I am proud to present the annual report for the Department of Surgery at the University of Cincinnati, where our missions are:

1. To provide comprehensive, compassionate and skilled surgical services for Cincinnati and the surrounding region.

2. To train the next generation of surgeon leaders.

3. To advance the state-of-the-art and scientific basis of the discipline of surgery.

4. To provide leadership in ensuring health care for all members of the Cincinnati community.

This past year we celebrated the 100-year anniversary of our General Surgery Residency Program. George Heuer, Associate Professor at Johns Hopkins University under William Stewart Halsted, accepted Cincinnati’s offer as the first Christian R. Holmes Professor of Surgery in 1922. Dr. Heuer started the program with four men—a resident and three assistant residents. We now have an average of 40 or more general surgery residents (approximately 50% women) in training, using the same system of graduated responsibility so that each resident is fully competent when they graduate, a system that has stood the test of time with outstanding results.

These excellent results are possible because the Department of Surgery comprises more than 150 surgical faculty plus advanced practice providers, nurses, pharmacists and support staff who all take great pride in their patient care responsibilities and other clinical duties while maintaining a strong relationship with our institutional colleagues and community partners. We are dedicated to the training of nearly 200 medical students and an average of 100 residents/fellows each year across multiple subspecialties, with the result that our graduates consistently attain the most competitive residencies, fellowships and faculty positions, and provide for the next generation of health care providers.
Our academic achievements have also continued to be exceptionally strong. Included in this report is a representative listing of faculty publications and presentations. The Department of Surgery is proud to have secured new NIH, extramural grants and philanthropic donations providing funding for the important discoveries coming from our laboratories and clinical trials dedicated to improving the health of our patients.

It has been a great honor and privilege to serve as Interim Chair since 2019, but I will be transitioning these responsibilities at the beginning of November 2023 to David A. Gerber, MD.

Dr. Gerber was chosen as the 9th Christian R. Holmes Professor and Chair following a highly competitive national search. He most recently served as the George F. Sheldon Distinguished Professor with Tenure at the University of North Carolina at Chapel Hill (UNC) School of Medicine, Vice Chair of the Department of Surgery, and Chief of the Division of Abdominal Transplantation. We look forward to Dr. Gerber’s leadership and bringing us all closer to realizing the Department of Surgery vision first imagined 100 years ago—to be indispensable through excellence in surgical care, in the training of tomorrow’s surgeons, and in the discoveries that will improve healing and give hope to our patients.

Thank you.
Our education values are to:

- Train medical students, residents and fellows to reach their greatest potential for success as surgeons and leaders.

- Celebrate our individual strengths and diversity, and support each other as we overcome our hurdles to success, all while sharing common goals of clinical excellence, scientific discovery and professional growth.

- Promote and support our residents to go on to the most highly competitive fellowships and academic positions, and to become successful leaders advancing surgical excellence.
In September 2010, University of Cincinnati Physicians — the faculty physician practice group of the UC College of Medicine — along with University Hospital and West Chester Hospital — publicly launched the collaborative partnership UC Health. This partnership speaks to the value of discovery-driven medicine that is at the core of University of Cincinnati Physicians and we will continue to strengthen our partnership through our mission of research, education and patient care.

University of Cincinnati Physicians is the multispecialty practice group of the UC College of Medicine. Physicians, surgeons, nurses and other allied health professionals in the group staff the hospitals of UC Health. University of Cincinnati Physicians is the Cincinnati area’s largest and most distinguished group of board-certified physicians, with more than 700 clinicians practicing in every medical and surgical specialty and a powerhouse for health care in the Greater Cincinnati region.

Many clinicians with University of Cincinnati Physicians are fellowship trained in various fields of medicine to provide specialized care to our patients. As clinicians, teachers and researchers of modern medicine, our physicians are able to provide patients with contemporary treatments and methods of care that aren’t typically available outside of an academic medical setting. UC Health provides a comprehensive menu of inpatient and outpatient services, delivered at a cohesive network of hospitals and medical offices throughout the Greater Cincinnati region.

Visions & Goals

Through responsive, innovative and cost-effective care, University of Cincinnati Physicians is committed to provide the very best personalized care for our patients. UC Health will be the health care network of choice in our region and the care we deliver will make a difference today and for a lifetime. Together, the facets of UC Health will represent quality, commitment and strength.

Together, UC Health is:

• world-class physicians
• the largest physician group in the region
• committed to delivering the highest level of patient care
• driven by discovery and innovation
• the trainers of the physicians of tomorrow
• an anchor of health care in Greater Cincinnati.
Goals for Continued Success

To ensure success, UC Health will consistently focus on the following:

- Accessibility to specialty care for patients, referring physicians and insurers.
- Recruiting and retaining world-class physicians.
- Providing the highest level of personalized health care to patients.
- Improving health care delivery while discovering tomorrow’s medical treatments.
- Utilizing more efficient, effective business practices.

UC Health brings together the region’s top clinicians and researchers to provide world-class care to our community. From our flagship University of Cincinnati Medical Center to our state-of-the-art West Chester Hospital, UC Health delivers the absolute best in treatment and care.

Continually recognized for excellence and backed by the academic strength of the University of Cincinnati, one of the nation’s top 25 public research universities, UC Health is revolutionizing how discovery-driven care is delivered.

For more information on UC Health, please visit uchealth.com.
Facilities

UC Health University of Cincinnati Medical Center
UC Health University of Cincinnati Medical Center (UCMC) has been serving the Cincinnati community for over 180 years and is a primary teaching and patient care site for the University of Cincinnati (UC) Department of Surgery. UCMC is a 726-bed tertiary hospital which provides many services not available in any other facility in the region. Specialized services available include the region’s best-equipped and busiest Level I trauma center, one of just a few adult burn treatment centers certified by the American College of Surgeons/American Burn Association, and transplantation for heart, liver, pancreas and kidney. The hospital was ranked as the No. 1 regional hospital by U.S. News & World Report and surgery’s divisions of urology and heart surgery were noted as “top performing” programs.

Barrett Center
The Barrett Center at the UC Cancer Center (UCCC) provides some of the most advanced and comprehensive cancer services available in the region. This center supports clinical research with its involvement in more than 120 active protocols sponsored by cooperative programs through the National Cancer Institute and private pharmaceutical companies. The UC programs are approved by the American College of Surgeons Commission on Cancer. The ambulatory office facilities that support the UC Department of Surgery’s oncology division are housed in the Barrett Center, the core cancer outpatient facility of the UC Cancer Center. The center encompasses all education, research and clinical programs related to oncology at UC, and is a partnership of the UC College of Medicine, Cincinnati Children’s Hospital Medical Center and UC Health.

Cincinnati Children’s Hospital Medical Center
Cincinnati Children’s Hospital Medical Center is a nationally and internationally recognized leader in the treatment and research of pediatric and adolescent diseases. As a result, this institution draws patients from all over the United States and over 30 countries each year who need its specialized tertiary care. Cincinnati Children’s has 598 beds and is the only Level I pediatric trauma center in southwestern Ohio, northern Kentucky and southeastern Indiana. The hospital is a major teaching site for UC surgery residents and consistently ranks high in the nation among all Honor Roll hospitals in U.S. News & World Report’s annual Best Children’s Hospitals ranking.

Holmes Hospital
The Holmes Hospital is an ambulatory facility, located at the corner of Eden Avenue and Albert B. Sabin Way. The hospital is home of the Oral and Maxillofacial Surgery resident clinic which sees over 12,000 patients annually. In addition, the hospital houses the private practice for the division of plastic, reconstructive, and hand surgery.

Cincinnati Department of Veterans Affairs Medical Center
The Cincinnati Department of Veterans Affairs Medical Center is a major 248-bed acute-care hospital for veterans in Southwest Ohio. This facility is a dean’s committee medical center and affiliated with the UC College of Medicine. All staff surgeons at the VA Medical Center have academic appointments at the College of Medicine. General surgery, urology and vascular surgery represent three of the largest volume sections within the VA surgical service. The surgical service continues to encounter a wide variety of pathological conditions which require surgical treatment, thus providing a significant opportunity for faculty research and a vital cornerstone for the surgical education of residents and medical students.

The Christ Hospital
The Christ Hospital is a 555-bed acute-care hospital located 1.5 miles from the UC College of Medicine. The hospital remains an important part of the integrated surgical residency in general surgery. UC surgeons utilize The Christ Hospital for patient care in the areas of general, colorectal, vascular, weight loss, transplantation surgery and surgical oncology.

The Christ Hospital Medical Office Building
The Christ Hospital Medical Office Building is an ambulatory office practice location for the UC Department of Surgery. It is home to the division of colon and rectal surgery, with additional offices for general surgery.
CARE/Crawley and Medical Sciences Building

The Medical Sciences Building is the main administrative and laboratory facility of the College of Medicine. The Department of Surgery operations housed in this building include the Chairman's office, faculty academic offices, teaching facilities, and laboratories.

UC Health Physicians Office Clifton

The UC Health Physicians Office Clifton is the primary ambulatory office practice site for the UC Department of Surgery. Housed on the seventh floor of this 135,000 square foot facility are 21 exam rooms, four procedure rooms, medical records, scheduling center and clinical practice support staff.

UC Health Physicians Office North

The UC Health Physicians Office North is located in West Chester, Ohio, just off I-75 in Butler County. This 80,000 square foot facility is home to a full-service center for high-tech diagnostic services. All surgical subspecialties under the Department of Surgery offer convenient clinic hours at this location. The UC Health Physicians Office West Chester is home to The Cosmetic Center, which offers advanced cosmetic surgery and skin care treatments; and to the UC Health Weight Loss Center, which offers a comprehensive medical weight loss program and latest surgical weight loss options.

West Chester Hospital Surgical Center

The UC Health Surgical Hospital is accredited by the Joint Commission. This state-of-the-art ambulatory surgery facility has four operating rooms and two endoscopy suites. The facility can accommodate outpatients as well as short-stay procedures requiring hospitalization for up to 72 hours.

UC Health West Chester Hospital

UC Health West Chester Hospital is a 186-bed acute care hospital in West Chester, Ohio, providing the latest technology delivered in a healing environment. The hospital is conveniently located and easily accessible from Interstate 75 at Tylersville Road. Services include a full-service emergency department, and inpatient and outpatient diagnostic and treatment services.

Drake Center

The Drake Center is the region's full-service post-acute care rehab facility, a not-for-profit health care organization affiliated with the University of Cincinnati. Drake recently completed an extensive $33 million modernization project, creating an efficient, inviting, 300-bed health care center that allows the Drake team to provide medically complex, quality health care into the 21st century. The Drake Center provides the Department of Surgery the opportunity to treat patients who require post-acute care, contributing to the goal of restoring each individual patient to the highest possible level of functioning and independence.

Holzer Clinic

The Holzer Clinic is a modern, 100-plus physician, multispecialty group practice facility located in Gallipolis, Ohio, near the West Virginia border. This clinic provides primary, secondary and tertiary care to patients in the Southeastern Ohio and Western West Virginia region. The Holzer Clinic's primary service area covers eight counties (six in Ohio and two in West Virginia) with a population base of about 300,000 and over 150,000 clinic visits per year. The Holzer Clinic is affiliated with Holzer Health System, a 266-bed community-oriented acute-care hospital located adjacent to the main clinic facility. Approximately 6,000 operations are performed yearly and there are over 16,000 Emergency Department visits per year. Virtually all surgery residents select a two-month elective rotation to this facility. This rotation exposes these residents to a rural, broadly-defined general surgery experience.

Mzuzu Central Hospital, Malawi, Africa

Mzuzu Central Hospital is a 300-bed district hospital and referral center in the Northern region of Malawi serving a catchment area of approximately 2.5 million people. As part of the Global Surgery Rotation, 3rd or 4th year general surgery residents rotating at this hospital perform over 100 operations in a 2-month period of time, including pediatric, gastrointestinal, urology, endoscopic, and head & neck cases.
The UC Department of Surgery was derived from pioneering American surgeons and the evolution of local colleges of medicine and hospitals that parallel the origins and growth of Cincinnati itself, dating as far back as 1788. The “Hopkins Invasion” of 1922 marks the birth of the contemporary Department of Surgery at the University of Cincinnati. Dr. George Heuer and a small group of surgeons from Dr. William Halsted’s department at Johns Hopkins Medical School moved from Baltimore to Cincinnati and established a full-time surgical department with a pyramid-structured general surgery residency training program to graduate highly qualified surgeons after several years of rigorous training. After the Peter Bent Brigham Hospital at Harvard Medical School in Boston, the UC Department of Surgery was the second program in the country to be patterned on the Hopkins model.

**Dr. George J. Heuer** (1922-1931), the first Christian R. Holmes Professor of Surgery and Chair, brought Dr. Halsted’s method of surgical training to Cincinnati, along with several of Halsted’s residents including future department chairmen, Mont Reid, B. Noland Carter and Max Zinninger. He established the now routine practice of taking thorough case histories of patients and regular follow-up care. He instituted that all tissue be studied in the lab to confirm a surgeon’s diagnosis, again a now routine practice. The tradition of superior quality and surgical innovation continued under subsequent chairs of the Department.

**Dr. Mont Rogers Reid** (1931-1943), the second Christian R. Holmes Professor of Surgery and Chair, worked tirelessly to strengthen the relationship between the university medical school and the community. He brought attention to the Department through numerous articles in the prestigious *New England Journal of Medicine* on wound healing processes.

**Dr. Max M. Zinninger** (1943-1946) led the Department in the interim years after Dr. Reid’s untimely death. He was one of the first to complete his surgical residency at UC in 1927 under Heuer. Also known for working collaboratively with community physicians on complicated cases requiring highly specialized care, he was considered a consummate surgeon and gentleman who was held in the highest regard by the community, his students and colleagues.

**Dr. B. Noland Carter** (1946-1952), the third Christian R. Holmes Professor of Surgery and Chair, was renowned for his research of tissue injury and burns. He developed partnerships with the military and industry investigating newer antibiotics. During Carter’s tenure, the isotope laboratory was formed to study and treat neoplasm. Dr. Charles Barrett, forefather of the Barrett Cancer Center, was recruited to lead this effort. Radioisotope and tracer studies for diagnosis were pioneered here. A vascular lab was established and the Department made great progress in cardiothoracic surgery including cardioangiography and the first perfusion carried out. Investigations were also established for lung cancer. In the early 1950’s, UC Department of Surgery was well established as one of the premier centers for study of coronary circulation and artificial circulation. One of the most notable achievements came in 1951, when Dr. James Helmsworth of the UC Department of Surgery joined cardiologist Dr. Samuel Kaplan and chemist Dr. Leland Clark to develop the world’s first functional heart-lung machine, located at Cincinnati Children’s Hospital Medical Center.
**Dr. William A. Altemeier** (1952-1978), the fourth Christian R. Holmes Professor of Surgery and Chair, further expanded the Department with a focus on microbiology and intra-abdominal infections, establishing the Department as a pioneering center for surgical infectious disease. The perineal repair for rectal prolapse is named for Dr. Altemeier, and he was the first to describe cancer of the proximal (hilar) bile ducts, an entity subsequently recognized and named after Klatskin. Dr. Altemeier oversaw the building of the first surgical research facility and the Shriners Burns Hospital, one of three in the nation. The pediatric surgery residency training program was founded at Children’s Hospital in the late 1950’s by Dr. Lester Martin, who raised pediatric surgery to new levels and trained numerous pediatric surgeons who have become leaders in the field. Dr. Martin also pioneered and perfected the surgical technique known as the “pull-through” procedure for ulcerative colitis. Significant developments in thyroid surgery and hand surgery were pioneered by Dr. Vinton “Hoppy” Siler, who was also a great benefactor of the Department. In the mid-1960s, Dr. J. Wesley Alexander led UC’s transplant and immunology program, training many transplant fellows and conducting significant research funded for decades by the National Institutes of Health. Dr. Henry Neale, a UC medical school graduate, returned to Cincinnati in 1974 following a fellowship at Duke University and founded the plastic surgery residency program which has attracted and graduated plastic surgeons who are considered among the very best in the country.

**Dr. Josef E. Fischer** (1978-2001), the fifth Christian R. Holmes Professor of Surgery and Chair, was responsible for significant expansion of full-time faculty in the early 1980’s, initiating or strengthening subspecialty areas including vascular, trauma and critical care, transplant, burn, plastic surgery and urology. Dr. Fischer was instrumental in transforming the former Cincinnati General Hospital from a city-county hospital into University Hospital, a tertiary medical center and the flagship of The Health Alliance. The urology residency program again had its center at the University of Cincinnati Medical Center and has since enjoyed great success and growth, as has the oral and maxillofacial surgery residency program. Physical growth was also seen with the building of the Barrett Cancer Center, a critical care tower and new operating rooms.

**Dr. Jeffrey B. Matthews** (2001-2006), the sixth Christian R. Holmes Professor and Chair, oversaw growth of full-time faculty members. Emphasis was placed on robotic-assisted surgery, telemedicine and technology. The Department was recognized nationally for its academic and training achievements and leadership in American surgery, and continued to be celebrated locally as a specialist resource for the community and a partner in an integrated health care network. Dr. Matthews’ emphasis was on multidisciplinary clinical and research programs that cut across traditional department lines. Partnerships were developed with the University of Cincinnati, local industry, and the military to develop emerging technologies for improved patient care. The Center for Surgical Innovation was opened in 2006 to advance research and training in robotics, telemedicine, and telesurgery. Dr. Matthews accepted the position as Chairman of Surgery at the University of Chicago in October 2006.
**Dr. Michael S. Nussbaum** (2006-2008), Professor of Surgery and Interim Chair, was Chief of Staff at the University Hospital and served as Vice Chair for Clinical Affairs in the Department of Surgery. He joined the UC faculty in 1986 when he completed his surgical residency training in the UC Department of Surgery. Dr. Nussbaum was part of the original team that developed the plans for what became the Center for Surgical Innovation. His longstanding commitment to excellence in patient care continued to advance the Department's mission of fostering education, research, and innovations for treating surgical patients. Dr. Nussbaum became the first Chair of Surgery at the University of Florida in Jacksonville in 2008, and later Professor and Chair of Surgery at Virginia Tech Carilion School of Medicine in Roanoke, Virginia.

**Dr. Michael J. Edwards** (2008-2019), the seventh Christian R. Holmes Professor and Chair, was an oncologic surgeon who specialized in treating breast disease. Dr. Edwards nurtured the development of the UC Institute for Military Medicine, an internationally renowned program advancing the care of the acutely injured soldier and civilian. He brought a principled approach to the Department with a profound commitment to teaching the discipline of surgery through the highest quality patient care. Dr. Edwards provided critical leadership for the successful unification of the UC College of Medicine practice plan and its integration into UC Health in 2011. He stepped down in January 2019 to focus on the international sphingolipid research program that he has built in conjunction with the department's research team and international collaborators.

**Dr. Jeffrey J. Sussman** (2019-2023), the eighth Christian R. Holmes Professor of Surgery and Interim Chair, is a surgical oncologist who completed tumor immunology research at the National Institutes of Health and fellowships in surgical critical care and surgical oncology research at the University of Michigan and in surgical oncology at the M.D. Anderson Cancer Center. He has been a UC faculty member since 1997 and served as chief of the department's Section of Surgical Oncology from 2007-2015. Dr. Sussman serves as vice chair for education, program director of the General Surgery Residency, and director of the Skin Cancer and Sarcoma Program at the UC Cancer Institute. Dr. Sussman is active in clinical research, having served as principal investigator for many laboratory and clinical trials exploring how the human immune response can be altered to improve cancer therapy. He has published numerous articles focused on advancing treatments and understanding of melanoma and other solid tumors. His clinical practice focuses on melanoma, sarcoma, gastrointestinal neoplasms, peritoneal surface and hepatobiliary/pancreas malignancies.

**Dr. David A. Gerber** (2023-present), the ninth Christian R. Holmes Professor of Surgery and Chair, is a transplant surgeon who specializes in solid organ transplantation and liver cancer. His research focuses on cell biology and tissue engineering in the field of regenerative medicine and on the relationship of the matrix/environment that supports the growth and differentiation of select stem cell populations into functional tissues. He has served on the Department of Health and Human Services’ (HHS) Advisory Committee on Transplantation and on the boards of the United Network for Organ Sharing and the national Organ Procurement Transplant Network (OPTN). He also serves as the chief medical officer of Biomed Organ Bank, LLC, a company focused on developing ex vivo organ preservation technologies. The recipient of more than 25 basic science grants, Gerber has been principal investigator or co-investigator of over 40 industry-sponsored clinical trials focusing on advancing patient outcomes in transplantation and hepatocellular carcinoma. He has published more than 200 publications, abstracts and book chapters in the areas of transplantation, stem cell biology, regenerative medicine and liver cancer.
100 YEAR ANNIVERSARY CELEBRATION OF GENERAL SURGERY RESIDENCY
University of Cincinnati Department of Surgery
Mont Reid Surgical Society
Cincinnati, Ohio
April 25-26, 2023

PROGRAM

Tuesday, April 25, 2023
5:00 p.m.   Cecil Striker Society Lecture:
History of the University of Cincinnati Department of Surgery
Guest Lecturer – Michael S. Nussbaum, M.D.
Sponsored by the College of Medicine and Henry R. Winkler Center for History of the Health Professions
Kresge Auditorium, E-Level, College of Medicine
6:30 - 8:30 p.m. Reception
Surgical Faculty/Residents/Alumni/Guests
Cincinnati Country Club

Wednesday, April 26, 2023
8:00 a.m. Surgical Symposium, Surgical Amphitheater, University of Cincinnati Medical Center
(2 CME credit hours offered)
8:00 am   Welcome – Dr. Jeffrey J. Sussman
8:15 am   UC Surgery Residency … Beyond the Operating Room – Dr. Robert Cavagnol
8:45 am   UC Surgery Residency … Contributions to Research – Dr. Angela Ingraham
9:15 am   UC Surgery Residency … Excellence in Pediatric Surgery – Dr. Colin Martin
9:45 am   UC Surgery Residency … Leadership in Surgery – Dr. Kfir Ben-David
10:15 am  Panel Discussion
11:00 a.m Lunch available in MSB Cafeteria
12:00 noon Tours available of UC Hospital and the History of the Health Professions Library Display - From Halsted to Heuer: The UC Department of Surgery and the Johns Hopkins Pipeline, 1922-1952
The Office of Education

Jeffrey J. Sussman, MD – Director, Division of Education; Director, Residency Program in General Surgery. Dr. Sussman oversees outstanding leadership and innovation by the associate directors and staff in their stewardship of our surgical education program.

