Josh Magee Wins Career Development Travel Award and Presents Two Posters

Josh Magee, PhD won a Career Development Travel Award from the Anxiety and Depression Association of America. He will be provided funds to travel to their Annual Meeting on April 4-7 in La Jolla, CA and present the following poster: Magee, J. C., Smyth, F. L., & Teachman, B. A. (2013, April). Methods of controlling unwanted thinking across the adult lifespan.

The second poster was accepted for presentation at the 2013 meeting of the International Society for Research on Internet Interventions to be held May 16-18 in Chicago, IL. The poster: Magee, J. C., Smyth, F. L., & Teachman, B. A. (2013, May). A web-based examination of responses to intrusive thoughts across the adult lifespan.

Sian Cotton’s Research on Spiritual Coping in Sickle Cell Replicated at University of Alabama Birmingham

UAB researchers recently consulted with Sian Cotton, PhD (Director of the UC Center for Integrative Health & Wellness) and her research team and are using the same study design to examine spiritual coping in children aged 8 to 18 with cancer. UAB’s team will also be examining spiritual coping in parents. “While children and adolescents with sickle cell disease have specific issues that are unique to that group, these studies are helping to create a systematic approach to better understanding spirituality and religious coping in other pediatric populations,” Cotton says. “There truly are few studies looking at religious or spiritual coping in chronic illness. With collaborations and partnerships like this one, we are making steps to address patients’ needs in a holistic way and improve both their experiences and outcomes.”

UCLA MSTAR Program Award

Jeffrey Schlaudecker, MD, mentor to Junzi Shi, a UC Yr 2 Geriatric Medicine Student Scholar, announced Junzi’s selection as one of the “Best Student Research Report Award Winners” by the UCLA Medical Student Training in Aging Research (MSTAR) program. Congratulations to Junzi and Dr. Schlaudecker!
