residents will include three UC College of Medicine graduates: Lulu Zhang, MD; Anne Choe, MD; and Michael Burch, AB. The remaining residents will be from outside the College of Medicine; Colin Uthe, Des Moines College of Osteopathic Medicine; Jared Homayouni, U of Pikeville College of Osteopathic Medicine; and Shelita Johnson, U of Cincinnati College of Nursing. The Department of Radiology Resident Class of 2026 to Include Three UCCOM Graduates

In the evening on February 19, Alisa Kanfi and Bruce Mahoney hosted the first Radiology Department talent show. Fifteen members of the Department joined the talent show. A second talent show is being planned for March. Department Talent Show

On March 15, WKRC-TV interviewed Dr. Mahoney MD about an international study recently published online in the American Journal of Roentgenology. On February 28, Department Chair Mary Choe, MD was interviewed by WKRC-TV for a story about the UC Health Department of Radiology. We're on TV

Dr. Brown also appeared on Wellness Wednesday on WOSU radio, where she spoke about the importance of imaging research. Dr. Brown Addresses Transgender Seminar

On May 13, Ann Brown, MD was a featured speaker at a virtual seminar hosted by the American College of Radiology. Ann Choe’s costumes for the CCM Prep Ballet company.

Innumerable ways to teach and engage learners, especially those in remote communities, were shared. At least 150 people registered for the online seminar, the first Radiology Department talent show. Fifteen members of the Department joined the talent show. On March 15, WKRC-TV interviewed Dr. Mahoney about an international study recently published online in the American Journal of Roentgenology. Dr. Mahoney MD was interviewed by WKRC-TV for a story about the UC Health Department of Radiology. We’re on TV

But rather than scaling back, we are approaching the upcoming academic year as a “new normal” with lessons learned to adjust and to thrive in the virtual world. Creativity born of necessity to overcome impossible to reach and engage learners, meet, and to socialize. We had virtual happy hours, online talent shows, online exercise challenges, and scavenger hunts to name a few.

Yet, I believe the opportunity to connect personally with our learners has never been better. It has been a boon to our productivity. The accomplishments we achieved over this past year are a testament to our creativity and hard work. And so, as we move into the new academic year, we take with us the lessons we have learned and the flexibility to continue to monitor the pandemic, we will expand our opportunities for in-person work, without losing sight of the advantages of flexibility and creativity that we gained while working differently over this past year.

We’re on TV

On February 28, Department Chair Mary Mahoney MD was interviewed by WKRC-TV separate Brief Undercover about a new story on COVID-19 vaccinations. Up to 15% of women receiving the shots experienced lymph node tenderness, which mimic breast cancer. To avoid unnecessary followup tests, Dr. Mahoney advises that women who experience this in mind. Vaccination should occur either before or six weeks after a mammogram. She emphasized that screening mammograms are still important and should not be skipped because of the pandemic.

On March 15, WKRC-TV interviewed Dr. Mahoney MD about an international study recently published online in the American Journal of Roentgenology. The study examined the relationship of brain and lung symptoms of COVID-19.

leadership in leadership for women in academic medicine

Achala Vagal, MD has been chosen to participate in the Executive Leadership in Academic Medicine (ELAM) program conducted by Drexel University. The program offers a one-year fellowship of leadership in academic medicine. Dr. Vagal’s work at Research in the Radiology Department, and her recent presentation at the Radiological Society of North America, as well as her proposed ELAM fellowship, will involve developing a four-year fellowship program at the University of Cincinnati for women interested in leadership.

Achala Vagal, MD

In addition, Jerry French, U of Central Florida College of Medicine; and Tammar Williams, U of Tennessee College of Medicine; Colin Uthe, Des Moines College of Osteopathic Medicine; and Kelly Mulquin, Philadelphia College of Osteopathic Medicine; and Jared Homayouni, U of Pikeville College of Osteopathic Medicine; and Jonathan Wessels and Parker Howard (pictured), and Michael Burch, MD; Nicholas Luibrand, MD, and Casey Reed, MD on passing the American Board of Radiology Certification Examination.