Amy T. Makley, MD – Associate Director, Residency Program in General Surgery. Dr. Makley has been responsible for the curriculum and evaluative process and has brought considerable expertise in assessment and professional development of the surgical residents. She is also in charge of the Fundamentals of Laparoscopic Surgery (FLS) and Fundamentals of Endoscopic Surgery (FES) programs.

Michael D. Goodman, MD – Associate Director, Residency Program in General Surgery. Dr. Goodman is the administrative lead for our global surgery program and all rotation scheduling. He also serves as Director of General Surgery Research.

Krishna P. Athota, MD – Associate Director, Residency Program in General Surgery. Dr. Athota has won three consecutive Department of Surgery Outstanding Educator Awards as voted by general surgery residents, as well as the Silver Apple Award from the UC medical students. He leads the incoming surgical intern boot-camp program and surgical skills curriculum.

Latifa Sage Silski, MD – Director, Surgery Student Education. Dr. Silski, newly appointed to this role, brings her passion and energy for surgical education to the Surgery Student program and serves as a champion for diversity and equality.

Jennifer S. Colvin, MD – Associate Director, Surgery Student Education. Dr. Colvin brings a strong dedication to teaching medical students and serves as a role model and mentor. She has previously served as a LPCC preceptor at UCCOM.

Carla F. Justiniano, MD – Associate Director, Surgery Student Education. Dr. Justiniano has a strong interest in teaching medical students and serves as a role model and mentor.

Christen Salyer, MD – Robert H. Bower Administrative Chief Resident.
Amy T. Makley, MD
Associate Professor of Surgery
Section of General Surgery
Associate Director, Residency Program in General Surgery
Director, UCMC Trauma Surgery

Michael D. Goodman, MD
Professor of Surgery
Section of General Surgery
Associate Director, Residency Program in General Surgery
Director, General Surgery Research

Krishna P. Athota, MD
Associate Professor of Surgery
Section of General Surgery
Program Director, Fellowship in Critical Care Surgery
Associate Director, Residency Program in General Surgery

Latifa Sage Silski, MD
Assistant Professor of Surgery
Section of General Surgery
Director, Surgical Student Education

Jennifer S. Colvin, MD
Assistant Professor of Surgery
Section of General Surgery
Associate Director, Surgery Student Education

Carla F. Justiniano, MD
Assistant Professor of Surgery
Section of Colon & Rectal Surgery
Associate Director, Surgery Student Education

The Office of Education | Page 18
The Education team has made many significant accomplishments including:

• Expansion of virtual simulation practice opportunities with inanimate and animate models to improve surgical skills prior to entering an operating room. These opportunities exist through virtual reality simulation equipment housed in the Woliver Laboratory for Simulation and Education in Surgery and a fully equipped operating room in the Center for Surgical Innovation.

• Expanded Robotic training and curriculum.

• Continued improvement in teaching conferences and wellness events with virtual and hybrid modifications due to the pandemic.

• Website and recruitment process improvements.

• Expanded new Peer to Peer mentoring and conference programs.

• Expansion of social media presence.

• New APP Critical Care Fellowship.

Surgical Education Overview

Education in the Department of Surgery includes medical student clinical clerkships and electives, graduate medical education resident and fellowship programs, basic scientist training, and continuing medical education seminars and classes. At our most recent review, the General Surgery Residency program received full accreditation from the Residency Review Committee of the ACGME. Our surgical clerkship has become a model of innovation for clinical education and has led to a marked increase in the number of medical students at the University of Cincinnati choosing surgery as their career path. Over the past four decades, surgical faculty and residents have held a majority share of best teaching and Gold Humanism awards as voted by the UC medical students.

The Surgical Education Program continues to attract and train the best and brightest medical students and residents from around the country. Residents who graduate from our programs have an outstanding record matching highly competitive fellowships and have been successful in securing positions in academic departments and as leaders in the community practice of surgery.

The Edward Woliver Laboratory for Simulation and Education in Surgery includes an array of simulation equipment designed to allow surgical residents to practice new skills in a safe, non-pressured environment outside the operating room. The lab has both low- and high-tech simulation equipment, including simple models to simulate suturing vessels to robotics. It also includes sophisticated devices that incorporate haptics (sense of touch) and track a surgeon’s performance during the training session. The lab serves as a regional testing site for the Fundamentals of Laparoscopic Surgery (FLS) course, an education and skills training module which is the ABS requirement for the evaluation of basic skills and knowledge for laparoscopy. The lab is also outfitted to provide needed equipment for the Fundamentals of Endoscopic Surgery (FES) course curriculum teaching diagnostic and therapeutic upper and lower GI endoscopy. UC serves as a testing site for FES to the greater Cincinnati region.

Graduate Medical Education

The Department of Surgery sponsors graduate medical education programs in 12 surgical specialties which encompass 102 residents and fellows. The following lists these resident and fellowship programs for 2023-2024:

Resident Programs (81):

• General Surgery (41)
• Oral and Maxillofacial Surgery (13)
• Plastic, Reconstructive and Hand Surgery (6)
• Thoracic Surgery (6)
• Urology (10)
• Vascular Surgery (5)

Fellowship and Advanced Training Programs (21):

• APP Critical Care Fellowship (2)
• Congenital Cardiac Surgery Fellowship Program (1)
• Pediatric Surgery (2)
• Pediatric Surgery Subspecialty (4)
• Pediatric Urology (3)
• Pediatric Urology – International (non-accredited) (1)
• Plastic, Reconstructive and Hand Surgery (3)
• Surgical Critical Care (2)
• Transplant Surgery (3)

The educational programs are guided by a group of dedicated surgeon educators who have helped to develop an educational environment that attracts many of the best candidates in the country. The combination of talented, committed specialty program directors and faculty and
excellent residents and fellows results in an educational program that is second to none.

The Department of Surgery has a distinguished history of educating its graduates to be leaders in surgery. Our commitment to excellence in patient care, education and advancement of knowledge in the surgical sciences creates an environment in which surgical training can flourish. Residents complete their training programs with exceptional breadth and depth of experience in their specialty.

There is an abundance and variety of clinical experiences in the hospitals and outpatient offices of our integrated and affiliated institutions which include:

- University of Cincinnati Medical Center
- Cincinnati Veterans Affairs Medical Center
- Cincinnati Children’s Hospital Medical Center
- West Chester Hospital
- The Christ Hospital
- Holzer Clinic, Gallipolis, Ohio
- Mzuzu Central Hospital, Malawi, Africa

Clinical experience is supplemented by an extensive series of educational conferences and surgical simulation experience. At the core of the educational program are Surgical Grand Rounds, Morbidity and Mortality Conference, Curriculum Conferences, mock oral examinations and skills labs. These weekly conferences are supplemented by numerous specialty- or rotation-specific conferences.

Surgical Simulation Experiences:

- Advanced Laparoscopy
- Advanced Operative Skills
- Advanced Surgical Skills for Exposure in Trauma (ASSET)
- Robotics Training
- Basic Laparoscopy
- Fundamentals of Endoscopic Surgery (FES – GI Mentor)
- Fundamentals of Laparoscopic Surgery (FLS)
- GI Anastomosis
- Vascular Anastomosis
- Solid Organ Transplant
- Introduction to General Surgery (R1 Boot Camp)
- Laparoscopic Colectomy
- Laparoscopic Hernia
- Surgical Stapling
- Trauma Surgery Simulation
- Advanced Trauma Life Support Training

Complementing the clinical training are outstanding opportunities to participate in basic science research in the Department of Surgery, other basic science laboratories within the College of Medicine or extramural institutions. Most residents spend two years in laboratory research with a faculty mentor. Opportunities are available to pursue advanced degrees such as MS, PhD or Doctor of Science. These research projects are supported by an institutional training grant (T32 award) in trauma and several R01 research grants from the National Institutes of Health (NIH) and the U.S. Department of Defense (DoD).
2022-2023 Visiting Professor Program

The Visiting Professor Program of the Department of Surgery is extremely important for the education of both the faculty and the residents. It gives the residents a first-hand opportunity to come into contact with distinguished leaders in American surgery, participate in teaching rounds with them, and get to know them as individuals. In addition, the Visiting Professor gives presentations at Surgical Grand Rounds to faculty, residents and medical students.

During the academic year 2022-2023, we had the privilege of hosting five Visiting Professors and continued to offer virtual Grand Rounds:

September 14, 2022
Fifteenth Annual Heekin Family Lectureship
Abhinav Humar, MD, PhD, FACS
Thomas E. Starzl Professor in Transplantation Surgery
Clinical Director, Thomas E. Starzl Transplantation Institute
Division Chief, Transplant Surgery
University of Pittsburgh Medical Center
Surgical Grand Rounds: “Changing the Paradigm of Living Donor Liver Transplant – The UPMC Experience”

February 1, 2023
Twenty-First John J. McDonough Sr. & Elizabeth Ann Donovan Visiting Professor
Ala Stanford, MD, FAAP, FACS
Regional Director, Region III Office of Intergovernmental & External Affairs, U.S. Department of Health & Human Services
Founder and Physician, Dr. Ala Stanford Center for Health Equity
Pediatric Surgeon, Stanford Pediatric Surgery, Philadelphia, PA
Surgical Grand Rounds: “Striving for Health Equity in the Midst of a Pandemic”

May 3, 2023
Oral & Maxillofacial Surgery Visiting Professor
Peter D. Quinn, DMD, MD
Schoenleber Professor of Oral and Maxillofacial Surgery
University of Pennsylvania School of Dental Medicine
Former Chief Executive Physician of the Penn Medicine Medical Group
Philadelphia, PA
Surgical Grand Rounds: “American Medical Centers at the Crossroads”

May 10, 2023
Twenty-Third J. Rawson Collins Visiting Professor
Deborah M. Stein, MD, MPH
Professor of Surgery, Tenured
University of Maryland School of Medicine
Director of Adult Critical Care Services
University of Maryland Medical Center
Baltimore, MD
Surgical Grand Rounds: "Modern Concepts in Hemorrhage Control"

May 24, 2023
Fourth Robert P. Hummel, MD Visiting Professor
Amir A. Ghaferi, MD, MSc, MBA
Professor of Surgery
President and CEO, Physician Enterprise
Senior Associate Dean for Clinical Affairs
Froedtert & Medical College of Wisconsin
Milwaukee, WI
Surgical Grand Rounds: "Identifying an Academic Path Through Intentional Growth"
Residency Program in General Surgery

Jeffrey J. Sussman, MD, Program Director  
Vice Chair, Education  
Section of Surgical Oncology  
Director, Division of Education

Amy T. Makley, MD, Associate Director  
Associate Professor of Surgery  
Section of General Surgery

Michael D. Goodman, MD, Associate Director  
Professor of Surgery  
Section of General Surgery

Krishna P. Athota, MD, Associate Director  
Associate Professor of Surgery  
Section of General Surgery  
Program Director, Fellowship in Critical Care Surgery

Jenna M. Lengerich, MHA, Office Manager & Residency Program Coordinator  
513-558-4206  
lengerja@ucmail.uc.edu

Debbie Browne, Assistant Residency Coordinator  
513-558-5862  
brownedm@ucmail.uc.edu  
Department of Surgery  
University of Cincinnati College of Medicine  
231 Albert Sabin Way (ML0558)  
Cincinnati, OH 45267-0558

Residency education in General Surgery comprises five clinical years, with typically six Chief Residents finishing the program annually. A laboratory/professional development experience of two years is completed by the majority of the residents with a wide range of experiences being available individualized to the residents’ career goals. The residency program in General Surgery is fully accredited by the Residency Review Committee for Surgery.

In the first and second postgraduate years, residents receive a broad experience in the essential content areas as well as in surgical specialties. Experience is gained in both inpatient and outpatient care, with appropriate emphasis on evaluation and diagnosis as well as operative therapy and perioperative care. This experience is obtained in a variety of settings including the general surgery services in community hospitals and the academic health center, intensive care units, and the Cincinnati Children’s Hospital.

During the third and fourth clinical years, the resident is given additional responsibility as a leader on surgical teams including the trauma service, thoracic surgery, vascular surgery and transplantation surgery. Additional experience is also gained as senior resident in general surgery at the Holzer Clinic, Gallipolis, Ohio. Residents may also choose to do a global health surgery elective in Malawi, Africa.

In the fifth year, Chief Residents lead general surgery teams with faculty supervision at University of Cincinnati Medical Center, general and colorectal surgery services at The Christ Hospital, and the general surgery teams at the VAMC and West Chester Hospital. University of Cincinnati Medical Center provides extensive experience in gastrointestinal disease, hepatobiliary disease, pancreatic disease, colorectal surgery and surgical oncology. Residents at The Christ Hospital are exposed to a wide variety of surgical pathology and have the opportunity to learn about the private practice of surgery. The surgical services at the VAMC and West Chester Hospital care for general, colorectal and thoracic surgery patients.
General Surgery Residents 2022-2023

Graduating Chief Residents:

Betzaira G. Childers, MD – University of Texas, San Antonio – Entered Surgical Oncology Fellowship at Moffitt Cancer Center, Tampa, FL

Al-Faraaz Kassam, MD, MBA – Rush Medical College – Entered Transplant Surgery Fellowship, Johns Hopkins University, Baltimore, MD

Tiffany C. Lee, MD, MS – University of Rochester – Entered Minimally Invasive Surgery Fellowship, Oregon Health & Science University, Portland, OR

Mackenzie C. Morris, MD – Thomas Jefferson University – Entered Transplant Surgery Fellowship, Emory University, Atlanta, GA

Kasiemobi Pulliam, MD – Indiana University – Entered Pediatric Surgery Fellowship, Children’s Hospital Los Angeles, Los Angeles, CA

Monica L. Wagner, MD – University of Cincinnati – Entered Pediatric Surgical Critical Care Fellowship, Children’s Mercy, Kansas City, MO

General Surgery Residents 2023-2024

First Year:

Jonathan T. Beyeler, MD – University of Mississippi
Colton G. Brown, MD – Medical College of Wisconsin
Emilie M. Buisson, MD – University of Cincinnati
Ryan P. Johnson, MD – University of Chicago
Megan A. Satyadi, MD – University of South Florida
Daniel R. Streetman, MD – Mercer University

Second Year:

Obieda “Obie” M. Atiyyani, MD – University of Louisville
Arti U. Machchhar, MD – University of Texas Southwestern
Allison N. Moore, MD – University of Colorado
Marissa A. Ray, MD – Wayne State University
Darren C. Turner, MD – University of Miami
Gregory C. Wetmore, MD – State University of New York – Upstate

Research:

Ellen Arndt Becker, MD – Medical College of Wisconsin
Aron P. Bercz, MD – University of Cincinnati
Michela M. Carter, MD – University of Cincinnati
Ryan C. Chae, MD – University of Cincinnati
Stephen J. Hartman, MD – University of California, San Diego
Kevin Kulshrestha, MD – University of Pennsylvania
Szu-Aun Lim, MD – East Carolina University
Catherine G. Pratt, MD – University of Vermont
Adam D. Price, MD – University of Cincinnati
Alyssa E. Stetson, MD – University of Massachusetts
Lindsey J. Wattley, MD – University of Cincinnati
Jenna N. Whitrock, MD – University of Missouri-Columbia

Third Year:

M. Ryan Baucom, MD – East Carolina University
Zishaan A. Farooqui, MD, PhD – University of Michigan
Paul H. McClelland, MD – Weill Cornell Medicine
Mordechai G. Sadowsky, MD – Wayne State University
Emily J. Schepers, MD – University of Missouri - Columbia
Stephanie Sisak, MD – Drexel University

Fourth Year:

Allison M. Ammann, MD – Texas Tech University
Aaron M. Delman, MD – Wayne State University
Kevin M. Turner, MD – Loyola University
Dennis M. Vaysburg, MD – Temple University
Taylor E. Wallen, MD – Central Michigan University

Chief Year:

Eileen C. Donovan, MD – University of Cincinnati
Michael E. Johnston, MD – Indiana University
Christen Salyer, MD – Indiana University
Kathleen E. Singer, MD – University of Massachusetts
Karthik Thangappan, MD – Thomas Jefferson University
S. Whitney Zingg, MD – University of Tennessee
Honors and Awards 2022-2023

Faculty:

[A total of 17 UC surgeons were included among *Cincy Magazine* Best Docs 2022, and 40 UC surgeons were named among *Cincinnati Magazine* Top Docs for 2023.]

Syed A. Ahmad, MD
Served as guest co-editor of the January 2023 issue of *Surgical Oncology Clinics of North America*. The issue was dedicated to clinical trials in surgical oncology.

Victor F. Garcia, MD
Received the Beacon of Light Humanitarian Award from the Lighthouse Youth & Family Services.

Aaron P. Garrison, MD
Received the Clinical Care Achievement Award.

Michael D. Goodman, MD
Named the Dario Rodriguez, Jr. Endowed Chair in Trauma Surgery.
Awarded a CCTST award for studying early serum markers in predicting trauma patient outcomes.

Alicia A. Heelan, MD
Received the pilot project award at the UCCC Research Retreat.

Tammy M. Holm, MD, PhD
Won the 2023 ThyCa: Thyroid Cancer Survivors’ Association Award for Thyroid Cancer Research from the American Association of Endocrine Surgeons. The $20,000 grant will support her basic science research.

Meera Kotagal, MD, MPH
Named one of four UC Center for Clinical and Translational Science and Training new K Scholars for 2023.

Deepak G. Krishnan, DDS, FACS
Won election to the Board of Directors of the American Board of Oral and Maxillofacial Surgery.
Received the Distinguished Service Award of 2023 from the International Association of Oral & Maxillofacial Surgeons.

Sameer H. Patel, MD
Inducted into the Alpha Omega Alpha Honor Medical Society.

Nilesh N. Patil, MD
Senior author of Best Poster Award at the North Central Section Meeting of the American Urological Association.

James A. Phero, DDS, MD
Elected as the next director of the American Dental Society of Anesthesiology.

Courtney A. Plattner, MD
Inducted into the Alpha Omega Alpha Honor Medical Society.

Timothy A. Pritts, MD, PhD
Elected to the Board of Governors of the American College of Surgeons.
Obtained funding from the Department of Defense in the amount of $5 million for two grants related to the study of whole blood.

Chief Master Sergeant Dario Rodriguez Jr.
Posthumously awarded the Distinguished Service Award at the 2022 Military Health System Research Symposium.

Beth Rymeski, DO
Appointed Associate Surgical Director for the Cincinnati Fetal Center.

Aaron P. Seitz, MD
Outstanding Surgical Educator Award for 2022-2023.

Shimul A. Shah, MD
Named as Vice Chair for the UNOS Liver Intestine Committee for 2023-2025 and will become Chair in 2025.
Named as Treasurer of the Americas Hepato-Pancreatico-Biliary Association for 2023-2025 and will serve on the Executive Council for the next five years.
Named as Chair of the Committee of Trustees and Governance for the UC Foundation Board starting in October 2023.
Serving as Guest Editor of *Surgical Clinics* (formerly *Surgical Clinics of North America*) and an issue devoted to Liver Transplantation and Transplant Oncology.
Elizabeth A. Shaughnessy, MD, PhD
Accepted into the Southern Surgical Association.

Sandra L. Starnes, MD
Selected as Vice Chair of the Thoracic Surgery Review Committee by the ACGME.
Elected as Vice Chair of the Membership Committee of the Society of Thoracic Surgeons.

Jonathan R. Thompson, MD
Awarded the 2023 Fire Award for Startup of the Year -- Standard Bariatrics Inc.

Robert M. Van Haren, MD, MSPH
Winner (with associates from the UC Health Physician Liaison Program) of the Fall 2022 UC Health Business Center Team PRIIDE award.
Elected as Vice-Chair of the Protocol Monitoring and Review Committee at the UC Cancer Center.

E. Steve Woodle, MD
Winner of the 2022 Clinical Trialist of the Year Award from the UC College of Medicine.

Paul W. Wales, MD
Received a Canadian Institutes of Health Research (CIHR) Award, which is similar to the NIH R01 award.

General Surgery Residents:

Betzaira Childers, MD
2023 Arnold P. Gold Foundation’s Humanism in Excellence Teaching Award.

Eileen Donovan, MD
2023-2024 GME Residency Advisory Committee Resident Representative.
Inducted into the Alpha Omega Alpha Honor Medical Society.

Al-Faraaz Kassam, MD
2023 Arnold P. Gold Foundation’s Humanism in Excellence Teaching Award.
2022-2023 Department of Surgery Best Teaching Resident Award, as voted by medical students during the third-year Surgery Clerkship.
2022-2023 Robert H. Bower Administrative Chief Resident.
2022-2023 Josef E. Fischer Award.
Society of Laparoendoscopic Surgeons Resident Achievement Award.

Mackenzie Morris, MD
2022-2023 Max Zinninger Award.
2022-2023 GME Residency Advisory Committee Resident Representative.

Kevin Kulshrestha, MD
Winner, Department of Surgery Resident Research Competition – Clinical Research Section.

Christen Salyer, MD
2023-2024 Robert H. Bower Administrative Chief Resident.
2022-2023 James M. Hurst Trauma Resident of the Year Award.
Inducted into the Alpha Omega Alpha Honor Medical Society.

Stephanie Sisak, MD
Winner, Department of Surgery Resident Research Competition – Basic Science Section.

Mont Reid Surgical Society

The Mont Reid Surgical Society of the University of Cincinnati, founded in 1950, is composed of graduates of the general surgery training program who are active in encouraging professional fellowship among the alumni to advance the art and science of surgery. The Society assists the current resident staff and the Department through funding, lectures, symposiums, publications, and other programs.
Global Surgery Rotation

Michael D. Goodman, MD, Co-Director
Associate Professor of Surgery
Department of Surgery
University of Cincinnati College of Medicine
231 Albert Sabin Way (ML 0558)
Cincinnati, OH 45267-0558
513-558-5861

Jocelyn M. Logan, MD, Co-Director
Volunteer Assistant Professor of Surgery

Charles Park, MD, Co-Director
Adjunct Assistant Professor of Surgery

The University of Cincinnati Global Surgery Program, which was initiated in 2014, offers an 8-week elective General Surgery Rotation at Mzuzu Central Hospital in Malawi, Africa.

Our program emphasizes a partnership with our host institution to ensure that we are able to provide and enhance much-needed surgical services consistently over time in exchange for an unparalleled educational experience in General Surgery. Residents at the 3rd and 4th year level participate on rounds, run outpatient clinics, and perform basic and complex general and pediatric surgery cases throughout their time at Mzuzu Central Hospital under the supervision of ABS-certified general surgeons.

