporting and improve the tracking of career outcomes, NIH introduced the option for PD/PIs and other users to associate an ORCID identifier with their eRA Commons Personal Profile in 2017. Since that time, more than 30,000 eRA Commons Profiles have been linked to ORCID iDs. In addition, more than 7,000 journals now use ORCID iDs and, with the permission of users, can automatically populate ORCID user accounts with their citations when they publish. Federal grant applicants can also link their ORCID accounts with SciENcv (Science Expert Network Curriculum Vitae), to simplify the creation of biosketches for grant applications.

The requirement for ORCID identifiers will be implemented through the appointment process for those appointed to institutional awards and through the application process for those applying for individual awards. See notice for more information: https://grants.nih.gov/grants/guide/notice-files/NOT-OD-19-109.html

---

**RESEARCH** Updates to policy changes, pre and post grant information, internal opportunities from the Office of Research, landmark publications, opportunities for collaborations on multi-disciplinary grants, and other information not under purview of other electronic publications. This is not for advertising seminars, speakers, etc.

**CORES** Notifications of new technologies in existing Cores, establishment of new Cores and instrumentation, calls for collaboration on instrumentation grants, information about Core offerings, and highlights of research facilitated by Core.

**EDUCATION** Trainees successes/achievements and innovations and improvements in education facilities and resources related to research.

**CULTURE** Activities or opportunities that reward, recognize, inspire collaboration, and support our research faculty, trainees, students, and staff.
