Find your hotspots name and password:

1. The hotspot powers on with the top menu button (#1 below)

2. To find the hotspots name, select menu (#1) until it gets to 2.4 Ghz option, then push the Select button (#2)

3. Hotspots names are all the same except for last 2 digits: **Verizon-RC400L-##** (#3) and the password is shown #4.

4. They will appear on your laptops with that Verizon-RC400L-## name (#5)

5. If 2 or more hotspots at one site, try not to all use same one.

6. When you return, place back on charger.