In addition to the clinical services provided, University of Cincinnati faculty and residents actively participate in educational programs for the Malawian clinical officers and nursing students in every aspect of patient care.

Mzuzu Central Hospital is a district hospital and referral center in the northern region of Malawi, serving a catchment area of approximately 2.5 million people. Residents perform over 100 operations in a 2-month period of time, including a plethora of pediatric, gastrointestinal, urology, and head and neck cases.

Vision
To improve access to quality surgical care in Malawi.

Mission
• To enhance surgical care and capacity in Malawi by utilizing senior U.S. surgical residents and consultants to support the infrastructure in place at Mzuzu Central Hospital.
• To provide shared learning experiences and unparalleled educational opportunities in a resource-challenged environment.
• To inspire a transformative approach to global health.

Core Values
• Excellence in clinical services provided.
• Respect for colleagues and staff at all levels.
• Compassion for patients and their families.
• Advocacy for those who are dedicated to improving healthcare worldwide.
Residency Program in Oral and Maxillofacial Surgery

Deepak G. Krishnan, DDS, FACS, Program Director
Professor of Clinical Surgery
Chief, Section of Oral and Maxillofacial Surgery
Department of Surgery

Yvonne Hawkins, Program Coordinator
Section of Oral and Maxillofacial Surgery
University of Cincinnati College of Medicine
200 Albert Sabin Way (ML 0461)
Cincinnati, OH 45219
513-584-2586
Yvonne.Hawkins@uc.edu

The oral and maxillofacial surgery residency training program at the University of Cincinnati is considered one of the oldest training programs of its kind in the country and celebrated its centennial mark in 2013. The program, which received its most recent full five-year accreditation in February 2022, offers training in treatment for facial trauma, surgical reconstruction of skeletal deformities, pediatric oral and maxillofacial surgery, pathology of the oral and maxillofacial regions, facial aesthetic surgery, temporomandibular joint surgery, dento-alveolar surgery and ambulatory anesthesia.

The Section of Oral and Maxillofacial Surgery offers a four-year certificate program whose principal goal is the training of residents to practice the broad scope of oral and maxillofacial surgery and to become qualified and prepared to successfully pass the American Board of Oral Maxillofacial Surgery examination and obtain Diplomate status. Our resident OMSITE (Oral and Maxillofacial Surgery In-service Testing Examination) scores are consistently very competitive with the national average.

The Section hosts oral and maxillofacial surgery, oral and maxillofacial prosthodontist, oral and maxillofacial pathology, oro-facial pain and TMD, and affiliates in craniofacial orthodontics through the Cincinnati Children’s hospital.

Oral and maxillofacial surgery provides patient care at University of Cincinnati Medical Center, Cincinnati Children’s Hospital, Veteran’s Affairs Medical Center, and West Chester Hospital, and draws patients from the entire tristate area and beyond.

Oral and maxillofacial surgery bridges medicine and dentistry, and training requires exposure to general surgery, otolaryngology, plastic and reconstructive surgery, internal medicine and anesthesia, among other specialties. Some rotations such as anesthesia are extensive for six months with emphasis on pediatric anesthesia, while some rotations such as the cleft lip and palate surgery rotations in India are more peripheral and intended to expose the resident to this surgery, but not train to competency certification.

Residents are also encouraged to engage in an active clinical or bench research project that should culminate in presentation of an abstract at a national forum and publication of the findings in a peer-reviewed journal. Oral and maxillofacial surgery residents and faculty have presented their research findings at the national meetings of the American Association of Oral and Maxillofacial Surgeons (AAOMS), the International Conference of Oral and Maxillofacial Surgeons (ICOMS), and other local and regional forums.

Currently, the section is engaged in research pertaining to the cost burden of managing facial trauma to our community, 3D planning and printing for personalized maxillofacial surgery, long-term outcomes for patients receiving full mouth extractions, bicarbonate buffered lidocaine in the presence of odontogenic infections, and the prevalence of psychiatric illness in patients undergoing outpatient Oral and Maxillofacial Surgery procedures. The Section of Oral and Maxillofacial Surgery at UC also hosts the annual intern boot camp that trains all the incoming OMS residents from the residencies in Ohio, Kentucky, Illinois and Indiana.

Our residents and faculty serve on local, regional, national and international committees and influence policy making as it relates to training and education of oral and maxillofacial surgeons.
Residency Program in Plastic, Reconstructive and Hand Surgery

Ann Schwentker, MD, Program Director
Professor of Surgery
Division of Pediatric Plastic and Craniofacial Surgery
Cincinnati Children's Hospital Medical Center

Kristen Merkhofer, Program Coordinator
Department of Surgery
Section of Plastic, Reconstructive and Hand/Burn Surgery
University of Cincinnati College of Medicine
231 Albert Sabin Way (ML0558)
Cincinnati, OH 45267-0558
513-558-4363
merkhokn@ucmail.uc.edu

Oral and Maxillofacial Surgery Residents 2023-2024

First Year:
Hunter Boone, DDS – University of North Carolina School of Dentistry
Tyler Deitrick, DDS – University of North Carolina School of Dentistry
Grant Gullion, DDS – University of Iowa College of Dentistry
Zachary Stott, DDS – University of Washington School of Dentistry

Second Year:
Alexander Doye, DDS – Virginia Commonwealth University School of Dentistry
Trevor Liljenquist, DDS – Ohio State University College of Dentistry
Isaac So, DDS – University of Washington School of Dentistry

Third Year:
Alec Bankhead, DMD – East Carolina University School of Dentistry
Logan Herm, DDS – Marquette University School of Dentistry
Soroush Samimi, DMD – Tufts University School of Dental Medicine

Fourth Year:
Maria Deleonibus, DMD – Case Western Reserve University School of Dental Medicine
Thomas Inman, DDS – University of Tennessee College of Dentistry
Skyler Williams, DMD – University of Alabama at Birmingham School of Dentistry

The Division of Plastic Surgery faculty are committed surgeon educators who have developed an expanded educational environment to help fulfill their mission of providing the best training experience. With the wide variety and volume of clinical opportunities available at the Cincinnati Children’s Hospital Medical Center, University of Cincinnati (UC) Medical Center, UC West Chester Hospital, and in the surrounding community, the division provides excellent educational content for students and residents while delivering first-rate patient care and providing opportunities for collaborative efforts for both clinical and basic science research in plastic surgery.

Although each member of the division has unique areas of interest and expertise, our major strengths are our core values of teamwork, dedication to excellence, and ability to work as a cohesive group. The faculty surgeons are dedicated to providing an environment for training plastic surgeons within the entire spectrum of plastic surgery.

The division provides training in the integrated pathway in plastic surgery training as well as the independent pathway. The integrated program continues to evolve with more intensive plastic surgery and plastics-related rotations earlier in the training schedule for junior residents. The rotations, progression, knowledge, skill and responsibility vary according to the pathway and the individual; however, the ultimate level of proficiency and dedication to core values is the same for all residents. Two month-long content-based rotations during the senior years give the residents an in-depth exposure to the preoperative evaluation of new patients, surgical planning, care in the operating room, and both inpatient and outpatient postoperative care. Senior residents are on call an average of every 6th night.

The Division of Plastic Surgery has used the ACGME’s Milestones” program for the evaluation of residents, in combination with faculty evaluations, 360 evaluations, surgical skills evaluations, and review of case logs, research and professionalism by the Clinical Competency Committee. The residency programs have both received continued accreditation from the ACGME.
Conferences

- Monday 5:00-6:00 p.m. – Plastic Surgery Curriculum Conference with attending participation directed by Dr. Uzair Qazi, Associate Program Director. The full spectrum of plastic surgery is covered in a rotating three-year schedule.
- Wednesday 7:00-8:00 a.m. – Weekly Pre-op Conference
- Wednesday 8:00-9:00 a.m. – Weekly Grand Rounds or monthly M&M
- Thursday or Friday morning – In-Service Prep and Review
- Combined Ortho/Plastics conference 2nd and 4th Friday of month. Hand education is also organized in a rotating two-year schedule.
- Journal Club 6:30-8:30 p.m. – Last Thursday of each month, quarterly on Wednesday morning in place of Grand Rounds.

Conference schedules are published at the beginning of the year to allow for individuals to plan ahead.

- Residents read the selected articles, Plastic Surgery Education Network modules, and review old in-service questions pertinent to each topic prior to Curriculum, Hand, In-Service Prep, and Plastic Surgery Case Review conferences.

- For Pre-Op Conference, residents are expected to know pertinent clinical details about patients scheduled for operation on their rotation. Residents are asked questions about operative decision-making, alternate options for treatment, and other aspects of patient care.

- Presentation skills are a critical part of plastic surgery education. These skills are acquired by frequent practice. Additionally, the study of one particular topic of interest by reviewing the literature teaches how to research and effectively present new information. In accordance with these goals, the weekly grand rounds conference will consist of both resident and faculty presentations.

- Each plastic surgery resident is required to give a 30-minute formal Grand Rounds presentation. Senior residents present three times a year, while junior residents present two times per year.

- Plastic Surgery M & M conference occurs monthly at our Wednesday morning conference time. The General Surgery M & M case is determined by the faculty the week before, and is presented by the faculty member and resident involved in the M & M.

- Research conference occurs one Wednesday per quarter. During this conference, residents update the division on their research progress. Any abstracts or posters selected for presentation at national meetings will also be presented during this conference. This coordinates with regular Wednesday pre-op/Grand Rounds.

- The remaining conferences are faculty lectures on different topics and include full-time faculty, volunteer faculty, visiting professors, and non-plastic-surgeon faculty.

Cadaver Lab

Cadaver dissections are planned quarterly to supplement and reinforce topics covered in the didactic sessions.

Resident Cosmetic Clinic

The senior residents see patients presenting for the full spectrum of aesthetic concerns at the Holmes Hospital, staffed by Dr. Schwentker and Dr. Gobble. Those patients electing surgery are presented both pre- and post-operatively at Pre-Op Conference so that the entire group can learn and continuity of care is preserved.

Injectables

Residents gain experience with safe use of cosmetic injectables evaluating patients in the resident cosmetic clinic at Holmes Hospital, with injections performed in clinic at the MAB and during quarterly conferences staffed by Dr. Schwentker at the Children's Hospital.

Micro Lab

Microscopic laboratory sessions are planned at least quarterly to allow hands-on experience with microsurgical techniques utilizing in vivo and in vitro models. There is now a fully functional operating microscope in the conference room for dry lab practice.

Research, Publications, and Travel

Scholarly activity of both attendings and residents is an important component of our division. Each attending and resident shares some responsibility for their own education and to contribute to the betterment of the specialty. Engagement in research activity is mandatory and will be considered for promotion and ultimate completion of the residency.

Residents in every year are expected to make significant progress in a selected research project each academic year. Residents in the senior years are expected to submit an abstract for presentation and/or a paper to a peer-reviewed journal each academic year.
With prior planning, expenses for resident travel to meetings will be paid if the resident is presenting at the meeting. All residents are required to submit an abstract to the Ohio Valley Society of Plastic and Reconstructive Surgeons every year.

Residents submit biannual written research reports which are reviewed by Dr. Schwentker to help ensure projects are appropriate and progressing. Research is presented during Grand Rounds twice a year. All residents participate in an annual Q-I project under the direction of Dr. Schwentker.

Clinical Support

Physician assistants and/or nurse practitioners at all locations are an integral part of the health care team, helping to decrease service obligations and maximize education.

Residents as Teachers

The residents supervise and instruct junior learners in graduated and progressive fashion which allows our residents to consolidate valuable teaching skills. The division educates UC and visiting medical students as well as rotating residents from ENT, OMFS, Ortho, Ophthalmology, Podiatry, Urology, and outside programs. We have instituted a Junior Resident Skills Checklist to track knowledge and skills acquired during the plastic surgery rotation. This serves as a useful metric to the home program and determines when junior residents are able to perform consults and minor procedures without direct supervision.

Recruitment

Both residency programs are highly competitive and have been successful in matching well-qualified applicants. The program is known for the breadth of education and the close working relationships among residents and between staff and residents.

Placement

The residents have been successful in matching into top plastic surgery fellowships in hand, microsurgery, and craniofacial surgery over the past 10 years. Residents entering practice directly have been highly sought after and have successfully found positions throughout the United States.

Plastic, Reconstructive and Hand Surgery Residents 2023-2024

Independent Program:

PGY-6: Justin Puthoff, MD
Medical Degree: University of South Carolina
General Surgery Residency: University of Oklahoma - Tulsa

PGY-7: Henry Huson, MD
Medical Degree: Florida State University
General Surgery Residency: Louisiana State University

PGY-8 (Chief): Liann Casey, MD
Medical Degree: St. George’s University School of Medicine
General Surgery Residency: Jackson Memorial Hospital

Integrated Program:

PGY-1: Nathan Lawera, MD – University of Cincinnati
PGY-2: Kelly Spiller, MD – Wright State University
PGY-3: Sydni Meunier, MD – Loyola University - Chicago Stritch School of Medicine
PGY-4: Nathaniel Roberson, MD – University of Cincinnati
PGY-5: Maleeh Effendi, MD – Texas Tech University
PGY-6 (Chief): Joseph Easton, MD – Indiana University
Residency Program in Urology

Courtney Plattner, MD, Program Director
Assistant Professor of Surgery

Violisha Chaney, Program Coordinator
Department of Surgery, Section of Urology
University of Cincinnati College of Medicine
231 Albert Sabin Way (ML0589)
Cincinnati, OH 45267-0589
513-558-3678
violisha.chaney@uc.edu

The urology residency program continues to sustain the optimal case volume in the nation for resident surgical experiences in several procedural and surgical care areas. Most notable of these are all forms of minimally invasive endoscopic procedures and female incontinence procedures.

The urology program is a five-year program with rotations at the Veterans Affairs Medical Center, Good Samaritan Hospital, Children's Hospital Medical Center, University of Cincinnati Medical Center, and West Chester Hospital. Four years of adult urologic surgical training are complemented with six months of training in all forms of pediatric urologic surgery and six months of general surgery.

Recent changes in faculty have fine-tuned our laparoscopic, robotic and female urologic capabilities. As a result, the residents benefit by increased skill upon completion of the program. Residents completing our program historically have had no difficulty being accepted in fellowship programs or developing successful careers in urologic surgery.

Residents whose submitted papers are accepted for presentation at a national or sectional meeting are given funding to attend the meeting. Annually, at the state level, all residents in the program are encouraged to attend the Ohio Urological Society meeting where they are exposed to the expertise of nationally known urologists and issues of managed care and reimbursement.

Conferences

Regularly held conferences include: Morbidity and Mortality, Indications Conference, weekly didactic lectures, adult and pediatric journal clubs, and a pediatric lecture series. Urology has a monthly tumor board meeting in conjunction with Radiology, Oncology, Radiation Oncology, and Pathology.

Urology Visiting Professors

Three times each year, visiting professors meet with faculty and residents (normally twice a year the adult urology interests are addressed and once per year the pediatric area). We also host numerous “visiting” professors from departments within the college who guest lecture at the regularly scheduled weekly urologic educational conferences.

Urology Residents 2023-2024

First Year:
Fernando Blank, MD – University of Cincinnati
Aaron Zhang, MD – School of Medicine at Hofstra/Northwell

Second Year:
Brian Douglas, MD – St. Louis University
Mahmoud Elhagagy, DO – New York College of Osteopathic Medicine

Third Year:
Christopher Anglin, MD – University of Louisville
Rajiv Karani, MD – University of Cincinnati

Fourth Year:
Anirudh Guduru, MD – Saint Louis University
Brandon Mudd, MD – University of Louisville

Fifth Year:
Monzer Haj-Hamed, MD – Northeastern Ohio Medical University
Justin Streicher, MD – University of Cincinnati

Honors and Awards (Residents):

Outstanding Achievement Award:
Daniel Lama, MD

Art Evans Award:
Anirudh Gudurud, MD

Faculty Teaching Awards

Educator of the Year:
Mohamed Kamel, MD Wesley Baas, MD

Michael Daugherty, MD (Cincinnati’s Children’s)

Neil Frankl Award:
Lando Parr, RN
The Cincinnati Children's Hospital Medical Center, Department of Surgical Services, Division of Pediatric Urology, sponsors the Pediatric Urology Fellowship program. The fellowship is fully accredited by the ACGME. The goal of the fellowship is to prepare our trainees for a career as an academic surgeon. The fellowship meets the American Board of Urology requirements to allow graduates to apply for the Certificate of Added Qualifications (CAQ) in Pediatric Urology.

This fellowship program covers a full complement of pediatric urologic issues with particular attention to the areas of genitourinary reconstructive surgery (including microsurgical techniques), laparoscopic and robotic assisted surgery, uro-oncology and fetal urology. The majority of the fellowship-related clinical activity takes place at the Cincinnati Children's Hospital Medical Center. The program has one or two fellows (we accept one fellow each year) for the duration of two years.

The fellowship comprises 12 months of inpatient and main operating room time, 6 months of outpatient surgery, general urology clinics, and multidisciplinary clinics, as well as 6 months of dedicated research time. Specialty and multidisciplinary clinics include the Urogenital Reconstruction Center, the Healthy Bladder Clinic, the Pediatric Stone Center, the Fetal Care Center, the Disorders of Sexual Differentiation Clinic, and a weekly continuity clinic in the Myelomeningocele Clinic. The fellows also spend time in the outpatient surgery center at the Liberty campus.

The research year offers opportunities in basic science or clinical research related to the genitourinary tract. We offer a Pediatric Urology Basic Science Lab under the direct mentorship of Elizabeth Mann, PhD. Other research opportunities include clinical and outcomes research, quality improvement, and bioinformatics. The fellow may also take up to 4 weeks of electives on Pediatric Nephrology, Pediatric Surgery, Pediatric Gynecology, Neonatal Intensive Care Unit, Colorectal Surgery, or Radiology. During the two-year fellowship, the fellow will also have the ability to audit courses in the University of Cincinnati MPH program.

The fellowship has a strong emphasis on didactics. Our conference schedule is below.

### Conferences
- Pediatric Urology Grand Rounds (monthly)
- Challenging Case Management Conference (monthly)
- Pediatric Urology Journal Club (monthly)
- Complex Clinic New Patient Case Conference (monthly)
- Nephrology/Transplant/Urology Case Conference (monthly)
- Colorectal/Urology Conference (monthly)
- Morbidity and Mortality Conference (monthly)
- Disorders of Sexual Differentiation (monthly)

### Current Fellows
- **Kiersten Craig, MD, MSE**
  New York Presbyterian Weill Cornell (Urology Residency)
- **Paul Campbell, MD**
  Naval Medical Center San Diego (Urology Residency)
- **J. Hogan Randall, MD**
  University of Kansas Medical Center (Urology Residency)
Pediatric Surgery Fellowship

Aaron P. Garrison, MD, Program Director
Associate Professor of Surgery
Division of Pediatric General and Thoracic Surgery
Cincinnati Children’s Hospital Medical Center

Gregory M. Tiao, MD, Associate Program Director
Professor of Surgery
Division Director, Pediatric General and Thoracic Surgery
Cincinnati Children’s Hospital Medical Center

Meghan Wiesner, Program Coordinator
Pediatric General and Thoracic Surgery
Cincinnati Children’s Hospital Medical Center
3333 Burnet Avenue, MLC 2023
Cincinnati, OH 45229
513-803-9226
meghan.wiesner@cchmc.org

The division of Pediatric Surgery offers a two-year Residency (Fellowship) in Pediatric Surgery. One new resident is chosen each year through the National Resident Matching Program. To date, over 50 Pediatric Surgery Residents have been trained in the division. The Pediatric Surgery Residency at Cincinnati Children’s Hospital is one of the more renowned programs in the United States. The program matches one resident each year for a two-year position after completion of a General Surgery Chief Residency.

During the training period, the resident assumes graded responsibility and is exposed to the entire spectrum of pediatric surgery, including trauma, neonatal surgery, transplantation, bariatric surgery, extracorporeal membrane oxygenation, fetal intervention, and advanced anorectal reconstruction.

The Division of Pediatric Surgery includes 18 full-time pediatric surgeons, 4 PhD researchers, 16 nurse practitioners, general surgery residents from three different programs in Cincinnati, and medical students.

The operating room is one of the busiest in the country with over 35,000 cases performed annually. The emergency department evaluates over 100,000 patients each year. Each resident completes approximately 1,000 pediatric surgery cases during their residency. In addition to training the categorical pediatric surgery fellows (residents), the division offers training experiences in Trauma/Surgical Critical Care, Fetal Surgery, Colorectal Surgery and Vascular Malformations/Oncology within the construct called the Subspeciality Fellowship program. Additionally, there are opportunities to perform basic science research in bench work labs led by clinician scientists (Helmrath, Peiro, Bondoc and Tiao) and PhD researchers (Timchenko and Shin). We recently have begun a Global Health/Outcomes focused research fellowship led by Dr. Meera Kotagal.

Within our Subspecialty Fellowship Program, there is the option to obtain a Master’s Degree from the University of Cincinnati. This option, if approved by the program education committee, would coincide with the clinical fellowship and is supported by the division. This option requires a two-year commitment which would include clinical and Master’s Degree work.

The Master’s degree programs that we offer are:

- Master of Science in Clinical Research, including two optional focus areas:
  1. Clinical Epidemiology/Clinical Effectiveness
  2. Clinical Trials
- Master of Education for Physicians and Other Health Care Professionals
- Master of Public Health

We also offer a two-year experience for an International Fellow as well as a one- or two-year training experience in Extracorporeal Membrane Oxygenation (ECMO).

Conferences

- Morbidity/Mortality (weekly)
- Tumor Board (weekly)
- Pediatric Surgical Grand Rounds (weekly)
- Radiology/Surgery Conferences (bi-weekly)
- Trauma M&M (monthly)
- Transplant M&M (quarterly)
- Fetal M&M (quarterly)
- Trauma Case Review (monthly)
- Transplant Selection/Management (weekly)
- Pathology (Quarterly)

Pediatric Surgery Fellows, 2022-2023

Laura Galganski, MD – Senior Fellow
MD – University of Louisville School of Medicine

Byron Hughes, MD – Junior Fellow
MD – Georgetown University School of Medicine
Advanced Training Program in Cardiothoracic Surgery

Sandra L. Starnes, MD, Program Director
Professor of Surgery
Chief, Section of Cardiothoracic Surgery
Director, Division of Thoracic Surgery

Robert Van Haren, MD, Associate Program Director
Assistant Professor of Surgery
Division of Thoracic Surgery

Andrea Anderson, C-TAGME, Program Coordinator
Department of Surgery
Division of Thoracic Surgery
University of Cincinnati College of Medicine
231 Albert Sabin Way (ML0558)
Cincinnati, OH 45267-0558

Applications for the thoracic surgery residency training program can be obtained from the following address:

National Residency Match Program 2501 M Street Northwest, Suite 1
Washington, DC 20037-1307
Phone: 202-828-0676
http://www.nrmp.org

Integrated Cardiothoracic Residency Program

Our integrated 6-year (I-6) program provides six years of training after completion of medical school, with one resident starting each year. Our program, which started in 2014, is one of 34 in the country. Our program provides balanced education in all aspects of cardiothoracic surgery, with an emphasis on minimally invasive procedures. Our goal is to develop, train and mentor the next leaders in cardiac and thoracic surgery.

