

**8-Hour Modular Refresher
For Treatment, Storage, and Disposal
Facility Personnel**

Acknowledgments

The Midwest Consortium developed this course for Treatment, Storage, and Disposal Facility personnel under cooperative agreement number U45 ES 06184 from the National Institute of Environmental Health Sciences. Several member institutions of the Midwest Consortium contributed to the development of this program. See <http://med.uc.edu/eh/academics/training/mwc> for a listing of contacts at each member institution and additional information. We encourage you to comment on these materials.

Please give your suggestions to those teaching the program in which you are now enrolled, or forward them to the Midwest Consortium for Hazardous Waste Worker Training, University of Cincinnati, P.O. Box 670056, Cincinnati, Ohio 45267-0056 or click on 'contact us' at <http://med.uc.edu/eh/academics/training/mwc>.

Warning

This material has been copyrighted by the Midwest Consortium for Hazardous Waste Worker Training. A recipient of the material, other than the Federal Government, may not reproduce it without permission of the copyright owner.

The material was prepared for use by experienced instructors in the required refresher training of Treatment, Storage, and Disposal Facility personnel. Authors of this material have prepared it for the training of this category of workers as of the date specified on the title page. Users are cautioned that the subject is constantly evolving. Therefore, the material may require additions, deletions, or modifications to incorporate the effects of that evolution occurring after the date of this material preparation.

Disclaimer-training defines what a worker is prepared to do safely

The Occupational Safety and Health Administration (OSHA) Hazardous Waste Operations and Emergency Response (29CFR1910.120(p)) standard helps ensure worker health and safety at Treatment, Storage, and Disposal Facilities. The initial training program that precedes refresher training covered basic hazard recognition, use of provided protective equipment, basic hazard control, decontamination procedures, and other relevant standard operating procedures. It may not provide the necessary skills to equip trainees to perform site-specific emergency response activities. These activities include implementing the emergency response plan, identifying materials using monitoring instruments, selecting protective equipment, and performing specific control, containment, or confinement. This annual refresher training is required by OSHA for all Treatment, Storage, and Disposal Facility personnel after the initial training.