Dr. Brown also appeared on Wellness Wednesday on WOSU Public Radio in Columbus on April 21 to discuss this topic.

Ann Choe, MD

Dr. Brown is a Board-Certified Breast Imaging Specialist. She has a special interest in breast ultrasound. She is a breast cancer screening guideline reviewer for the American College of Radiology. She has also been a speaker at a virtual seminar on Breast/Chest Imaging Matters. Dr. Brown is an Assistant Professor of Radiology.

Anne Choe, MD

As we move into the new academic year, rather than looking back, we are approaching the upcoming academic year as a “new normal” with loans learned to adjust and even thrive in the virtual world. Creativity born of necessity lends innovative ways to reach and engage learners, to meet, and to socialize. We had virtual happy hours, online talent shows, online exercise challenges, and scavenger hunt learning sessions to name a few.

We're on TV

On February 28, Department Chair Mary Mahoney MD was interviewed by WCKC-TV separate Brief Underscoreed a new story in thinking COVID-19 vaccinations. Up to 15% of women receiving the shots experience swollen lymph nodes, which mimic breast cancer. To avoid unnecessary followup tests, Dr. Mahoney advises that mammograms be scheduled with a lymph node check before or six weeks after a mammogram. She advises that mammograms be scheduled with lymph node check.

On March 15, WKRC-TV interviewed Ann Mahoney, MD, a speaker at the Breast Radiology Department’s data release. Follow women who have therefore been uninsured. ReCOGNITION of EXCELLENCE

UC MEDICAL CENTER
Exemplary Physician Award

Dr. Neuhan, MD received the Exemplary Physician Award recognizing his distinguished career at UCIMC. Dr. Neuhan has a member of the faculty since 1989, and a leading educator and researcher in Neurology.

COLLEGE OF MEDICINE OFFICE OF RESEARCH
Faculty Core Values Awards

The CUGC College’s Office of Research has awarded 2012 Faculty Core Values Award in character to Dr. Vovk, MD for her professionalism, positivity and productivity in interactions with the Office of Research. Dr. Vovk said, “I am truly honored to get this award. It is a special category award, about how you make people feel rather than any scientific/intellectual accomplishment. It will certainly be one of the most meaningful awards of my career.”

GRADUATE MEDICAL EDUCATION OFFICE
CME Award of Excellence

The International Radiology Fellowship in Pulmonology received the CME Award of Excellence. The International Radiology Fellowship in Pulmonology is a 12-month educational program designed to train radiologists in Pulmonary Imaging.

PRESENTATIONS

1. From left to right: Drs. Alex Kieturakis, Tony Larder, Matt Moler, Jim Huynh, Dan Lyons, Mohamed Abdelhady, Zane Chepelev, and Ali A. Al-Ali, at the 2021 ACR Annual Meeting. He was a key speaker at the session on “The Power of Breath: Navigating Asthma and COPD.”
2. The UC Radiology Team won the VDRAEY Competition at the ARRS Annual Meeting. They were awarded the title of “Best in Show” in the category of “Best Poster Presentation.”
3. The UC Radiology Team also won the “Best in Show” award in the category of “Best Poster Presentation” at the SAR Annual Meeting. They were recognized for their outstanding contributions to the field of radiology.

GRADUATE MEDICAL EDUCATION OFFICE

CME Award of Excellence: International Radiology Fellow Hanna Pulaskiewicz, MD received the Graduate Medical Education Office’s Award of Excellence in Radiology. She has been recognized for her excellence in patient care and teaching.

RECOGNITION OF EXCELLENCE

UC MEDICAL CENTER

Exemplary Physician Award: Dr. Samuel W. M. B. Ahmed, MD, has received the Exemplary Physician Award in recognition of his outstanding contributions to the field of radiology and for his dedication to patient care.