In collaboration with the Department of Surgery, residents rotate through general surgery, surgical oncology, vascular surgery, transplant surgery, pediatric surgery, critical care, trauma surgery, cardiac surgery, and thoracic surgery during the first three years of the program to establish strong fundamentals of surgical practice. During the last three years, the residents are educated in all aspects of cardiothoracic surgery including adult cardiac surgery, general thoracic surgery and congenital cardiac surgery, resulting in well-rounded and independent thoracic surgeons. Additionally, the trainees have dedicated rotations in echocardiography, cardiac catheterization, interventional pulmonary and cardiothoracic critical care.

Applicants for our ACGME-accredited advanced training programs in cardiothoracic surgery are selected through the National Resident Matching Program (NRMP).

Clinical Rotations

Adult Cardiac Surgery

The primary adult cardiac surgery experience is at the University of Cincinnati Medical Center (UCMC). Our residents gain experience, and develop expertise in all aspects of cardiac surgery, including coronary revascularization, valvular heart disease, thoracic aortic disease and surgery for heart failure including heart transplantation, short-term and long-term mechanical circulatory support, and Extracorporeal Membrane Oxygenation (ECMO). There is a robust experience with off-pump coronary artery bypass, total arterial bypass grafting and minimally-invasive cardiac surgery, including minimally-invasive coronary bypass. In addition, residents gain experience with modern endovascular procedures including transcatheter aortic valve replacement (TAVR), mitral clip and thoracic endovascular aortic repair (TEVAR) and transcatheter mitral valve procedures.

Our residents also rotate at a community cardiac center, the Christ Hospital. This site provides exposure to a high-volume community cardiac surgery program with faculty that are dedicated to resident education. In addition, this rotation provides a unique experience with a high volume of robotic cardiac procedures, including valve surgery and coronary revascularization.
General Thoracic Surgery

During the thoracic surgery rotation, residents are trained in all aspects of general thoracic surgery and thoracic oncology, including benign and malignant lung and esophageal diseases, airway diseases and mediastinal tumors. The general thoracic rotation has a focus on advanced minimally-invasive techniques such as thoracoscopic (VATS) and robotic lobectomy for lung cancer, minimally-invasive esophagectomy, and robotic mediastinal resections. Residents are also trained in advanced airway and esophageal endoscopic procedures such as laser interventions, stent placement and management, and endobronchial ultrasound (EBUS).

Congenital Heart Surgery

Residents rotate on the congenital cardiac surgery service at Cincinnati Children’s Hospital Medical Center, a world leader in the management of congenital heart disease. They are an integral part of the team during preoperative planning, intraoperative surgical management and postoperative care of neonates, infants, children, teenagers and adults across the entire spectrum of congenital heart disease. There are cutting edge programs for end-stage heart and lung failure, including heart and lung transplant programs and mechanical circulatory support programs. In collaboration with the solid organ transplant program, heart/liver and heart/kidney transplants are performed in patients with extrathoracic multiorgan failure.

In collaboration with the Aerodigestive Center at Cincinnati Children’s, the division has the world’s most extensive experience with complex tracheal reconstruction in infants and children. Cincinnati Children’s consistently ranks among the top in the nation for cardiology and heart surgery as measured by U.S. News & World Report.

Education

The thoracic residency has a robust didactic program. A structured weekly cardiothoracic teaching conference using a case-based approach covers all topics included in the Thoracic Surgery Core Curriculum and utilizes the Society of Thoracic Surgeons on-line learning management system. In addition, we have a monthly debate-style journal club, monthly mini-mock oral examinations, and morbidity and mortality conference.

Residents participate in a structured simulation program quarterly, with sessions for open and thoracoscopic lobectomy, chest wall resection, tracheal resection, sleeve lobectomy, esophageal anastomotic techniques, coronary artery bypass, valve repair/replacement, and robotics.

Cardiothoracic Surgery Residents 2023-2024

PGY1:
Nicole Kaley, MD – Creighton University

PGY2:
Valeria V. Farias, MD – SUNY Downstate

PGY3:
Keaton Cooley, MD – University of California, Irvine

PGY4:
John Kennedy, MD – University of Central Florida

PGY5:
Emily R. Wright, MD – University of Cincinnati

PGY6:
James A. Miller, MD – University of Buffalo
The University of Cincinnati College of Medicine Abdominal Multi-organ Transplant fellowship enrolled its inaugural fellow in 1969, and since that time has graduated a total of 46 fellows. The program is accredited through the American Society of Transplant Surgeons (ASTS) and the Transplant Accreditation & Certification Council (TACC). Our fellowship employs three fellows (matching 2 and 1 on alternate years).

The fellowship consists of two clinical years of training in liver, kidney, and pancreas transplantation including broad exposure to both multi-organ deceased donor procurements and live donor operations. Fellows also receive extensive training in hepatobiliary and complex vascular access surgery. Additionally, they have a fully integrated experience in pediatric transplantation at Cincinnati Children's Hospital Medical Center. The fellows become proficient in not only the surgical aspects of transplantation, but also in the clinical management of the routine and complex transplant patient.

The philosophy of our transplant faculty is to treat the transplant fellow like a junior partner. Fellows are given graded responsibility not only in the operating room, but also in the clinical management of the transplant, hepatobiliary, and vascular access patients.

Abdominal Multi-Organ Transplant Fellowship Training Program

The UC College of Medicine and Cincinnati Children’s Hospital Medical Center offer a two-year accredited fellowship in congenital cardiac surgery. We are one of only 16 programs in the country accredited by the ACGME, leading to eligibility for subspecialty certification in Congenital Cardiac Surgery by the American Board of Thoracic Surgery. Our fellows receive intensive training in all aspects of congenital heart surgery including heart and lung transplantation.

The division performs over 600 cardiac surgeries annually. Cincinnati Children’s Hospital consistently ranks among the top programs in the nation for cardiology and heart surgery as measured by U.S. News & World Report Best Children’s Hospitals.

Applications for the fellowship can be found at: http://www.tsda.org/the-tsda/congenital-match.

Current Fellows

Kyle Riggs, MD
Medical School – University of Missouri School of Medicine
Residency – Hofstra School of Medicine – Northwell Health
Most fellows become independent in performing the multi-organ procurement operation within the first few months of fellowship training, and virtually all fellows perform the entirety of the liver and kidney transplantation operation within the first six months of their fellowship. The transplant surgery fellow leads the inpatient care of all transplant patients at University of Cincinnati Medical Center. All recipients within their first year of transplant are cared for by the Transplant Surgery service, which consists primarily of attending surgeons, surgery fellows, mid-level providers, surgical residents, and medical students. Structured multidisciplinary rounds are made by the Transplant Surgery service daily. These rounds are led by the transplant surgery fellows with guidance and support provided by transplant surgery faculty. Leadership skills are quickly developed as the fellows coordinate the multidisciplinary team and oversee the daily management of our transplant patients. Fellows also participate in outpatient clinics, which include the pre-transplant evaluation of liver, kidney, and pancreas transplant recipients, as well as the routine post-operative care of these patients. Fellows also attend hepatobiliary and vascular access clinics from which elective cases are scheduled. This allows them the opportunity to participate in preoperative planning and continued outpatient management of these patients. Fellows participate in weekly multidisciplinary conferences for kidney, liver, pancreas, and hepatobiliary. They are responsible for presenting the inpatients, operations and complications. These conferences are attended by transplant surgeons, transplant hepatologists and transplant nephrologists, nurse practitioners, social workers, pharmacists, ethicists, dieticians, coordinators, and anesthesiologists.

Conferences
Multiple teaching conferences supplement the fellowship experience. Transplant Grand Rounds occur monthly. Weekly fellows’ conferences are held serving two main goals: (1) pre-operative conference to review cases for the following week; (2) rotation of six different themes – Journal Club, pathology review, liver topic review, kidney topic review, organ offer turn down conference, and live donor liver transplantation surgical planning. Transplant lecture series occurs weekly and a bi-monthly regional transplant fellows conference is held to learn alongside our regional partners.

2022-2023 Visiting Speakers
September 14, 2022

Fifteenth Annual Heekin Family Lectureship
Abhinav Humar, MD, PhD, FACS
Thomas E. Starzl Professor in Transplantation Surgery
Clinical Director, Thomas E. Starzl Transplantation Institute
Division Chief, Transplant Surgery
University of Pittsburgh Medical Center
Surgical Grand Rounds: “Changing the Paradigm of Living Donor Liver Transplant – The UPMC Experience”

Transplant Grand Rounds Guest Lecturers:
Tetsuro Sakai, MD, PhD, MHA, PASA
Vice Chair for Professional Development
Professor, Anesthesiology and Perioperative Medicine
Professor, Clinical and Translational Science Institute
University of Pittsburgh

Veronica Loy, DO
Associate Professor of Medicine - Transplant Hepatology
Interim Program Director, Abdominal Transplant
Medical Director, Liver Transplantation
Medical Director Transplant Clinics
Medical College of Wisconsin

Anji Wall, MD PhD
Abdominal Transplant Surgeon
Baylor Scott & White Health

Jacqueline Garonzik Wang, MD, PhD
Associate Professor
Surgical Director of UW Health Kidney Transplant Program
University of Wisconsin

Constance M. Mobley, MD, PhD
Associate Surgical Director of Liver Transplantation
Medical Director of Surgical & Liver ICU
Houston Methodist

Filza Hussain, MD
Clinical Associate Professor
Associate Program Director, Consultation-Liaison Fellowship
Stanford Health Care
Transplant Surgery Fellows 2023-2024

First Year:
Olanrewaju Adeboja Oletta, MD
Residency 1 – University of Illinois at Chicago, Metropolitan Group Hospitals – Surgery
Residency 2 – Rutgers Robert Wood Johnson Medical School – Surgery
Alana Hofmann, MD
Residency – University of Central Florida/HCA Consortium, Ocala, Florida

Second Year:
Lucas Ermani, MD
Medical School: Universidade Federal de Ciências da Saúde de Porto Alegre (UFCSPA)
Gastrointestinal Surgery Residency: Universidade de São Paulo (USP)/Hospital das Clínicas – Faculdade de Medicina da Universidade de São Paulo (HC-FMUSP)
Fellowship: Jackson Memorial Hospital / University of Miami – Transplant Surgery Critical Care
Fellowship: Universidade de São Paulo – Liver Transplantation

Surgical Critical Care Fellowship

Krishna Athota, MD, Program Director
Associate Professor of Surgery, Section of General Surgery

Michael D. Goodman, MD, Associate Program Director
Professor of Surgery, Section of General Surgery

Elizabeth Loechle, Program Coordinator

loechleh@ucmail.uc.edu

The one-year ACGME accredited surgical critical care fellowship program encompasses all aspects of care of the critically ill surgical patient, with emphasis on cardiopulmonary mechanics, principles of resuscitation, and mechanical ventilation. University of Cincinnati (UC) Medical Center is the primary teaching facility for the surgical critical care fellowship. It is the tertiary referral hospital for southern Ohio, eastern Indiana, and northern Kentucky, serving a population of over 2 million with over 80,000 emergency department visits annually. The hospital serves as the region’s only academic medical center and maintains the only verified adult Level 1 trauma center and adult burn center for the regions of Southwest Ohio, Eastern Indiana and Northern Kentucky.

UC Medical Center has approximately 116 adult critical care beds, distributed through the surgical, medical, neuroscience, and cardiovascular intensive care units. The SICU consists of 34 adult beds with 150-180 monthly admissions from all surgical specialties, including trauma, general surgery, transplantation, surgical oncology, vascular surgery, urology, orthopedic surgery, thoracic surgery, obstetrics/gynecology, and otorhinolaryngology. Daily multidisciplinary rounds are collaborative in nature, with input and discussion from all team members, including respiratory therapists, pharmacists, and nurses.
Subspecialty services such as nephrology, infectious disease, rehabilitation medicine, cardiology, and hematology are available and consulted as needed. Additional clinical support in the SICU includes nutrition services, nurse educators, and dedicated SICU social workers. The SICU at UC Medical Center serves as a critical care educational venue for residents not only from numerous specialties but also from other local and regional institutions.

Other required critical care rotations include the Neuroscience Intensive Care Unit, Cardiovascular Intensive Care Unit, Medical Intensive Care Unit, and the Pediatric Intensive Care Unit at Cincinnati Children’s Hospital Medical Center. The NSICU is a 20-bed unit with neurosurgical admissions following tumor and skull base surgery, spine surgery, advanced neurovascular interventions, and traumatic brain injury. As the region’s stroke center, patients undergoing state-of-the-art therapy for stroke, seizures, and other neurologic diseases are also cared for in the NSICU. Patients in the CVICU include postoperative patients as well as those with heart failure and acute coronary disease. Advanced mechanical support modalities, including ECMO and LVAD, are supported as well.

The Pediatric Intensive Care Unit (PICU) in the renowned Cincinnati Children’s Hospital Medical Center is a 36-bed multidisciplinary unit for children beyond the newborn age with over 2,000 combined medical and surgical admissions annually. In addition to pediatric trauma patients, other PICU admissions include neurosurgical, airway reconstructive surgery, solid organ transplantation, and orthopedic patients. All forms of mechanical ventilator support, including liquid ventilation and high frequency ventilation, renal dialysis, continuous venovenous/venoarterial ultrafiltration, and ECMO are utilized in the PICU.

Experience in trauma surgery at UCMC and acute care surgery at our Level 3 trauma center in West Chester, Ohio are also offered and encouraged during the one-year fellowship through elective rotations. Other venues for critical care education include the 10-bed Burns Special Care Unit at UC Medical Center. These rotations can be arranged according to fellow interest and availability.

The surgical critical care fellowship was reviewed by the ACGME in 2016 and was granted Continued Full Accreditation. Options for extending the fellowship for a second, non-ACGME accredited year are available and include acute care surgery, trauma, and advanced research and educational opportunities. Second-year positions will be considered on an individual basis depending on funding.

Current Fellows:
Andrew Kung, MD
MD – Uniformed Services University
GS Residency – University of California - Davis
Stephen Markowiak, MD
MD – University of Toledo College of Medicine and Life Sciences
GS Residency – University of Toledo
**Past Fellows:**

2023  Lauren Craugh, MD – Assistant Professor, Trauma, Indiana University Health, Indianapolis, IN
2023  Tyler Williams, MD – Private Practice
2022  Christopher Horn, MD – Junior Faculty (Military), University of Cincinnati Medical Center.
2022  Dan Hyatt, MD – Locums (traveling ICU/trauma doc).
2021  Jay Nathwani, MD – Assistant Professor, Trauma/Critical Care, University of Cincinnati Medical Center, Cincinnati, Ohio.
2021  Aaron Seitz, MD – Assistant Professor, Trauma/Critical Care, Director, WCH Trauma and Acute Care Surgery, University of Cincinnati Medical Center, Cincinnati, Ohio.
2020  Allyn Checovich, MD – Private practice.
2020  Donald (Christopher) LaSeur, MD – Faculty, Medical City Plano, Plano, Texas.
2019  Ryan Earnest, MD – Assistant Professor, Trauma/Critical Care, University of Cincinnati Medical Center, Cincinnati, Ohio.
2019  Paul Vana, MD – Trauma practice at Advocate Good Samaritan Hospital, Chicago, Illinois.
2018  Anthony England, MD – Surgeon, St. Elizabeth Physicians, Edgewood, Kentucky.
2018  Ian Ferries, MD – Surgeon, Naab Road Surgical Group, St. Vincent Indianapolis – Hospital & Health Care Center, Indianapolis, Indiana.
2017  Gregory Day, MD – Trauma, Surgical Critical Care and Acute Care Surgeon, Memorial Hospital, Colorado Springs, Colorado.
2017  Joshua Person, MD – Assistant Professor, Trauma and Critical Care, UT Health, Galveston, Texas.
2016  Keshav Deshpande, DO – Trauma, Critical Care and Acute Care Surgeon, OhioHealth Grant Medical Center, Columbus, Ohio.
2016  Stephanie Streit, MD – Trauma and Acute Care Surgeon, Nellis Air Force Base, Las Vegas, Nevada.
2015  Kevin Christian, DO – Associate Trauma Medical Director, Acute Care Surgeon at Ferrell Duncan Clinic at Cox Health, Springfield, Missouri.
2015  Alyssa Gans, MD – Assistant Professor of Surgery, Soin Medical Center, Beavercreek, Ohio.
2014  D Anderson Millar, MD – Trauma and Acute Care Surgeon, Utah Surgical Associates, Provo, Utah.
2013  Kate Gazenko, MD – General Surgeon, Johnson Regional Medical Center, Clarksville, Arkansas.
2013  Gina Maccarone, MD – General Surgeon, Cosmetic Surgery Fellow, Cincinnati, Ohio.
2012  Jason Schrager, MD – Associate Professor of Surgery, Medical Director Acute Care Surgery, University of Cincinnati, Cincinnati, Ohio.
2012  Christina Williams, MD – Assistant Professor of Surgery, University of Cincinnati, Cincinnati, Ohio.
2011  Matthew Moorman, MD – Division Chief Trauma, Critical Care, and Acute Care Surgery University Hospital, Cleveland, Ohio.
2011  Christian Bulcao, MD – Study Physician, Samumed, LLC, San Diego, California.
2010  Gerald Fortuna, MD – Vascular and Trauma Surgeon, Lexington Medical Center, West Columbia, South Carolina.
2010  Nichole Ingalls, MD – Surgeon, Northwest Surgical Specialists, LLP, Springfield, Oregon.
2009  Rachael Callcut, MD – Professor and Chief, Division of Trauma, Acute Care Surgery and Surgical Critical Care, UC Davis, Sacramento, California.
2009  Rachel Hight, MD, Lt Col, USAF – Assistant Professor of Surgery, University of California Davis Medical Center, Sacramento, California.
2008  Krishna Athota, MD – Associate Professor of Surgery, Program Director Surgical Critical Care Fellowship, University of Cincinnati, Cincinnati, Ohio.
2008  Brian Leininger, MD – Director, Surgical Critical Care Service, Memorial Hospital, Colorado Springs, Colorado.

Vascular Surgery Fellowship Program

The University of Cincinnati (UC) Vascular Surgery Fellowship is a two-year, ACGME accredited clinical fellowship. All fellows perform standard as well as complex open, endovascular and hybrid procedures during their fellowship and not only meet but also exceed graduating standards set by ACGME. The fellowship offers an opportunity to become facile in both standard open vascular surgical procedures, catheter-directed advanced therapy for the treatment of vascular disease, hybrid interventions as well as non-invasive vascular diagnostic laboratory training. Our fellowship offers a unique combination of exposure to an academic university hospital referral practice, VA medical center, and a community hospital practice setting. Experience in outpatient venous interventions and dialysis access completes the training, making the graduating fellows well suited for both academic and community practice of vascular surgery.

Academic and scholarly pursuits are critical to a fellow’s development and future career. Each fellow is encouraged to prepare a manuscript and/or chapter for publication during their clinical fellowship. A formal lecture series has been developed based on the latest V-Score Curriculum in collaboration with other departments at the University to enhance the fellows’ understanding of vascular physiology, anatomy, embryology, and pathology. In addition to the teaching lectures, hands-on simulation sessions are held throughout the academic year directed towards operative techniques, exposure of vessels and use of latest cutting-edge technology in the field of vascular surgery. The fellows are required to take the Vascular Surgery In-Training Examination and Mock Orals, annually.

The expanded clinical base provides an excellent educational experience for our vascular surgery fellows. Our past fellows have, with their endovascular and open surgical skills, enjoyed ample employment opportunities in the geographical region of their choosing around the country. UC had one of the first programs approved for such a two-year clinical fellowship.

Integrated Vascular Surgery Residency Program

The Integrated Vascular Surgery Residency Program is a five-year training program aimed at successful graduates of an accredited medical or osteopathic school who wish to specialize in the field of vascular surgery directly. The program includes 18-24 months of core surgical training and 36-42 months of vascular training. The curriculum stresses core education in the management of surgical patients with complex illnesses, and advanced education to develop competency in the diagnosis and treatment of patients with vascular disease.

The goal of core surgery education is to ensure that the vascular resident is competent in the comprehensive evaluation and management of patients with complex illnesses and the basic surgical skills used in the treatment of cardiovascular, thoracic, abdominal and soft tissue diseases. Upon completion of PGY-2, the surgical resident should have acquired the knowledge and skills outlined below to facilitate quality patient care and ensure patient safety. The knowledge and skills should serve as the foundation for further education and training in vascular surgery.

The vascular residents rotate through some of the standard surgery rotations during the first two postgraduate years: general surgery to include gastrointestinal surgery; surgical oncology, endocrine surgery and laparoscopic surgery and trauma surgery; anesthesia; critical care; plastic surgery; cardiac surgery, thoracic surgery; as well as transplant surgery. The goals of these rotations are similar to the goals of the general surgical training with some additional rotations intended specifically to augment the knowledge and skills expected of a vascular surgeon such as radiology and interventional radiology. The residents also rotate to The Christ Hospital where they receive valuable endovascular and dialysis access experience. The final years of training are dedicated exclusively to vascular and endovascular rotations only.
Conferences:

Weekly, Department of Surgery Grand Rounds
Weekly, Department of Surgery, Morbidity & Mortality Conference
Weekly, Vascular Preoperative Case Conference & Morbidity & Mortality
Weekly, Vascular Education Conference (Journal Club, Didactics, V-SCORE, VESAP and Skills Simulation)
Monthly, Non-Invasive Vascular Laboratory Noon Conference
Bi-Monthly, Vascular QI Project / Research Noon Conference

Current Integrated Vascular Surgery Residents:

Douglas Rodgers, MD (Chief) – Tuft’s University School of Medicine
Loay Aljaberi, MD (Fourth Year) – Medical Degree: Al-Quds University, Jerusalem; General Surgery Residency: Mayo Clinic, Rochester, MN
Kristie Yu, MD (Third Year) – Case Western Reserve University
Eric Hammond, MD (Second Year) – SUNY Upstate Medical University
Jacob Hughes, MD (First Year) – Eastern Virginia Medical School

Medical Student Education

Latifa Sage Silski, MD, Director
Associate Professor of Surgery
Section of Transplantation

Jennifer S. Colvin, MD, Associate Director
Assistant Professor of Surgery
Section of General Surgery

Carla F. Justiniano, MD, Associate Director

231 Albert Sabin Way (ML0558)
Cincinnati, OH 45267-0558
513-558-2134
Nicole.Norman@uc.edu

The Department of Surgery is committed to providing excellent educational experiences for medical students. A dedicated team of faculty and staff have developed one of the strongest clerkships within the College of Medicine and increased the number of graduating students who have chosen to pursue a career in surgery. Mentoring of students by the Director of Surgical Student Education and the Director of Medical Student Development is an integral part of the educational experience students have while working within the Department of Surgery. Improvements to the structure of the surgery clerkship curriculum have helped us to increase the depth and breadth of students’ knowledge of surgery.
We utilize the National Board of Medical Examiners (NBME) Surgery exam as our clerkship final written examination. The use of this exam helps maintain the integrity of our testing system and shows how our results compare to those from other surgical education programs throughout the country. Students also complete a board-style oral examination and a knot-tying task that is evaluated for both speed and accuracy.

