

UCMC – Kidney Transplant

Increased Risk Donor (IRD) - Recipient Treatment & Monitoring Guideline

- DONOR: PHS** (increased infectious risk donor as defined by the Public Health Services (PHS) 2013 Guideline (AJT 2013;13:1953-62)) – *Applies only to Recipients Transplanted prior to 3/1/21*
Monitoring has been revised for recipients transplanted on 3/1/21 and beyond per OPTN policies and PHS 2020 recommendations.
The PHS category has been eliminated and universal recipient testing implemented, refer to “Post-Transplant Clinic 0-1 Years Schedule”

Recipients	Treatment	Testing	Specific Tests to order	Time points Post-Transplant
ALL	None	HBV	HBV DNA quant PCR and HBsAg	3 months
		HIV	HIV Ag/Ab Comb	
		HCV	HCV RNA quant PCR	
		HBV	HBsAb, HBcAb, and HBsAg	12 months

- DONOR HBV Positive Organs:** refer to “Treatment and Monitoring_Donor HBV” Guidelines
- DONOR HCV Positive Organs:** refer to “Treatment and Monitoring_Donor HCV” Guidelines