COLLEGE OF MEDICINE OFFICE OF RESEARCH

FACULTY CORE VALUES

The UC College of Medicine Office of Research has announced several new appointments. These appointments are in recognition of the faculty’s outstanding contributions to the field of radiology and for their dedication to scholarly activity.

Medical Student Summer Research Grant Awarded: Nathan Xie, UC College of Medicine Class of 2022, has received a grant from the UC Department of Radiology Medical Student Summer Research Program (MSSR). The grant is to assist in the study of tumor markers and to support research projects in the field of radiology and for their dedication to scholarly activity.

Artificial Intelligence Research Residents Pilot Grant: Brad Williams, PhD, has been awarded the UC XGNS Artificial Intelligence Research Residents Pilot Grant. This is a $20,000 pilot grant for research in artificial intelligence.

Radiotherapy residency class of 2026 to include three UCCOM graduates

The match for the Resident Class of 2026, which will start in June 2022, was announced on March 15. UC Radiology’s new residents will include three UC College of Medicine graduates Jonathan Wessels and Parker Howard (internal), and Michael Bing. In addition, Jerry Utech, U of Cincinnati College of Medicine, Jarod Henning, U of Philadelphia College of Osteopathic Medicine, Kelly Mulhern, Philadelphia College of Osteopathic Medicine, Colleen Tinsley, U of Missouri College of Osteopathic Medicine, and Tamara Williams, U of Tennessee College of Medicine will be joining the program.

Vegal Selected for ELAM

Achala Vegal, MD has been chosen to participate in the Executive Leadership in Academic Medicine (ELAM) program conducted by Drexel University. The program offers a one-year fellowship of leadership training in leadership for women in academic medicine.

Drs. Bing, Howard and Williams with their UC Chief of Imaging Services, Ram Chadalavada, MD

Department Talent Show

In the evening on February 19, Alisa Keith and Bruce Mahoney moderated the Best Radiology Department Talent Show. Following members of the department shared their interests in a Zoom meeting. Not surprisingly for people who work with images, many radiologists also practice graphic arts with mix in painting, drawing and photography. Many showcased interests included Thomas Hafner and Ajayin’s vegetable garden and Ann Choe’s costumes for the CCM Prep Ballet company.

Dr. Bing also appeared on Melissa Wednesday on WOSU Public Radio in Columbus on April 21 to discuss this topic.

Achala Vagal Selected for ELAM

From the Chair

Creativity and change continue to be the name of the game. As we approach the start of a new academic year in July, vaccine availability has opened up new possibilities, and I am cautiously optimistic. We plan to bring our medical students, residents, fellows and faculty back to the department full-time in July. I am eager to get back to more in-person activity. Although we are farther away, I look forward to the ‘old normal’ of building strong medical relationships and the energy that comes with smart, creative, engaged people working together. But rather than looking back, we are approaching our upcoming academic year as a ‘new normal’ with lessons learned to adjust and even thrive in the virtual world. Creativity born of necessity is ever more virtuous to reach out and engage learners, in the medical sciences.

NEW DEPARTMENT FELLOWSHIPS

Because of the current pandemic, we have expanded our fellowship training courses at UC Health.

We’re on TV

On February 28, Department Chair Mary Mahoney MD was interviewed by WKRC-TV reporter Brad Underwood about a news story on masking and COVID-19 vaccinations. Up to 15% of women receiving the shot experience menstrual symptoms, which mimic breast cancer. To avoid unnecessary followup tests, Dr. Mahoney advises that menstruators be well-informed on this in mind. Vaccination should occur either before or six weeks after a mammogram. She emphasized that screening mammograms are still important and should not be skipped because of the pandemic.

On March 15, WKRC-TV interviewed Dr. Ram Chadalavada, MD about an international study recently published online in the American Journal of Roentgenology on the relationship of brain and lung symptoms of COVID-19.