An online evaluation system has also been established that enables students to provide timely, constructive feedback regarding their learning experience on the Surgery Clerkship, as well as comments regarding faculty and resident teaching performance. We encourage helpful feedback and take these comments into consideration as we progressively modify the experience for better education.

During the fourth year, students have the option of gaining additional experience in surgery with several electives. Acting Internships are available in General Surgery, Surgical Oncology, Trauma, Transplant Surgery, and Pediatric Surgery. Every student aspiring to a general surgical residency is encouraged to enroll in the acting internships. Students are assigned tasks and responsibilities commensurate with the level of a surgical intern. The Critical Care acting internship involves managing patients admitted to the Surgical Intensive Care Unit, and students participate in the acute resuscitation and management of many types of patients. The core of the rotation is centered on the multidisciplinary rounds led by surgical intensivists, with participation by pharmacy, respiratory therapy, nutrition, and nursing. Fourth-year students pursuing a career in surgery are also invited to participate in a surgery “Boot Camp.” During this five-hour session, they are given practical lectures on common clinical scenarios and provided the opportunity to practice technical procedures on an animate model. They are able to hone skills in instrument handling, suturing, tissue dissection, and obtaining exposure.

Continuing Medical Education

UC Health Surgeons are pleased to be a resource for practicing physicians. We are excited to share the latest clinical and research findings with you. We invite you to join us for Grand Rounds, teaching conferences and visiting professor lectures. Innovative procedures and technologies are evaluated, current protocols are reviewed and the future of our profession is discussed.

Surgical Grand Rounds, Curriculum Conference, and Morbidity & Mortality are conducted each Wednesday morning. The curriculum conference is based on the American Board of Surgery SCORE curriculum and will consist of a concise review of the reading assignment, a Q&A session with audience response system, and a faculty member who will moderate the session and review case studies. Surgical Grand Rounds is CME Category I for any faculty member in attendance who completes the evaluation sheet.

The University of Cincinnati College of Medicine designates these educational activities for Category 1 CME credit toward the AMA Physician’s Recognition Award. The University of Cincinnati College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor CME for physicians.

Further information on the Office of Education can be viewed at med.uc.edu/depart/surgery.
Forging a Trail for General Surgery Residents Emerging As Surgeons, Scholars and Leaders

Meeting of a Consortium of Academic Surgery Educators & General Surgery Residents

The Cloudveil Autograph Collection Marriott Hotel

Development of residents and junior faculty into surgeon leaders requires more than just technical skill. To help fill the gap between caring for patients and leadership skills, UC Surgery is proud to offer the Surgeons, Scholars and Leaders (SSL) retreat and professional development conference, held in Jackson Hole, Wyoming.

The conference is also a wellness success characterized by good exercise, scenic beauty, no slope injuries, and a good time had by all.
Center for Surgical Innovation (CSI)

Expanding the Frontiers of Medicine

About Us

The Center for Surgical Innovation (CSI) is a collaboration between the University of Cincinnati (UC) departments of surgery, biomedical engineering, emergency medicine, and Cincinnati Children's Hospital Medical Center.

The collaboration was established to develop, assess, and enhance new technologies in biomedical and surgical care. Located in the UC College of Medicine’s Medical Sciences Building, CSI is a 3,700-square-foot research and teaching facility. The space includes both a teaching laboratory and an operating room, equipped with the latest surgical technology.

Whether it is continuing medical education, device development, procedure modification, or training and simulation, CSI is a tremendous resource for both UC-affiliated faculty as well as regional businesses, community medical practitioners, engineers and scientists.

Capabilities

CSI welcomes the opportunity to work with regional industries. Surgeons, medical practitioners and scientists from across the region come to our state-of-the-art training and conference facility to teach, train, explore and discover. The lab has the capability of both animate and inanimate (cadaver) models to be used for teaching, training and research. All cadavers are provided by the UC Body Donation Program.

CSI is equipped with the following technologies:

- Laparoscopy
- Fluoroscopy
- Telemedicine
- Video Recording
- Didactic Lecture

The facility is also equipped with:

- Five plasma screens and a projector that can be used to display images and demonstrate procedures
- Space for up to seven work stations and 30-40 people
- A small conference room adjoining the lab with a plasma screen and projector (access to larger rooms located within the department of surgery and College of Medicine are also available)

Trained staff members of CSI are available for planning and organizing teaching labs to ensure that lab requirements are met.
Partnerships

Building collaborative partnerships is a key component of CSI’s continuing success.

CSI has grown and benefited from generous donations of financial support, as well as donations of hardware from both internal and external sources.

Additionally, CSI is grateful for philanthropic commitments, and was established in part by a generous gift from Mr. Carl Lindner, a Cincinnati business leader.

Please contact us at (513) 558-5044 for information on how to become a partner and/or make a donation.

Contact Us

CSI laboratory facility is equipped for UC affiliates, as well as corporate industries, to conduct training labs and/or research and development activities.

For more information on using the CSI laboratory, visit med.uc.edu/depart/surgery or contact:

UC Institute for Military Medicine

Overview

The University of Cincinnati (UC) Institute for Military Medicine was created by the department of surgery around its core strength of clinical and research faculty, with interests in trauma and critical care. It was named an official Institute of the University of Cincinnati by the Board of Trustees in August 2009. The Institute functions as an interdisciplinary network of investigators across the breadth of the university who share a common focus related to the treatment and care of seriously injured patients. It is not structured as a research silo or confined department, but rather as a coalition of clinicians and scientists who bring unique perspectives to bear on a common problem. The Institute is uniquely distinguished by its presence across the Department of Defense, the Military Health System, the UC College of Medicine, and clinical care within a university system.

The UC Institute for Military Medicine (IMM) has partnered with the United States Air Force, the Department of Defense, the Joint Program Committee-6 (JPC), and the Naval Medical Research Unit (NAMRU), to name a few of the many military funding sponsors. The goal of this collaboration is to seek answers to identified shortfalls and needs in the scientific understanding of traumatic injuries and care of the injured soldier. An additional significant advantage uniquely leveraged by the IMM is the rapid translation of this new knowledge not only to the military community but to the civilian trauma setting as well. The IMM is uniquely distinguished by its synergistic platform which allows immediate access to all team members across the entire spectrum of military medical providers, clinicians, and scientists in the setting of a century-old college of medicine whose robust infrastructure provides expertise and continuity to answer evolving military medical challenges.

The missions of the UC Institute for Military Medicine are to:

• discover the scientific basis of traumatic injury and translate this knowledge into better treatments for combat casualties and civilian patients
• develop technology that can be applied in military and austere environments to advance the care of the acutely injured patient
• provide state-of-the-art training for those caring for our wounded soldiers
• prepare and train the next generation of clinical and research leaders in traumatic injury
Programs

The UC Institute for Military Medicine has a broad range of programs that serve to advance its missions.

Clinical & Applied Science

This section entails projects that serve to develop equipment solutions and technologies to advance the care of acutely injured patients. These projects translate scientific findings into clinical practice algorithms or demonstrate novel applications of technology for patient care. Examples of the types of projects in this program include: clinical trials of blood component therapy for massive transfusion, development and application of a closed-loop autonomous ventilator, oxygen conservation and generation technology for far-forward environments, and effects of fatty acid supplementation on recovery from traumatic injury.

Basic Science

The basic science section focuses on the traditional and fundamental aspects of scientific research. Projects within this program are directed towards increasing our understanding of the biology of traumatic injury at a genetic, molecular and cellular level, and to elucidate the fundamental cellular changes impacted by trauma with a goal of establishing translation to potential therapeutic strategies. Examples of projects in this program include: effects of resuscitation with blood component therapy on systemic inflammation after hemorrhagic shock, neuroinflammation of traumatic brain injury, effects of aeromedical evacuation on the severely injured, and detrimental effects of age on red blood cell function.

Training

The training program has projects that extend to both clinical and scientific training and serve to promote the excellence of trainees in the care of the acutely injured. Our partnership with the military as one of five National Military Medical Training Centers includes multiple venues:

- Cincinnati C-STARS/CCATT
  Trains the Critical Care Air Transport Teams (CCATT) of the USAF that are responsible for medical care of seriously injured soldiers during transport from the combat theater to Europe and the USA. CCATT teams consist of three medical providers (MD, RN, RT) and usually employ a fixed wing platform.

- Nurse Transition Program USAF
  The USAF Nursing Corps (NC) utilizes the clinical platform of inpatient care at UC Medical Center to provide the academic and clinical experience for USAF nurses transitioning to practice.

- Training of military and civilian medical personnel under simulated stressful conditions in order to hone their skills and reduce errors.

- A basic science research training program funded by the National Institutes of Health on the biology of trauma helps to develop future scientists in the field of trauma and acute injury.

Additional information about the UC Institute for Military Medicine can be viewed at med.uc.edu/depart/surgery.
The Division of Cardiac Surgery

The University of Cincinnati (UC) division of cardiac surgery leads the Tri-State region in the discovery and advancement of innovative treatment for patients with cardiac disease. A multidisciplinary team dedicated to heart failure and complex cardiac diseases has made UC a state-of-the-art referral center for both standard and complex cases.

The division performs the full spectrum of operative procedures in patients with cardiac and vascular diseases, including coronary revascularization, valve repair and replacement, aortic aneurysm repair, ventricular assist device implantation, and is the region’s first adult heart transplantation program.

The division offers expertise in all-arterial and off-pump coronary revascularization, and repair of complex thoracic-aortic diseases. In addition, our surgeons perform complex minimally-invasive cardiac surgery including coronary artery bypass grafting. The division has the region’s only comprehensive advanced heart failure program, which includes a comprehensive mechanical circulatory support program consisting of both short-term and long-term mechanical circulatory support therapy for both acute and chronic heart failure as a bridge to transplantation or as destination therapy.
For acute respiratory failure, UC has an integrated ECMO (extracorporeal membrane oxygenation) program which benefits patients who would otherwise fail to survive conventional therapies. We have been recognized as “High Performing” in Coronary Artery Bypass Graft (CABG) and Heart Failure in the 2022-2023 U.S. News & World Report.

The division also offers a unique mobile ECMO program in which patients with cardiorespiratory failure can be placed on support at a referring hospital and transferred to the UC Medical Center. In conjunction with the Department of Anesthesia, Division of Anesthesia Critical Care, the division recently launched an E(ECMO) CPR program, in which patients suffering cardiac arrest are placed emergently on ECMO to improve outcomes in certain patients.

In conjunction with the division of cardiology, we offer a joint program in advanced endovascular therapies including transcatheter aortic valve replacement (TAVR) and transcatheter mitral valve procedures.

Patients benefit from a true multidisciplinary approach to cardiovascular disease, combining surgical and medical expertise as well as the advanced technology and support services offered at UC Medical Center, leading to people not just living longer, but living better.

### Congenital Heart Surgery

Part of the UC department of surgery, the division of Congenital Heart Surgery at Cincinnati Children’s Hospital Medical Center has a high profile as a world leader in the surgical management of cardiac problems in children, including newborn corrective operations, management of the entire spectrum of congenital and acquired cardiac problems in neonates, including management of complex single ventricle cardiac anomalies, and management of infants and children with severe heart failure which includes expertise in cardiac transplantation and ventricular assist device utilization. The division also performs lung transplantation and, in partnership with the solid organ transplant program, heart/kidney transplants and heart/liver transplants are performed in patients with multi-organ failure.

Cincinnati Children’s Hospital Medical Center (CCHMC) has an active adult congenital heart disease program, caring for patients with con-genital heart disease into and through adulthood with particular interests in aortic valve and aortic pathology (e.g., Supported Ross, valve sparing root surgery and aortic valve repair) and failing Fontan circulations.

In collaboration with the Aerodigestive Center at CCHMC, the division has the world’s most extensive experience with complex tracheal reconstruction in infants and children. Cincinnati Children’s consistently ranks among the nation’s best cardiology and heart surgery programs as measured by U.S. News & World Report Best Children’s Hospitals.

The division of pediatric cardiothoracic surgery maintains an active multi-investigator research lab. They presently have two RO-1 NIH grants. Research areas include: improved donor organ utilization for thoracic transplantation, novel anticoagulation and anti-inflammatory strategies for mechanical circulatory support, and prosthetic valve development. They also are leaders in the use of virtual reality for surgical planning of complex congenital repairs.
The Division of Thoracic Surgery

The UC division of thoracic surgery is a leader in treating the entire spectrum of thoracic diseases including lung cancer, benign and malignant esophageal disorders, airway, mediastinal, diaphragmatic and chest wall disease. The division has the most extensive experience in minimally-invasive thoracic procedures in the Tri-State region, including video-assisted thoracoscopic (VATS) and robotic lobectomy, minimally-invasive esophagectomy and robot-assisted thoracic surgery for mediastinal tumors. We also utilize sophisticated interventions for complex air-way and foregut disorders.

The division specializes in the diagnosis and treatment of lung cancer, and performs a high volume of lung cancer surgery. Special attention is directed to patients who are at high risk for surgery due to underlying lung disease. The division offers a full range of lung cancer treatments from minor resections to highly complex thoracic operations. We have been recognized as “High Performing” in Lung Cancer Surgery in the 2022-2023 U.S. News & World Report.

Dedicated lung cancer surgeons work in partnership with radiation oncologists, interventional pulmonologists, chest radiologists and medical oncologists to provide comprehensive lung cancer care to patients through the UC Cancer Center’s Lung Cancer Center. Through UC Health, the team launched the first lung cancer screening program for patients at increased risk for lung cancer in 2012. Lung cancer screening with low-dose CT scans has been shown to reduce lung cancer mortality by at least 20% in those at higher risk for lung cancer. We have three dedicated nurse coordinators to navigate patients through the screening process, an integrated smoking cessation program, and we use the expertise of our multidisciplinary lung cancer team to provide individualized care for our patients while working closely with referring physicians. We perform over 2500 lung cancer screenings annually and were the first lung cancer screening program in the region to be recognized as a Screening Center of Excellence by the Lung Cancer Alliance.

The division offers expertise in the evaluation and treatment of esophageal cancer and foregut disorders, with the most experienced esophageal surgeons in the region. The Esophageal Disease Center offers coordinated multidisciplinary care in which patients are seen by a team of esophageal cancer experts in one location, including thoracic surgery, surgical oncology, medical oncology, radiation oncology, gastroenterology, oncology dietitians, and social workers. We also perform complex endoscopic procedures such as transoral incisionless fundoplication (TIF), which is a no-incision procedure to treat acid reflux, and endoscopic mucosal resection for early esophageal cancers.

Faculty

Adult Cardiac Surgery Faculty:
Louis B. Louis IV, MD, FACS
Associate Professor of Surgery
The Louis Buckberg Endowed Chair in Cardiac Surgery
Director, Division of Cardiac Surgery
Antonio Panza, MD Professor of Surgery
Samuel Russell Vester, MD Professor of Surgery

Congenital Heart Surgery Faculty:
Carl L. Backer, MD
Professor of Surgery
Cincinnati Children’s Hospital Medical Center
Director of Cardiothoracic Surgery, University of Kentucky
David G. Lehenbauer, MD
Assistant Professor of Surgery
Cincinnati Children’s Hospital Medical Center
David Morales, MD
Professor of Surgery and Pediatrics
Co-Director of The Heart Institute
Clarke-Helmsworth Chair of Congenital Heart Surgery
Cincinnati Children’s Hospital Medical Center
David S. Winlaw, MBBS, MD
Professor of Surgery
Cincinnati Children’s Hospital Medical Center
Farhan Zafar, MD
Associate Professor of Surgery
Director, Thoracic Organ Procurement
Cincinnati Children’s Hospital Medical Center
We work with a multidisciplinary thoracic oncology team to treat uncommon complex tumors such as mesothelioma and thymic tumors.

In conjunction with interventional pulmonary and thoracic anesthesiology, we have a unique multidisciplinary Advanced Emphysema Program in which patients are evaluated jointly for Lung Volume Reduction procedures. This year, we obtained Joint Commission on Accreditation of Healthcare Organizations (JCAHO) certification for our Lung Volume Reduction Surgery program, one of only a few in the State of Ohio.

The division continues to expand its expertise in research. The group collaborates with multiple departments in the UC College of Medicine and has active research projects in molecular predictors of lung cancer recurrence, lung cancer screening with low-dose CT scans, enhanced recovery pathway in thoracic surgery, as well as clinical trials in thoracic cancers.

Faculty

**Sandra L. Starnes, MD, FACS**
Professor of Surgery
John B. Flege, Jr. Chair in Cardiothoracic Surgery
Chief, Section of Cardiothoracic Surgery
Director, Division of Thoracic Surgery

Dr. Starnes specializes in general thoracic surgery with a focus on lung and esophageal cancer. She has a particular expertise in treating mediastinal tumors and focuses on minimally invasive approaches to thoracic surgery. She is certified by the American Board of Surgery and the American Board of Thoracic Surgery.

**Robert Van Haren, MD, MSPH**
Associate Professor of Surgery

Dr. Van Haren specializes in all aspects of general thoracic surgery including treatment of benign and malignant diseases of the esophagus, lungs, and airway. He has expertise in minimally-invasive approaches such as video-assisted thoracoscopic surgery (VATS) and robotic surgery. He is certified by the American Board of Surgery and the American Board of Thoracic Surgery.

**Julian Guitron, MD**
Affiliate Associate Professor of Surgery

Additional information on the section of cardiothoracic surgery can be viewed at [med.uc.edu/depart/surgery](http://med.uc.edu/depart/surgery).
The Section of Colon and Rectal Surgery

Surgeons in the University of Cincinnati (UC) section of colon and rectal surgery treat benign, malignant, and inflammatory conditions of the colon, rectum, and anus. Patients with colorectal cancer and polyposis syndromes, inflammatory bowel disease, rectal prolapse and fecal incontinence, hemorrhoids and other benign anorectal disorders are seen at the University of Cincinnati Medical Center Medical Arts Building, UC Health Physician Offices in West Chester, and the Christ Hospital Medical Office Building.

Cutting-edge surgical techniques are offered at each of the hospitals where the colon and rectal surgeons work. Minimally invasive advanced laparoscopic, robotic, and transanal surgical procedures are available to patients with both benign and malignant diseases of the colon and rectum. Our surgeons have expertise in transanal minimally invasive surgery (TA-MIS) for large rectal polyps and early rectal cancers. Robotic surgery, which allows superior visualization of pelvic anatomy and fine dissection in the pelvis, is also offered. These minimally invasive approaches are associated with less discomfort and a quicker return to normal activity than with traditional surgical approaches and are appropriate for patients with a wide range of diseases. We are the region’s referral center for the most complex cases of colorectal cancer and inflammatory bowel diseases.

Colorectal cancer patients are treated in collaboration with medical oncology, radiation oncology, and the hepatobiliary surgeons from the UC Cancer Institute. These patients benefit from coordination of care across specialties. Our multidisciplinary efforts to treat rectal cancer include a tumor board and clinical trials at UC Medical Center. We offer clinical trials for patients with various stages of cancer of the colon, rectum, or anus. Though we have the necessary surgical expertise to treat the most complex cases of rectal cancer, our multidisciplinary team offers a “watch and wait” approach to selected patients with rectal cancer after chemotherapy and radiation, allowing some patients to avoid surgery completely. We are part of the national Rectal Cancer Surgery Consortium and have collaborated with the top rectal cancer centers in the United States to develop the best practices for nonoperative management of rectal cancer.
Patients with Crohn’s disease and ulcerative colitis benefit from the region’s only multidisciplinary inflammatory bowel disease center: a collaboration between colon and rectal surgeons, gastroenterologists, radiologists, pathologists, and nurse navigators to select the best individual treatment for each patient with Crohn’s or Colitis. We are an active contributor to the American College of Surgeons’ National Surgical Quality Improvement Program (NSQIP) – Inflammatory Bowel Disease Collaborative as one of a handful of centers focusing on surgery for Crohn’s and colitis. We have recently opened a clinical trial of stem cell therapy to treat anal fistula disease in Crohn’s patients, the only study of its kind in the region.

Patients undergoing elective abdominal operations for benign or malignant disease are placed on an enhanced recovery pathway.” This approach has many elements that are all designed to accelerate recovery following major abdominal surgery, providing patients with the ability to return to their normal level of functioning at a much quicker rate than what has previously been achieved. Specifically, use of non-opioid pain medications decreases the incidence of adverse effects experienced with conventional opioids, such as slowed bowel function and narcotic abuse and dependence. The results of this pathway have been dramatic, with significant decreases in length of hospital stay and increases in patient satisfaction scores.

The team is one of only a few groups of colorectal surgeons in the Tristate area offering the Interstim device for the treatment of fecal incontinence.

We have two WOCN (Wound Ostomy Continence Nursing) certified nurse practitioners in our office, allowing us to take care of the most complex patients with wound and ostomy needs at all three of our locations.

Academic pursuits of our colorectal surgeons include clinical trials, novel surgical techniques, and innovative treatments for many colorectal disorders. UC colorectal research outcomes have been presented at national and international meetings.

Dr. Paquette is associate editor for the journal Diseases of the Colon and Rectum and was awarded the Victor Fazio Award in 2019 as the top editorial board member. He is also on the editorial board of Annals of Surgery. He is an examiner for the American Board of Colon and Rectal Surgery and serves as the Chair for the American Society of Colon and Rectal Surgeons Clinical Practice Guidelines Committee. He has served on 35 national and international committees for colon and rectal surgery and has authored 100 peer-reviewed manuscripts.

Dr. Snyder is a reviewer for the journal Diseases of the Colon and Rectum and serves on the Peer Review Committee for West Chester Hospital.

Dr. Thompson serves on the American Society of Colon and Rectal Surgeons’ Public Relations Committee, UC Medical Center and The Christ Hospital (TCH) Robotic Surgery Committees, TCH Provider Enhancement Committee, and as co-chair of TCH General and Colorectal Surgery Quality and Performance Enhancement Committee. He is the Surgical Director of Anal Dysplasia Screening at UC Medical Center.

Dr. Justiniano serves on the American Society of Colon and Rectal Surgeons’ Diversity, Equity and Inclusion Committee. She is also part of the Selected Abstracts Committee of the Diseases of the Colon and Rectum journal for which she also serves as a reviewer. She is the director of UC’s NSQIP inflammatory bowel diseases registry and our National Rectal Cancer Accreditation Program. She is active in clinical outcomes research, and is an associate surgery clerkship director for 3rd year medical students.

Faculty

Ian M. Paquette, MD, FACS, FASCRS
Professor of Surgery
Interim Chief, Section of Colon and Rectal Surgery

Dr. Paquette specializes in the surgical treatment of colon and rectal cancer, complex inflammatory bowel diseases such as Crohn’s disease, ulcerative colitis, diverticulitis, and benign anorectal disease, with a special focus on laparoscopic colon surgery for benign and malignant conditions. He primarily operates at UC Medical Center and has a referral base of complex and re-operative surgical patients. He is a high-volume surgeon in advanced inflammatory bowel disease surgery including J-Pouch surgery. He is certified by the American Board of Surgery and the American Board of Colon and Rectal Surgery.
Carla F. Justiniano, MD, MPH
Instructor of Surgery

Dr. Justiniano specializes in the treatment of malignant and benign colorectal diseases as well as anorectal diseases, prolapse and fecal incontinence. She has a particular interest in robotic surgery, complex re-operative surgery with both open and minimally invasive approaches, and J-pouch surgery. She operates primarily at UC Medical Center. She sees patients in English and in Spanish. She joined the group at UC in 2022 after completing training at the Cleveland Clinic. She is board certified by the American Board of Surgery.

Jonathan R. Snyder, MD, FACS, FASCRS
Associate Professor of Surgery

Dr. Snyder specializes in benign and malignant colorectal disease, providing surgical care for patients with abdominal colorectal disease as well as anorectal disease. He has a particular focus on minimally invasive abdominal surgery – through both laparoscopic and robotic approaches. He also places Interstim device (sacral nerve stimulation) for the treatment of fecal incontinence in select patients. Dr. Snyder operates primarily at the West Chester Hospital. He is certified by the American Board of Surgery and the American Board of Colon and Rectal Surgery.

Earl V. “Tommy” Thompson, MD, FACS
Assistant Professor of Surgery

Dr. Thompson specializes in the treatment of all benign and malignant conditions of the colon, rectum, and anus, with a special interest in pelvic surgery. He is also Surgical Director of Anal Dysplasia Screening at UC Medical Center. Dr. Thompson practices at The Christ Hospital and West Chester Hospital. He is certified by the American Board of Surgery and the American Board of Colon and Rectal Surgery.

Sara Pulskamp, MSN, FNP, CWOCN

Sara is a family nurse practitioner who is also a certified wound ostomy and continence nurse. She is certified by the American Academy of Nurse Practitioners and Wound, Ostomy and Continence Nurses Society. She assists in the management of preoperative and postoperative care of colorectal surgery patients, ostomies, pelvic floor dysfunction and sacral nerve stimulation. She practices at The Christ Hospital and West Chester Hospital.

Katelyn Riebesehl, DNP, CWON

Kate is a Nurse Practitioner with specialization in the care of wound, ostomy, and continence patients, particularly those who need assistance with bowel management. She is certified by the American Nurses Credentialing Center and the Wound, Ostomy, and Continence Nurses Society. Kate practices at West Chester Hospital and UC Medical Center.

More information about the section of colon and rectal surgery can be viewed at med.uc.edu/depart/surgery.
The Section of General Surgery

The Section of General Surgery includes the divisions of UC Medical Center (UCMC) general surgery, UCMC trauma surgery, UCMC acute care surgery, UCMC surgical critical care, West Chester Hospital (WCH) trauma and acute care surgery, WCH general and bariatric surgery, and trauma and critical care surgery research. The members of our section are dedicated to saving lives through compassionate care, quality education, and leading innovation.

University of Cincinnati Medical Center General Surgery

UC Health surgeons are at the forefront of advancing state-of-the-art care for general surgery conditions. The team offers care of routine and complex general surgery and bariatric conditions as well as minimally invasive surgical approaches for gastrointestinal surgical disorders. Our surgeons performed more than 2,200 major elective and urgent general surgery operations during the past year.

Our team specializes in the surgical management of a wide variety of disorders including the broad discipline of general surgery, swallowing disorders such as achalasia, gastroesophageal reflux disease (GERD), gastroparesis, and paraesophageal hernias; gallstones and gallbladder disease; abdominal wall hernias, inguinal hernias, and abdominal wall reconstruction; enterocutaneous fistula; diseases of the spleen; acute pancreatitis; diverticulitis and other colon conditions; and diseases of the adrenal gland.

Our faculty surgeons offer expertise in minimally invasive gastrointestinal surgery as well as the full range of procedures for treatment of morbid obesity. In addition, robotic-assisted operations are performed for several gastrointestinal disorders. Patients are often referred to our practice by other surgeons for treatment of very complex conditions.
West Chester Hospital General and Bariatric Surgery

Our Bariatric Surgery program, in partnership with the UC Health Weight Loss Center and TRIMS, the Transplant-Related Interdisciplinary Metabolic Surgery Program, now offers weight loss solutions at both the West Chester Hospital and the University of Cincinnati Medical Center campuses. The West Chester location is recognized for excellence by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program (MBSAQIP), a joint program of the American College of Surgeons (ACS) and the American Society for Metabolic and Bariatric Surgery (ASMBS). Our surgeons have performed thousands of successful laparoscopic weight loss operations since its inception. Further information on our surgical weight loss program can be found by visiting http://uchealth.com/weightloss.

General surgery patients are seen at the UC Health Physicians Office Clifton and UC Health Physicians Office North in West Chester.

West Chester Hospital Trauma and Acute Care Surgery

UC Health Surgeons offer emergency care for trauma and general surgery patients at West Chester Hospital, bringing the highest level of surgical care to the Northern Cincinnati region. The West Chester trauma center opened in 2014 and earned formal verification as a Level III trauma center from the American College of Surgeons Committee on Trauma in 2015. In conjunction with our partners in Emergency Medicine, more than 1200 trauma patients were cared for over the past year. The acute care surgery program at WCH continues to grow and provided care for more than 1,400 emergency surgery patients last year. Expert general and trauma surgeons are available for immediate consultation in the WCH emergency department, ICU, and inpatient floors at all times.

University of Cincinnati Medical Center Acute Care Surgery

The UCMC Acute Care Surgery team is focused on providing outstanding care to patients with general surgery emergencies including diverticulitis, intestinal obstruction or perforation, appendicitis, cholecystitis, pancreatitis, intestinal bleeding, incarcerated hernias, and necrotizing soft tissue infections. Our surgical team is immediately available to provide consultation and expert surgical care around the clock. We also provide tertiary and quaternary general surgery emergency care in consultation with referring surgeons from throughout the Tri-State region through our transfer referral center (513-584-BEDS).
The resuscitation and care of trauma patients is led by our trauma surgeons. We are also available at all times for trauma care consultation with referring providers from throughout the Tri-State region through our transfer referral center (513-584-BEDS). The UCMC trauma and emergency medicine team’s excellence was recognized by the first-ever “Heroes in Action Award” by the Cincinnati Business Courier in 2019.

An important component of our Level I trauma center is community education and outreach. We provide ongoing trauma prevention programs in the areas of motor vehicle crashes, older adult falls, and gun violence prevention, as well as an active EMS education program including lectures and rounding. More information is available at http://uchealth.com/trauma/injury-prevention/.

In conjunction with the American College of Surgeons, the White House, DOD, the FBI, and FEMA, we are proud to offer Stop the Bleed courses for medical and nonmedical personnel in the Tri-State region. This is a national initiative to teach the public life-saving bleeding control techniques to aid individuals in a variety of situations. More information is available at http://uchealth.com/trauma/injury-prevention/ and http://www.bleedingcontrol.org/.

UCMC's Emergency/Trauma Care for Bills' Football Player Highlighted

The response by UC Medical Center emergency, medical and trauma personnel to the cardiac arrest suffered by Damar Hamlin of the Buffalo Bills in a game against the Cincinnati Bengals in Cincinnati on January 2, 2023, was highlighted on national TV and in the New York Times (https://www.nytimes.com/2023/01/22/health/damar-hamlin-cardiac-arrest-hospital.html).

Hamlin was given immediate care on the field and then was transported to UC Medical Center where an extensive team of doctors and health care professionals went into action. The New York Times published a story on the various elements of that care that resulted in Hamlin being transferred to a Buffalo hospital a week later. The care team was given the key to the city by Cincinnati Mayor Aftab Pureval (photo), and highlighted at a Cincinnati Bengals game, on the 2023 NFL Honors show, and in a special ceremony during the pregame festivities of Super Bowl LVII.

Hamlin spent a few months recuperating, but rejoined the Bills in April and has been cleared to play again for the 2023 season.
General Surgery and Trauma Research

Betty J. Tsuei, MD, FACS
Professor of Surgery
Director of UCMC Surgical Critical Care

Krishna P. Athota, MD, FACS
Associate Professor of Surgery
Director of Surgical Critical Care Fellowship
Associate Director of UCMC Surgical Critical Care

Our research programs focus on the concept that early intervention after injury leads to improved patient outcomes. Our extensive research portfolio includes projects in basic science, translational science, outcomes research, education and simulation, device design and implementation, and clinical trials. The division currently oversees more than 20 active extramural research grants, with funding from the NIH, DOD, and industry. We have strong collaborative ties with several key partners including emergency medicine, neurosurgery, the UC College of Pharmacy, Hoxworth Blood Center, the UC College of Engineering, Northwestern University, and the University of Virginia.

University of Cincinnati Medical Center Surgical Critical Care

The UCMC Surgical Intensive Care Unit cares for more than 2,000 patients yearly from all surgical specialties including trauma, general surgery, transplantation, surgical oncology, vascular surgery, urology, thoracic surgery, and obstetrics/gynecology. Daily multidisciplinary rounds are highly collaborative in nature, with input and discussion from all team members including critical care nurses, respiratory therapists, critical care pharmacists, and resident physicians. Subspecialty services such as nephrology, infectious disease, rehabilitation medicine, cardiology, and hematology are available for consultative assistance. Additional clinical support services in the SICU include nutrition services, nurse educators, and a dedicated SICU social worker.

We offer advanced training in surgical critical care. Our one- or two-year ACGME accredited Surgical Critical Care Fellowship accepts two candidates yearly and provides training that encompasses all aspects of care of the critically ill surgical patient. Our fellowship emphasizes cardiopulmonary mechanics, principles of resuscitation, and mechanical ventilation. Our graduates have gone on to leadership positions in the areas of trauma and critical care throughout the country.

C-STARS Cincinnati

The section of general surgery and UC Health are proud to host one of six national military/civilian medical trauma training centers. UC Medical Center serves as the site of the United States Air Force Center for Sustainment of Trauma and Readiness Skills (CSTARS). Cincinnati CSTARS is host to the Critical Care Air Transport Team (CCATT) advanced validation center. The Cincinnati CSTARS CCATT advanced course is attended by members of the USAF’s elite CCATT teams. These military medical personnel are responsible for the medical care and evacuation of the sickest casualties across the globe.

The USAF CSTARS center serves as home base more than 25 active duty Air Force military personnel who serve as instructors and support personnel for CCATT training. Four active duty Air Force trauma surgeons participate as fully integrated partners of the section of general surgery as a part of their assigned duties at Cincinnati CSTARS.
Faculty

Andrew Angus, MD
Assistant Professor of Surgery
Major, USAF MC CSTARS Cincinnati

Dr. Angus specializes in general surgery, with special interests in general surgery, trauma surgery, and surgical critical care. He is certified in surgery by the American Board of Surgery.

Krishna P. Athota, MD, FACS
Associate Professor of Surgery
Associate Director, UCMC Surgical ICU
Program Director, Surgical Critical Care Fellowship
Associate Director, General Surgery Residency Training Program

Dr. Athota specializes in general and acute care surgery, with special interests in gallstones and biliary disease, complex GI surgery, hernia, and diverticular disease of the colon. He is certified in surgery by the American Board of Surgery, with Added Qualifications in Surgical Critical Care.

Richard D. Branson, RRT, MS, MBA
Professor of Surgery Emeritus
Director Emeritus, Clinical Research

Mr. Branson specializes in mechanical ventilation of the patient with acute respiratory distress syndrome (ARDS), mechanical ventilation during transport, humidification of inspired gases, and evaluation of new mechanical ventilator technology.

Jennifer S. Colvin, MD
Assistant Professor of Surgery
Associate Director, Medical Student Clerkship

Dr. Colvin specializes in minimally invasive gastrointestinal surgery. She has additional expertise and training in care of patients with GERD or paraesophageal hernias, as well as surgical weight loss. Her primary practice sites are West Chester Hospital and UC Medical Center. She is certified in surgery by the American Board of Surgery.

Lane L. Frasier, MD
Assistant Professor of Surgery

Dr. Frasier specializes in general and acute care surgery, with special interests in trauma surgery, surgical critical care, and team dynamics. She is certified in surgery by the American Board of Surgery.

Michael D. Goodman, MD, FACS
Professor of Surgery
Dario Rodriguez, Jr, Endowed Chair in Trauma Surgery
Director, General Surgery Research
Associate Director, General Surgery Residency Training Program

Dr. Goodman specializes in general and acute care surgery, with special interests in complex gastrointestinal surgery, enterocutaneous fistulas, and abdominal wall reconstruction. He is certified in surgery by the American Board of Surgery, with Added Qualifications in Surgical Critical Care.

Jana Hambley, MD
Assistant Professor of Surgery

Dr. Hambley specializes in general and acute care surgery, with special interests in trauma surgery and surgical critical care. She is certified in surgery by the American Board of Surgery with a certificate of added qualifications in Surgical Critical Care.

Christopher Horn, MD
Assistant Professor of Surgery
Major, USAF MC

Dr. Horn specializes in general surgery, trauma surgery, and military medical education. He is certified by the American Board of Surgery with Added Qualifications in Surgical Critical Care.
Bobby J. (BJ) Johnson, MD

Assistant Professor of Surgery

Dr. Johnson specializes in minimally invasive bariatric and general surgery. His primary practice sites are UC Medical Center and West Chester Hospital. He is certified in surgery by the American Board of Surgery.

Amy T. Makley, MD, FACS

Associate Professor of Surgery
Director, UCMC Trauma Surgery
Associate Director, General Surgery Residency Training Program

Dr. Makley specializes in general surgery and acute care surgery, with special interests in diverticular disease of the colon, hernias, and ostomy closure. She is certified in surgery by the American Board of Surgery, with Added Qualifications in Surgical Critical Care.

Jay Nathwani, MD

Assistant Professor of Surgery

Dr. Nathwani specializes in general and acute care surgery, with special interests in trauma surgery and surgical critical care. He is certified in surgery by the American Board of Surgery.

Timothy A. Pritts, MD, PhD, FACS

Professor of Surgery
Director, Section of General Surgery
Vice Chair of Compensation Committee

Dr. Pritts specializes in general and acute care surgery, with special interests in gallbladder and biliary disease, hernia repair, and abdominal wall reconstruction. He is certified in surgery by the American Board of Surgery, with Added Qualifications in Surgical Critical Care.

Valerie Sams, MD, FACS

Associate Professor of Surgery
Colonel, USAF MC
Director, CSTARS-Cincinnati

Dr. Sams specializes in general surgery, trauma surgery, ECMO, and military medical education. She is certified by the American Board of Surgery with Added Qualifications in Surgical Critical Care. Dr. Sams is the director of CSTARS-Cincinnati.

Jason J. Schrager, MD, FACS

Associate Professor of Surgery
Director, UCMC Acute Care Surgery

Dr. Schrager specializes in general and acute care surgery, with special interests in gallbladder disease, ostomy closure, and abdominal wall reconstruction. He is certified in surgery by the American Board of Surgery, with Added Qualifications in Surgical Critical Care.

Aaron Seitz, MD

Assistant Professor of Surgery
Director, WCH Trauma and Acute Care Surgery

Dr. Seitz specializes in general and acute care surgery, with special interests in trauma surgery and surgical critical care. He is certified in surgery by the American Board of Surgery.

Richard J. Strilka, MD, FACS

Associate Professor of Surgery
Colonel, USAF MC

Dr. Strilka specializes in general surgery, trauma surgery, and military medical education. He is certified by the American Board of Surgery with Added Qualifications in Surgical Critical Care.
Jonathan R. Thompson, MD, FACS
Associate Professor of Surgery
Medical Director of Bariatric Surgery

Dr. Thompson specializes in general surgery, with special interest and expertise in bariatric surgery and advanced laparoscopy. He is certified by the American Board of Surgery and is a member of the American Society for Metabolic and Bariatric Surgery.

Betty J. Tsuei, MD, FACS, FCCM
Professor of Surgery
Director, UCMC Surgical Critical Care

Dr. Tsuei specializes in trauma and surgical critical care and the care of injured and critically ill adult patients, with interests in ARDS, sepsis, multi-system organ failure, ventilator mechanics, and surgical education. She is certified in general surgery by the American Board of Surgery, with Added Qualifications in Surgical Critical Care.

Christina P. Williams, MD
Associate Professor of Surgery

Dr. Williams specializes in in general surgery, with special interest and expertise in critical care medicine, acute care surgery, and global surgery. She is certified in surgery by the American Board of Surgery.

The Division of General Surgery Research

The Department of Surgery at the University of Cincinnati (UC) has a long and distinguished history of surgical research that is recognized nationally and internationally. Premier surgeon-scientists and postdoctoral researchers are drawn to the UC Department of Surgery to pursue innovative and exciting research in state-of-the-art laboratories, with a focus on applying the discoveries made in the laboratory directly to the bedside for the advancement of patient care. Clinical trials not available elsewhere are also offered for a variety of surgical diseases, giving hope to patients with critical illness who were once considered untreatable.

The research mission is to generate new knowledge of the scientific basis of surgically-related disease and to provide outstanding scientific training for the surgeons and surgeon-scientists of the future. The primary objectives are: 1) to be on the cutting edge of surgical research; 2) to help develop new applications to clinical care; and 3) to provide outstanding research training for surgical residents and surgeon-scientists.

The Department of Surgery occupies 12,000 square feet of state-of-the-art research laboratories in the Surgical Research Unit, the Cardiovascular Center, and the Medical Sciences Building. Additional research space is utilized at the Cincinnati Children’s Hospital.
One of the primary research strengths of the section is in the field of injury biology. Our multidisciplinary team investigates the molecular and cellular mechanisms by which insults such as trauma and infection can lead to multiple organ failure and death. This group is comprised of both basic scientists and surgeon-scientists, thereby providing a comprehensive approach to scientific problems that have clinical significance. These investigators have multiple federally-funded research projects, including molecular mechanisms of hemorrhagic shock and the impact of novel resuscitation strategies, coagulation after traumatic brain injury, and alterations in immune function leading to chronic critical illness. Additionally, the Surgical Research Unit houses the Surgical Immune Monitoring Laboratory. The mission of this laboratory is to provide comprehensive immune monitoring 1) to associate clinical outcomes with immune metrics and 2) for personalized testing of potential immune modulating therapies. Currently, the laboratory conducts immune monitoring with colleagues from General Surgery, Vascular Surgery, Oral and Maxillofacial Surgery, Surgical Oncology, and Burn Surgery.

UC Institute for Military Medicine

Leveraging our unique expertise in injury biology, members of the division and their clinical colleagues in the division of trauma and critical care, as well as members of other UC departments, have partnered with various branches of the United States military to form the UC Institute for Military Medicine.

The mission of the Institute is to discover the scientific basis of severe injury and then utilize this knowledge in the care of combat casualties. Current research projects are centered on determining how combat-related traumatic injury can lead to changes at the cellular and molecular levels that contribute to increased rates of infection in multiple organ failure and death. These projects are funded by the Department of Defense, United States Air Force, Office of Naval Research, and the National Institutes of Health (NIH).

Research Training

An important part of the research mission of the Department of Surgery is the training of surgical residents and medical students from the UC College of Medicine, as well as visiting students and fellows from other national and international universities. Many of our surgical residents pursue a mentored 2- or 3-year research elective in the laboratory of one of our investigators or surgeon-scientists.

These research fellowships are supported by a T32 training grant from the National Institutes of Health as well as by individual grants from the NIH and various prestigious surgical organizations including the American College of Surgeons, the Society of University Surgeons, the Shock Society, Surgical Infection Society, and others. Surgical research conducted by surgical residents and other research fellows is highlighted by many platform and poster presentations at annual national meetings of the American College of Surgeons, the Association for Academic Surgery, the Society of University Surgeons, the Society for Surgical Oncology, the Society for Surgery of the Alimentary Tract, Shock Society, the American Heart Association, American Association for Cancer Research and the American Gastroenterology Association, among others, as well as numerous prestigious basic science conferences such as the Federation of American Societies of Experimental Biology.

Research within the department and related disciplines is showcased at the weekly Surgical Research conferences as well as at Surgical Grand Rounds.

Residents in the Laboratory 2022-2023

M. Ryan Baucom, MD (Mentor: Michael Goodman, MD)
Michela M. Carter, MD (Mentor: Fizan Abdullah, MD)
Ryan C. Chae, MD (Mentor: Timothy Pritts, MD, PhD)
Zishaan A. Farooqui, MD, PhD (Mentor: Takanori Takebe, MD, PhD)
Stephen J. Hartman, MD (Mentor: Greg Tiao, MD)
Kevin Kulshrestha, MD (Mentor: David Morales MD)
Adam D. Price, MD (Mentor: Michael Goodman, MD)
Mordechai G. Sadowsky, MD (Mentor: William Petraiulio, MD)
Emily J. Schepers, MD (Mentor: Alex Bondoc, MD)
Dhavan N. Shah, MD (Mentors: David Bentrem, MD & Hidayatullah Munshi, MD)
Stephanie Sisak, MD (Mentor: Timothy Pritts, MD, PhD)
Jenna N. Whitrock, MD (Mentor: Shimul Shah, MD)
2023 Resident Research Competition Awards

Department of Surgery Resident Research Awards for research presentations given at Surgical Grand Rounds on May 24, 2023.

**Basic Science:**

**Finalists were:**

1. Zishaan A. Farooqui, MD, PhD
2. Stephen J. Hartman, MD
3. Emily J. Schepers, MD
4. Stephanie Sisak, MD

**Winner: Stephanie Sisak, MD:** “Microvesicles from stored red blood cells induce P-selectin and Von Willebrand factor release from endothelial cells in a protein kinase C-dependent mechanism.”

**Clinical Section:**

**Finalists were:**

1. M. Ryan Baucom, MD
2. Zishaan A. Farooqui, MD, PhD
3. Kevin Kulshrestha, MD
4. Adam D. Price, MD

**Winner: Kevin Kulshrestha, MD:** “Up to an hour of donor CPR does not predict pediatric heart transplantation survival.”

---

**Other Resident Research Awards and Presentations 2022-2023**

Chae RC. 3rd Place for resident research competition at the Ohio Chapter of the American College of Surgeons, May 2023, Columbus, Ohio. “Supplementation with the polyphenol oleuropein fails to reduce the red blood cell storage lesion.” Chae RC, Sisak S, Schuster RM, Joseph B, Caldwell CC, Lentsch AB, Pritts TA.

Chae RC, Sisak S, Schuster RM, Joseph B, Lentsch AB, Caldwell CC, Goodman MD, Pritts TA. The whole is greater than the sum of its parts: the red blood cell storage lesion in whole blood and packed red blood cells plus plasma. Poster presentation. 46th annual conference on Shock, June 2023.

Kulrestha K. Cincinnati Children’s Heart Institute Executive Co-Directors’ Award for Fellow Poster Presentation, Third Place.

**Full-Time Research Faculty**

**Alex B. Lentsch, PhD**
Professor
BS – Biological Sciences, Northern Kentucky University
PhD – Physiology and Biophysics, University of Louisville
Postdoctoral Training – Immunopathology, University of Michigan
Research Interests – Inflammation, ischemia/reperfusion injury, hemorrhagic shock, sepsis

**Charles C. Caldwell, PhD**
Professor
BA – Chemistry, University of California, San Diego
PhD – Biochemistry, San Diego State University
Postdoctoral Training – Immunology, Laboratory of Immunology, NIAID, NIH
Research Interests – Host immune response to sepsis and trauma injury

**Michael D. Goodman, MD**
Professor
BS – Biology, Duke University
MD – University of Cincinnati
Fellowship – University of Texas Health Science Center
Research Interests – Traumatic brain injury, shock, hemorrhage and endotheliopathy

**Erich Gulbins, MD, PhD**
Professor
Chair and Director, Department of Molecular Biology, University of Essen, Germany
MD and PhD – University of Heidelberg, Heidelberg, Germany
Postdoctoral Training – Immunology, La Jolla Institute of Allergy and Immunology
Research Interests – Sphingolipids in surgical pathology

**Sameer H. Patel, MD**
Associate Professor
BS – Emory University
MD, Emory University
Fellowship – UT MD Anderson Cancer Center
Research Interests – Pancreas, hepatobiliary, gastrointestinal, and soft tissue malignancies

**Timothy A. Pritts, MD, PhD**
Professor
BS – Illinois Wesleyan University
MD – Northwestern University
Ph.D. – University of Cincinnati
Research Interests – Storage of the red blood cell lesion, resuscitation, and the inflammatory response to hemorrhage

**Gregory C. Wilson, MD**
Assistant Professor
BS – University of Dayton
MD – University of Louisville
Fellowship – University of Pittsburgh
Research Interests – Pancreatic cancer

Additional information on the section of general surgery can be viewed at med.uc.edu/department/surgery.
The Section of Oral and Maxillofacial Surgery

The section of oral and maxillofacial surgery is a center for evaluation, diagnosis, prevention and treatment of diseases, disorders and conditions of the oral cavity, maxillofacial area, and the adjacent and associated structures. Of late, the demands from the community have encouraged the section to provide oral healthcare beyond surgical services.

Through UC Health, the section offers services that include correction of dental facial deformities, treatment of maxillofacial pathology, as well as comprehensive care for maxillofacial trauma victims. The section’s practice at the UC Health Physicians Office in Clifton, Rookwood, West Chester and UC Health Holmes Hospital treats patients with dental facial deformities, trauma, dental implant needs, reconstructive jaw surgery, temporomandibular joint (TMJ) surgery, impacted teeth, and head and neck tumors. Pediatric maxillofacial surgical services are provided through Cincinnati Children’s hospital. The service also treats patients at the Veterans Affairs Medical Center in Cincinnati.

The section has expanded their services to include the management of oro-facial pain, non-surgical management of TMJ disorders, dental devices for sleep apnea, maxillofacial prosthodontics and anaplastology, and oral and maxillofacial pathology.

To increase the footprint of UC oral and maxillofacial surgery in our community, our surgeons have recently started seeing patients in our new Rookwood location in the Norwood/ Hyde Park area.

All locations contain surgical suites equipped with ambulatory anesthesia services and the latest in-office digital imaging capabilities.
History of the OMS Residency Training Program

The Division of Oral & Maxillofacial Surgery residency program has been in existence since 1913-14. John R. Callahan (1853–1918), who was a pioneer in the field of dentistry and particularly dental research in the late 19th and early 20th centuries, is credited with the founding of the program.

The training program first gained accreditation in 1957 by the Commission on Dental Accreditation (CODA) of the American Dental Association (ADA). Our program is the leading source for Oral & Maxillofacial education and patient care in the greater Cincinnati area.

Research

We are currently engaged in studying the following clinical and social impact areas:

• Use of buffered lidocaine in mandibular and maxillary extractions.
• Use of buffered lidocaine in the setting of odontogenic infections.
• Incidence of medication-related osteonecrosis of the jaw (MRONJ) in young adult and pediatric populations.
• Determining if deep space neck infection (DSNI) outcomes can be associated with temporal immune assays.
• The burden of cost placed on patients seeking care for facial trauma.
• The risks and complications associated with non-invasive positive pressure ventilation in patients with paranasal sinus and orbital fractures.
• Immunophenotyping inflammatory responses.

Grants

Recent Publications

Oral and Maxillofacial Surgery faculty and residents had several publications during the past year including these peer-reviewed journal articles:

Faculty

Deepak G. Krishnan, DDS, FACS
Professor of Clinical Surgery
Chief, Section of Oral and Maxillofacial Surgery
Director, Residency Program in Oral and Maxillofacial Surgery

Dr. Krishnan specializes in surgical correction of facial deformities, surgery of temporomandibular joint, facial trauma, pediatric maxillofacial surgery, oral and maxillofacial implantology, benign maxillofacial pathology and reconstructive surgery. He is certified by the American Board of Oral and Maxillofacial Surgery and is a Fellow of the American College of Surgeons. Dr. Krishnan serves in several prominent roles in multiple national and international professional organizations including as one of the directors of the American Board of Oral and Maxillofacial Surgery.

Michael J. Grau, Jr., DMD
Affiliate Associate Professor of Clinical Surgery at the VA

Dr. Grau, a Cincinnati native, received his advanced training in OMS at the University of Cincinnati. He practices a broad scope of OMS with a special interest in implantology, trauma and reconstruction. Dr. Grau is certified by the American Board of Oral and Maxillofacial Surgery. He recently stepped down as the program director for the residency program and has moved to the VAMC as an affiliate with the section.

Jimmie Harper, DDS, MS
Assistant Professor of Clinical Surgery

Dr. Harper received his dental degree from the Ohio State University School of Dentistry. Upon graduation, he served in the United States Air Force as a restorative dentist for three years. He returned to the Ohio State University in 1982 to train in Oral & Maxillofacial Surgery and completed his training in 1986. While at Ohio State, Dr. Harper was involved in research and completed the requirements for his Master of Science degree. During his chief year of residency, Dr. Harper received USAF sponsorship and upon graduation, he returned to active duty, serving as base Oral & Maxillofacial Surgeon at Carswell AFB in Ft. Worth, TX. Dr. Harper returned to Ohio in 1989 to join Cincinnati Oral & Maxillofacial Surgery, Inc.

Andres Flores Hidalgo, MS, DDS
Clinical Instructor- Oral and Maxillofacial Pathology

Dr. Flores is the latest member of the OMS team. He obtained his dental degree from the Central University of Venezuela, where he then pursued residency training in Oral Surgery from Case Western Reserve University School of Dental Medicine, followed by a fellowship in Molecular Pathology and Cytogenetics and Oral and Maxillofacial Pathology from University of North Carolina Chapel Hill. His services will be utilized in OMS, ENT, and Pathology.
Hether Khosa, DDS
Clinical Instructor

Dr. Khosa joined our faculty following her training at University of Maryland’s Oral and Maxillofacial Surgery residency program and the Adams Cowley Shock Trauma Center. She has a particular interest in management of facial trauma and brings skills such as TMJ arthroscopy and complex dental implant surgery. Dr Khosa is a diplomate of the American Board of Oral and Maxillofacial Surgery.

Mi Young Kim, DMD, CDT
Clinical Instructor – Oral and Maxillofacial Prosthodontics and Anaplastology

Dr. Kim obtained her dental degree from the University of Alabama at Birmingham, where she then pursued residency training in Prosthodontics followed by a fellowship in Maxillofacial Prosthodontics. Her services will be utilized in OMS, ENT, and Plastic Surgery to help rehabilitate patients following trauma and resections for head and neck pathology with prosthetic facial features and teeth.

Dave Morrison, DMD
Assistant Professor

Dr. Morrison, a Cincinnati native, is a recent addition to UC Oral and Maxillofacial Surgery. He received his Doctorate of Dental Medicine from the University of Kentucky. Dr. Morrison received his advanced training in OMS at the University of Texas Southwestern Medical Center. He obtained board certification by the American Board of Oral and Maxillofacial Surgery in 1996. Currently Dr. Morrison is the Vice President of the American Association of Oral and Maxillofacial Surgeons.

James A. Phero, Jr., DDS, MD
Assistant Professor

A Cincinnati native, Dr. Phero returns home after spending the last 10 years in Chapel Hill, North Carolina, where he attended Dental and Medical Schools at the University of North Carolina, Chapel Hill, and obtained his OMS training focused on orthognathic surgery, TMJ surgery and management of benign maxillofacial pathology. Dr. Phero is a diplomate of the American Board of Oral and Maxillofacial Surgery.

Gary S. Robins, DMD
Volunteer Assistant Professor of Surgery

Dr. Robins is a highly accomplished provider in the diagnosis and management of orofacial pain, temporomandibular disorders (TMD) and dental sleep medicine. He has been affiliated with the department since 1981. Dr. Robins also has appointments with the Headache and Facial Pain Program within the UC Neuroscience Institute. Dr. Robins’ practice is limited to the management of patients who have orofacial pain and TMD, but he also works with Sleep Physicians (since 1996) who diagnose obstructive sleep apnea and has made over 1,000 oral sleep appliances since that time for patients who have difficulty with or do not want to use a CPAP (continuous positive airway pressure) machine.

Jue Wang, DDS, PhD
Affiliate Assistant Professor – Orthodontics

Dr. Wang is a craniofacial orthodontist based at CCHMC. She treats children and young adults who need braces, including those who need jaw surgery, and those with cleft lip and palate or craniofacial syndromes. She is well published and clinically active but always finds time to partake in resident education and leads the monthly orthognathic surgery case conference for the division.

Alexa Allen, CNP
Nurse Practitioner

Ms. Allen was first an RN in OMS and subsequently serves as the division’s nurse practitioner. Alexa maintains a busy practice of outpatient surgical consults and inpatient post-surgical education following major surgery.

Volunteer Faculty:

Krishnamurthy Bonanthaya, MBBS, MDS, FDSRCS, FFDRCS
Randall Stasny, DMD

Emeriti Faculty:

Robert Horton, DDS
Robert D. Marciani, DMD

Additional information on the section of oral and maxillofacial surgery can be viewed at med.uc.edu/depart/surgery
Minimally invasive surgery is routinely performed and includes procedures for congenital anomalies, Hirschsprung’s disease, imperforate anus, inflammatory bowel disease, anti-reflux surgery, and lung resections.

The CCHMC colorectal program was one of the first centers established in the country focused on pediatric colorectal disease attracting national and international referrals. With a focus on imperforate anus, inflammatory bowel disease and motility disorders along with bowel management, they remain one of the busiest programs in the country.

The CCHMC Fetal program recently established a maternal delivery unit at CCHMC, making it one of the few programs in the country with this service line in a freestanding children’s hospital. The in-utero procedures offered include fetoscopic tracheal occlusion, myelomeningocele repair, EXIT procedures, and lung and tumor resections.
The CCHMC Solid Organ Transplant program is recognized as one of the premier pediatric liver and kidney transplant programs in the world, having transplanted over 700 liver and kidney transplant recipients, respectively. The Pancreas Care center, a collaborative program with the division of Hepatology and Gastroenterology, provides comprehensive evaluation for patients with pancreatitis and offers the total pancreatectomy islet autotransplant procedure.

The CCHMC Comprehensive Weight Management Program provides clinical evaluation of significantly overweight children, emphasizing behavioral approaches to modify eating habits and physical activities. The Bariatric Surgery Center provides minimally invasive and open surgical options to achieve weight loss in severely obese adolescents who have been unsuccessful with other approaches.

The CCHMC Chest Wall Deformity Center of Cincinnati provides clinical evaluation of children and adults, as well as minimally invasive surgery (Nuss procedure) for pectus excavatum patients. Cincinnati Children's Hospital is one of the leading hospitals in the country to offer a non-surgical method to correct pectus carinatum.

The affiliate section of pediatric surgery continues to draw research funding from both intramural and extramural agencies. Several state and local grants fund injury prevention and trauma research programs. The annual extramural research funding for the section exceeds $2 million per year, with six investigators receiving NIH funding.

These unique capabilities have made the Pediatric Surgery Residency Training Program one of the top programs in North America for pediatric surgeons.

Faculty

**Daniel von Allmen, MD, FACS**

Professor of Surgery and Pediatrics

Lester Martin Chair of Pediatric Surgery

Surgeon-in-Chief, Cincinnati Children's Hospital Medical Center

Dr. von Allmen specializes in pediatric surgical oncology, pediatric inflammatory bowel disease, surgical innovation, surgical robotics, and quality improvement. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

**Gregory M. Tiao, MD, FACS**

Professor of Surgery

Frederick C. Ryckman Chair of Pediatric Surgery

Division Director, Pediatric General & Thoracic Surgery

Surgical Director, Pediatric Liver and Intestine Transplantation Program

Associate Director, Pediatric Surgery Fellowship

Dr. Tiao specializes in liver, kidney and small bowel transplantation, hepatic-based malignancies, hepatobiliary disease with a focus on biliary atresia, and neonatal surgery. His NIH-funded laboratory investigates the mechanisms of biliary atresia formation. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery and the American Society of Transplant Surgery.

**Alex Bondoc, MD**

Associate Professor of Surgery

Surgical Director, Pediatric Renal Transplantation Program

Dr. Bondoc specializes in liver, kidney and small bowel transplantation, hepatobiliary surgery, and minimally invasive surgery. His research effort is focused on the pathophysiology of hepatoblastoma. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery and the American Society of Transplant Surgery.
Rebeccah L. Brown, MD
Professor of Surgery and Pediatrics
Associate Director, Pediatric Trauma Service

Dr. Brown specializes in general pediatric surgery, trauma, injury prevention, chest wall deformities and minimally invasive surgery. She is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

Richard A. Falcone, Jr., MD
Professor of Surgery
Chief of Staff

Dr. Falcone specializes in pediatric trauma, colorectal disorders, inflammatory bowel disease, and minimally invasive surgery including laparoscopy, ECMO, neonatal surgery, and surgical oncology. His research interests include health disparities in pediatric injury, trauma education through simulation, anorectal malformations, and injury prevention. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

A. Roshni Dasgupta, MD
Professor of Surgery
Associate Division Director, Pediatric & Thoracic Surgery
Surgical Director, Vascular Malformations Center
Director, Vascular Malformations and Oncology Subspecialty Fellowship

Dr. Dasgupta specializes in pediatric surgical oncology, hemangiomas and vascular malformations, and NSQIP quality improvement. She is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

Suzanne E. Evans, MD
Assistant Professor of Surgery

Dr. Evans specializes in liver, kidney, and intestinal transplant surgery. She is certified by the American Board of Surgery, with Added Qualifications in the American Society of Transplant Surgery.

Jason S. Frischer, MD
Professor of Surgery and Pediatrics
Associate Division Director, Pediatric & Thoracic Surgery
Director, Colorectal Center
Director, Colorectal Subspecialty Fellowship
Director, Extracorporeal Membrane Oxygenation (ECMO) Program

Dr. Frischer specializes in congenital anorectal malformations, minimally invasive surgery, inflammatory bowel disease, and neonatal critical care. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

Laura A. Galganski, MD
Assistant Professor of Surgery

Dr. Galganski specializes in fetal and neonatal surgery. She is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.
**Victor F. Garcia, MD, FACS**  
Professor of Surgery and Pediatrics  
Director Chest Wall Deformities Center  
Founding Director, Pediatric Trauma Services

Dr. Garcia specializes in pediatric trauma, injury prevention, chest wall deformity, minimally invasive surgery, surgical weight loss, and minority health care. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery and Surgical Critical Care.

**Michael A. Helmrath, MD, FACS**  
Professor of Surgery  
Richard and Geralyn Azizkhan Chair of Pediatric Surgery  
Director of Surgical Research  
Surgical Director, Intestinal Rehabilitation Center  
Director, Center for Stem Cell & Organoid Medicine (CuSTOM)

Dr. Helmrath specializes in short bowel syndrome. His primary research interests are in intestinal stem cells and organoids with a clinical research effort focused on morbid obesity. He has multiple grants from the NIH and leads the CUSTOM effort at CCHMC in which organoids based translational research is being converted into direct patient care. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

**Aaron P. Garrison, MD**  
Associate Professor of Surgery  
Director, Pediatric Surgery Fellowship  
Surgical Director, Burnet Campus

Dr. Garrison specializes in pediatric colorectal and esophageal surgery. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

**Meera Kotagal, MD**  
Assistant Professor of Surgery  
Director, Trauma Services  
Director, Pediatric Surgery Global Health Program  
Director, Pediatric Surgery International Fellowship

Dr. Kotagal specializes in pediatric surgical oncology and neonatal surgery. Her research focus is global health and she has established a global outreach effort in Uganda. Additionally, she is conducting research on trauma outcomes within the local pediatric population. She is certified by the American Board of Surgery with Added Qualifications in Pediatric Surgery.

**Juan Gurria, MD**  
Assistant Professor of Surgery  
Director, Surgical Critical Care  
Director, Surgical Critical Care Fellowship

Dr. Gurria specializes in pediatric trauma, chest wall deformities, pancreatic disease, and general pediatric surgery. He also has a special focus in critical care and clinical outcomes research. He is certified by the American Board of Surgery.
**Foong-Yen Lim, MD**  
Professor of Surgery  
Surgical Director, Fetal Care Center of Cincinnati  
Director, Fetal Surgery Subspecialty Fellowship  

Dr. Lim specializes in fetal and neonatal surgery, lung malformations, diaphragmatic hernia, neonatal tumors, minimally invasive surgery, and ECMO. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

**Jonathan Merola, MD, PhD**  
Assistant Professor of Surgery  

Dr. Merola specializes in liver, kidney, and intestinal transplant surgery. He is conducting research focused on hepatocyte transplant and modifying organs to make them last longer and less prone to rejection. He is certified by the American Board of Surgery, with Added Qualifications from the American Society of Transplant Surgery.

**Jose L. Peiro, MD**  
Professor of Surgery  
Cincinnati Fetal Center Director – Endoscopic Fetal Surgery  

Dr. Peiro specializes in fetal surgical procedures including the treatment of myelomeningocele and diaphragmatic hernia. He has developed innovative minimally invasive fetal procedures and directs a laboratory effort examining fetal neural and pulmonary development, as well as new potential fetal therapies. His R01 focuses on the development of a smart patch for in utero treatment of myelomeningocele.

**Todd Ponsky, MD**  
Professor of Surgery  

Dr. Ponsky specializes in minimally invasive surgery, surgical innovation, and quality improvement. He is a pioneer in education, establishing the Globalcast Education Enterprise, an internet-based platform to advance the care of children around the world. He is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

**Beth Rymeski, DO**  
Associate Professor of Surgery  
Surgical Director, NICU Colorectal Center for Children  
Associate Surgical Director, Fetal Care Center  

Dr. Rymeski specializes in fetal and colorectal surgery. She is currently conducting research on treatment algorithms for both ovarian neoplasms and pilonidal cysts. She is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

**Soona Shin, PhD**  
Associate Professor of Surgery  

Dr. Shin specializes in liver cancer and liver stem cell research. She was awarded an R37 grant from the NIH focused on progenitor cells and the development of HCC.

**Nikolai Timchenko, PhD**  
Professor of Surgery  
Leader of Liver Tumor Program  

Dr. Timchenko specializes in liver biology. His work investigates mechanisms of liver cancer, liver proliferation after surgical resections, and non-alcoholic fatty liver disease.

**Paul Wales, MD**  
Professor of Surgery  
Zeigler Chair of Pediatric Surgery  
Surgical Co-Director, Intestinal Rehabilitation Center  

Dr. Wales specializes in intestinal rehabilitation. His primary research interests are in short gut syndrome and the rehabilitation from intestinal loss. He partners with Dr. Helmrath in the translational clinical research effort by which intestinal organoids are applied to disease processes. He is certified by the Royal College of Physicians and Surgeons of Canada, with Added Qualifications in Pediatric Surgery.

**Ashley E. Walther, MD**  
Assistant Professor of Surgery  
Surgical Lead, Aerodigestive and Esophageal Center  
Co-Director, Center for Bariatric Surgery  

Dr. Walther specializes in bariatric, aerodigestive, and esophageal surgery. She is certified by the American Board of Surgery, with Added Qualifications in Pediatric Surgery.

Additional information on the affiliate section of pediatric surgery can be viewed at med.uc.edu/depart/surgery.
The Section of Plastic, Reconstructive and Hand Surgery/Burn Surgery

The section of plastic, reconstructive and hand surgery/burn surgery is composed of Cincinnati Children’s Hospital Medical Center and the University of Cincinnati (UC) Medical Center. Collaboration among our group members has been a defining strength of academic plastic surgery at the University of Cincinnati since the group was founded by Dr. Henry W. Neale in 1978.

Cincinnati Children’s Hospital Medical Center

The world-renowned group at Cincinnati Children’s Hospital includes a dynamic basic and translational research group. Ongoing work on bone engineering from adipose-derived stem cells and on minimally invasive craniofacial surgery has been presented at both national and international plastic surgery meetings.

Faculty:

Brian S. Pan, MD
Associate Professor of Surgery
Division Chief, Cincinnati Children’s Hospital Medical Center

Dr. Pan’s practice focuses on craniofacial pediatric plastic surgery. He is certified by the American Board of Plastic Surgery.

Ann Schwentker, MD
Professor of Surgery
Director, Plastic Surgery Residency Program

Dr. Schwentker’s practice focuses on pediatric plastic surgery, with an emphasis on brachial plexus reconstruction and ear reconstruction. She is certified by the American Board of Plastic Surgery.
University of Cincinnati Medical Center

UC Medical Center’s division of plastic surgery is a crucial component of our Level I Trauma Center and the Barrett Cancer Center. The division also continues its collaborative effort with the UC Health Drake Center, Cincinnati’s primary rehabilitative center for complex wound care.

The faculty of the division of plastic surgery are an integral component of the Women’s Center on the campus of West Chester Hospital. Body contouring after weight loss and the full line of aesthetic services are provided there as well.

Faculty:

**Sonu A. Jain, MD**  
Professor of Surgery  
Chief, Section of Plastic, Reconstructive and Hand Surgery/Burn Surgery  
Director, Division of Plastic and Reconstructive Surgery  
(Effective 1/1/2024)

Dr. Jain specializes in disorders of the hand and wrist, with interest in also helping patients with arthritis, trauma, tendonitis, compression neuropathy and skin cancer. Dr. Jain is certified by the American Board of Plastic Surgery with certificate of added qualification in surgery of the hand.

**W. John Kitzmiller, MD**  
Professor of Surgery  
Dr. Kitzmiller’s practice includes complex reconstructive surgery as well as cosmetic surgery of the face and body. He is certified by the American Board of Plastic Surgery with certificate of added qualification in surgery of the hand.

**Ryan M. Gobble, MD**  
Associate Professor of Surgery  
Dr. Gobble specializes in facial and breast reconstructive surgery as well as cosmetic surgery of the face and body. He has research interests in improving outcomes after reconstructive and cosmetic breast implant surgery. Dr. Gobble is certified by the American Board of Plastic Surgery.

**Uzar Qazi, MD**  
Assistant Professor of Surgery  
Dr. Qazi specializes in hand and burn surgery and is Fellowship trained in Hand as well as Burn Surgery.

Research Faculty:

**George F. Babcock, PhD**  
Professor of Surgery Emeritus  
Adjunct Associate Professor of Pathology

Dr. Babcock’s research interest is in the immunologic consequences of burns, infectious disease, and transplantation, including the role of neutrophil and macrophage adhesion in host defense.
Samantha A. Brugman, PhD
Assistant Professor, Plastic Surgery Research Faculty
Cincinnati Children's Hospital Medical Center

Dr. Brugman's research focuses on craniofacial development.

Rulang Jiang, PhD
Professor, Developmental Biology
Cincinnati Children's Hospital Medical Center

Dr. Jiang specializes in molecular developmental biology, and interfaces between the divisions of plastic surgery and developmental biology.

Yu Lan, PhD
Associate Professor, Plastic Surgery Research Faculty
Cincinnati Children's Hospital Medical Center

Dr. Lan's research centers on the molecular mechanisms behind craniofacial development.

Dorothy M. Supp, PhD
Adjunct Research Associate Professor
Research Scientist, Cincinnati Children's Hospital Medical Center

Dr. Supp's research focuses on genetic engineering of cultured skin substitutes.

Volunteer Clinical Faculty:

Kurtis W. Martin, MD
Clinical Instructor of Surgery
Private Practice

Binh Nguyen, MD
Clinical Instructor of Surgery
Private Practice

Kevin A. Shumrick, MD
Clinical Instructor of Plastic Surgery
Private Practice

Additional information on the section of plastic surgery can be viewed at med.uc.edu/depart/surgery.
The Section of Surgical Oncology

The section of surgical oncology delivers compassionate state-of-the-art care to patients with cancer and allied diseases, and has the distinction of offering clinical programs that draw patient referrals from across the United States, particularly in the Midwest. Our nationally known physicians are all board certified in general surgery and have supplemental fellowship training in cancer surgery. Recognized by Best Doctors in America, as well as by the journals Cincinnati and Cincy Magazine as top doctors in Cincinnati, our physicians and staff provide an outstanding level of care and work closely with other medical disciplines.

Clinical and basic science research by the section’s faculty and interdisciplinary collaborations with other researchers in the surgery department and the UC College of Medicine have gained national attention. Patients are offered state-of-the-art treatment protocols and access to innovative clinical trials as part of the UC Cancer Center.

The section of surgical oncology is headquartered at the University of Cincinnati Cancer Center, a comprehensive cancer treatment center accredited by the American College of Surgeons. The majority of operative procedures are performed at University of Cincinnati Medical Center, UC Health West Chester Hospital and The Christ Hospital. The section also provides physician staffing at the UC Health Physicians Office North and Women's Health Center on our West Chester campus to meet the needs for surgical oncology services in northern Cincinnati suburbs.

The University of Cincinnati has formed a strategic partnership with Cincinnati Children's Hospital Medical Center and UC Medical Center to establish the University of Cincinnati Cancer Center (UCCC), a joint cancer center that coordinates oncology care from childhood to adulthood in southern Ohio and beyond. By leveraging the individual cancer strengths of each institution, the UCCC is able to provide innovative multidisciplinary cancer research and highly specialized patient care for children and adults in our region. Together, the UCCC is able to advance care faster, especially for those with complex disease. The vision of the UCCC is to create a world class cancer center leading in innovation to eliminate cancer, with a goal of achieving the highly prestigious National Cancer Institute designation.
The surgical oncology section offers:

- Surgical care for benign and malignant diseases of the thyroid, parathyroid, adrenal glands and pancreas. Dr. Tammy Holm is the only specialty trained endocrine surgeon in Cincinnati.

- Leading-edge therapy for esophageal, colorectal, small bowel and gastric tumors.

- Personalized therapy for primary and recurrent cancers involving the liver, colon, and peritoneum.

- One of the highest volume pancreas surgery practices in the nation.

- Advanced surgical treatments for melanoma, sarcoma and other serious skin and soft tissue malignancies, including being the only site for isolated hyperthermic limb infusion procedures in the Greater Cincinnati area.

- Techniques such as hyperthermic intraperitoneal chemotherapy (HIPEC) for the treatment of primary and metastatic peritoneal malignancies and carcinomatosis. We are the highest volume center in Cincinnati for HIPEC.

- Participation in UC Cancer Center multidisciplinary pancreas, liver, and esophageal disease centers where patients can be seen by physicians from multiple specialties all in one office visit to help quickly begin an optimally sequenced treatment plan without repetitive testing.

- One of the few national sites performing total pancreatectomy and islet cell transplantation for chronic pancreatitis. We have one of the largest experiences in the world with this procedure.

- Surgical resection of the breast can be coordinated with immediate reconstruction by our plastic surgeons, should the patient be eligible from a cancer and reconstructive perspective.

- Discussions of complex patient treatment plans at tumor board conferences for all major cancer types.

- Minimally invasive cancer surgery approaches for the pancreas, liver, esophagus, stomach, spleen, adrenal gland and colon.

- Robotic surgery for liver, pancreas, stomach, and esophageal diseases.

Faculty

**Syed A. Ahmad, MD, FACS**
Professor of Surgery  
Chief, Section of Surgical Oncology  
Vice Chair for Faculty Development  
The Hayden Family Endowed Chair for Cancer Research  
Co-Director, University of Cincinnati Cancer Center

Dr. Ahmad specializes in the treatment of patients with gastrointestinal, pancreatic and liver cancer. He is certified by the American Board of Surgery and fellowship trained in Surgical Oncology.

**Alicia Heelan, MD, MS**
Assistant Professor of Surgery

Dr. Heelan specializes in the treatment of breast disease from benign disease to high-risk lesions to malignancy. She also has a particular interest in surgical oncology. She is certified by the American Board of Surgery and fellowship trained in Breast Oncology.

**Tammy M. Holm, MD, PhD, FACS**
Associate Professor of Surgery  
Assistant Professor of Cancer Biology

Dr. Holm specializes in treating patients with thyroid, parathyroid, and adrenal disease. She is certified by the American Board of Surgery and fellowship trained in Endocrine Surgery.

**Jaime D. Lewis, MD, FACS**
Associate Professor of Surgery  
Career Advisor, Office of Student Affairs

Dr. Lewis specializes in the treatment of benign and malignant breast diseases. She also has a particular interest in high-risk genetic conditions that predispose to the development of breast cancer and preserving fertility for female cancer patients. She is certified by the American Board of Surgery and fellowship trained in Breast Oncology.
**Sameer H. Patel, MD, FACS**  
Associate Professor of Surgery

Dr. Patel specializes in all aspects of surgical oncology. He is certified by the American Board of Surgery, fellowship trained, and Board Certified in Surgical Oncology as well as by the American Board of Medical Quality.

**Elizabeth A. Shaughnessy, MD, PhD, FACS**  
Professor of Surgery  
Vice Chair for Patient Experience

Dr. Shaughnessy specializes in the treatment of benign and malignant breast diseases, as well as those at high risk for breast cancer development who desire risk reduction surgery. She is certified by the American Board of Surgery and fellowship trained in Surgical Oncology.

**Jeffrey J. Sussman, MD, FACS**  
Christian R. Holmes Professor of Surgery  
Director, Residency Program in General Surgery  
Vice Chair for Education

Dr. Sussman specializes in treatment of melanoma, sarcoma, complex gastrointestinal cancers, pancreas cancers, and peritoneal surface malignancies. He is certified by the American Board of Surgery and fellowship trained in Surgical Oncology.

**Gregory C. Wilson, MD**  
Assistant Professor of Surgery

Dr. Wilson specializes in pancreatic and hepatobiliary surgery, with expertise in minimally invasive and robotic surgery. He is certified by the American Board of Surgery and fellowship trained in Surgical Oncology.

Additional information on the section of surgical oncology can be viewed at [med.uc.edu/depart/surgery](http://med.uc.edu/depart/surgery).
Department of Surgery

Surgical Robotics Week

September 18 – 22

Sponsored by

INTUITIVE
The Section of Transplantation

The section of transplantation provides services of end-organ failure with multi-organ transplant services including kidney, pancreas and liver transplantation, as well as a variety of non-transplant surgical services. Our surgeons have special expertise in living donor surgery including kidney and liver, laparoscopic nephrectomy, laparoscopic and open hepatobiliary surgery, general surgery, immunosuppressive drug development, corticosteroid elimination, dialysis access surgery, and active kidney exchange programs. The section performs over 240 kidney transplants and approximately 150 liver transplants per year with outstanding survival and quality metrics. The group has established itself as one of the premier transplant programs in the country with high volume transplants, low wait-list mortality, and leading programs in transplant oncology and dialysis access.

Beyond an active clinic program, the section has active research programs in many diverse areas. The Cincinnati Research in Outcomes and Safety in Surgery (CROSS) was established in 2012 and has studied disparities in care, utilization and practice paradigms in tertiary surgery and comparative effectiveness. The group also has an active and large program around metabolic surgery in end-organ failure and has published landmark results in this area, providing access to obese patients needing transplantation. The group also has developed expertise with an education/work performance platform with CREST under the leadership of Dr. Quillin. The section has a very active research program that has pioneered the use of plasma cell targeted therapy for desensitization in highly sensitized transplant recipients and for the treatment of antibody mediated rejection. Our research program has also successfully conducted the first multicenter trial of steroid and calcineurin inhibitor free immunosuppression (BEST Trial).

The section provides leadership to the Israel Penn Center for Transplant Oncology, the largest and most comprehensive transplant tumor registry in the world, and has made a permanent commitment to preserve the function of the IPCTO by hiring and supporting faculty whose academic careers support IPCTO-related objectives.

Shimul A. Shah, MD, MHCM
Professor of Surgery
James and Catherine Orr Endowed Chair in Liver Transplantation
Chief, Section of Solid Organ Transplantation, Department of Surgery
Vice Chair of Health Services Research
Shimul.Shah@uc.edu
513-558-3993
Liver Transplantation and Hepatobiliary Surgery

The section has excelled in the area of surgery for benign and malignant tumors of the pancreas, liver and biliary tree, having performed over 1,000 advanced hepatobiliary surgical procedures. It is one of the busiest programs in the country and recently launched their living donor liver transplant program. The Liver Transplant Program provides multidisciplinary, specialized patient-centered care for end-stage liver disease (ESLD). Our historic program has focused on innovation, expert clinical care and research over the past 20 years.

The section recently developed a program in transplant outcomes research. A number of research projects are currently ongoing, including a study of utilization and cost effectiveness in liver transplantation and an innovative program in telehealth and smart technology. The section has published the largest series of HCV positive transplants in seronegative recipients in the world. A living donor liver transplant program has been established as well this year. We also performed the first portal hypothermic perfusion liver transplant in the United States in 2019.

Kidney and Pancreas Transplantation

The section has grown by 10% in the last two years and continues to innovate with living donor nephrectomies, immunosuppressive drug development, and use of HCV positive transplants in seronegative patients. Simultaneous kidney-pancreas, pancreas after kidney, and solitary pancreas transplants are performed by section faculty. The section has also developed a dedicated Sensitized Patient Clinic for potential kidney transplant patients who are highly sensitized to HLA antigens. This is one of a very small number of such dedicated clinics in the United States and offers kidney exchange as both clinical and research-based desensitization.

Faculty

**Shimul A. Shah, MD, MHCM**
Professor of Surgery
James and Catherine Orr Endowed Chair in Liver Transplantation
Chief, Section of Solid Organ Transplantation, Department of Surgery
Vice Chair for Health Services Research

Dr. Shah specializes in solid-organ (liver, pancreatic, and kidney) transplantation, hepatobiliary surgery and laparoscopic surgery. He has a strong research interest in the epidemiology of liver cancer and outcomes-based research. He is certified by the American Board of Surgery.

**E. Steve Woodle, MD**
Professor of Surgery
William A. Altemeier Chair in Surgery
Director, Solid Organ Transplantation, UC Health
Director, Israel Penn Center for Transplant Oncology

Dr. Woodle specializes in solid-organ transplantation with a focus on living donor kidney transplantation. His research efforts include clinical and translational research focused on plasma cell targeted therapies for antibody mediated rejection and desensitization, simultaneous calcineurin inhibitor avoidance/early steroid withdrawal, T cell receptor mediated immune modulation, and effector memory T cell therapies. He is certified by the American Board of Surgery.

**Alex L. Chang, MD**
Assistant Professor of Surgery

Dr. Chang specializes in abdominal organ transplantation, hepatobiliary, vascular access, and general surgery. His research interests include clinical and translational transplant surgery, transplant immunosuppression, immunosuppression withdrawal, ischemia/reperfusion and rejection. He is certified by the American Board of Surgery.
Madison Cuffy, MD, MBA
Associate Professor of Surgery
Director, Kidney Transplantation, The Christ Hospital
Vice Chair for Diversity, Equity, Inclusion

Dr. Cuffy specializes in solid-organ (pancreatic, liver, and kidney) transplantation and dialysis access surgery. He is director of the kidney transplant program both at UC and The Christ Hospital. He focuses his efforts on disparities in care and leads the diversity, equity and inclusion for the department. He is certified by the American Board of Surgery.

Kristina H. Lemon, MD
Assistant Professor of Surgery
Director, Transplant Fellowship Program

Dr. Lemon specializes in solid organ (pancreatic, liver, and kidney) transplantation, hepatobiliary surgery and laparoscopic surgery. Her focus outside of the operating room is in education, work efficiency, and systems improvement in transplantation. Dr. Lemon serves as transplant fellowship director.

Robert L. Plews, MD
Assistant Professor of Surgery

Dr. Plews is new to UC and specializes in solid organ (pancreas & kidney) transplantation, laparoscopic surgery, and dialysis access surgery. He is certified by the American Board of Surgery.

R. Cutler Quillin, III, MD
Associate Professor of Surgery
Director of Liver Transplantation

Dr. Quillin specializes in solid organ (pancreatic, liver, and kidney) transplantation, hepatobiliary surgery, and laparoscopic surgery. His research is focused on educational simulation and understanding competency in surgical technique. He is certified by the American Board of Surgery.

Latifa A. Sage Silski, MD
Associate Professor of Surgery
Medical Student Clerkship Director

Dr. Silski specializes in solid organ (pancreatic, liver, and kidney) transplantation, laparoscopic surgery, and dialysis access surgery. She is certified by the American Board of Surgery.

Nicole S. Ejaz, PharmD
Research Assistant Professor

Dr. Ejaz is currently serving on the Board of Directors for the IPITTR. Her individual research efforts focus specifically on antihumoral therapy.

Adele Rike Shields, PharmD
Research Associate Professor
Clinical Transplant Pharmacist at Christ Hospital

Dr. Shields is supervisor of kidney transplant clinical trials at The Christ Hospital. She also has research interests in cardiovascular disease following kidney transplantation.

Additional information on the section of transplantation can be viewed at med.uc.edu/depart/surgery.
The Section of Urology

The University of Cincinnati section of urology has repeatedly been ranked among the top 50 urology programs in the United States by U.S. News & World Report. The section has long been serving patients in the community and the region and providing state-of-the-art treatments in the areas of pediatric urology, female pelvic medicine and reconstructive surgery, genitourinary trauma and reconstruction, men’s health, urologic oncology, endourology and general urology. Additionally, UC Urology is currently involved in multiple clinical trials evaluating new therapies in neurogenic bladder, voiding dysfunction, prostate cancer and renal cell carcinoma, the latter in collaboration with the University of Cincinnati Cancer Center (UCCC).

Dr. Ayman Mahdy, a fellowship-trained specialist in female pelvic medicine and reconstructive surgery, continues to provide advanced management in the areas of voiding dysfunction (for both men and women), neurogenic bladder, and genitourinary reconstruction. Dr. Mahdy also offers the most advanced treatment options (including non-invasive and minimally invasive) for voiding dysfunction in patients with BPH including Holmium Laser Enucleation of the Prostate (HoLEP), a procedure that requires a high skill set. In addition, Dr. Mahdy and his dedicated team of specialized Advanced Level Providers, nursing and staff provide specialized care to patients with neurogenic bladder, urine incontinence and other female pelvic floor disorders. In collaboration with the Department of ObGyn, the dedicated UC Health Pelvic Floor Center launched in September 2021 at the West Chester Campus to provide a multidisciplinary approach to treating women with pelvic floor disorders. The section also offers a multidisciplinary neurogenic bladder clinic in collaboration with the divisions of physical medicine and rehabilitation, occupational therapy and physical therapy. This clinic has been serving as a one-stop-shop to our neurogenic bladder population for almost a decade now.

Our dedicated uro-oncologists – Drs. Mohammed Kamel and Nilesh Patil – are fellowship trained in uro-oncology and treat advanced urologic cancer conditions using the most up-to-date technology and evaluation tools. These include robotic surgery and prostate cancer focal therapy.
Working closely with the Department of Radiology in the area of MRI prostate imaging, we have established a specialized program in MRI-targeted, ultrasound (US) guided prostate biopsy which increases the accuracy and efficiency of the diagnosis of prostate cancer. Targets identified by MRI are marked on saved images and used as an overlay provided by the image fusion technology known as Artemis during US-guided biopsy procedures. We have also established a program for using MRI of the prostate in managing nonaggressive prostate cancer with Active Surveillance. Men with low-grade prostate cancer can postpone or avoid prostate surgery or radiation, but be monitored and treated should the prostate cancer progress in volume or pathologic grade. Active Surveillance is the first line of management discussed in appropriate cases.

The division of urology established a multidisciplinary prostate cancer specialty clinic in which several disciplines including urology, radiation oncology, radiology, and pathology share in the evaluation of men with prostate cancer and guidance in choice of management, including:

Urology – Active surveillance, focal prostate cancer ablation combined with MRI targeting, robot-assisted laparoscopic prostatectomy.

Radiation Oncology – Radiation therapy including brachytherapy, external beam radiation therapy, and proton beam radiation therapy.

Dr. Wesley Baas, a fellowship-trained urologist in the areas of men’s health and reconstruction, joined our division in August 2021 to lead the men’s health program. This program has been a great service to our male patients with sexual dysfunction, infertility and other men’s urologic health issues. Dr. Baas runs a multidisciplinary clinic in conjunction with the division of Reproductive Endocrinology and Infertility in the department of Ob/Gyn.

Dr. Courtney Plattner specializes in open and minimally invasive surgeries of the urologic patient. As the Director of the UC Urology Residency Program, she continues to mold the residency program to best serve our residents, with innovations in curriculum, mindfulness and well-being, and teaching – enlisting stakeholders to invest in creating a cohesive resident and faculty team with focus on education, quality patient care, and a safe hospital environment.

The division also receives national and international visiting scholars and observers to promote their academic career and clinical skills.

Faculty

Ayman Mahdy, MD, PhD, MBA
Professor of Clinical Surgery
Interim Chief, Section of Urology
Director, Voiding Dysfunction and Female Urology
Director of Urology, West Chester Hospital
Residency Program Educational Site Director, West Chester Hospital

Dr. Mahdy specializes in urinary incontinence, voiding dysfunction, urinary reconstruction and women’s urological disorders. He also performs endourologic procedures for BPH and male urethral strictures.

Mohammed Kamel, MD
Professor of Surgery

Dr. Kamel specializes in cancers of the prostate, kidney, adrenal, bladder, testis and penis. He is currently studying the outcomes of robotic radical cystoprostatectomy in bladder cancer patients with a focus on the elderly.

Nilesh Patil, MD
Professor of Clinical Surgery

Dr. Patil specializes in robotic surgery, urologic oncology, stone disease, and prostate disorders. His interests include prostate MRI imaging and MRI-targeted ultrasound-guided prostate biopsies and active surveillance.
Courtney A. Plattner, MD  
Assistant Professor of Surgery  
Director, Urology Residency Program  

Dr. Plattner specializes in general urology and performs minimally invasive, endourologic, and microscopic surgeries. Her special interests include urinary stone disease, bladder dysfunction, and men’s health issues. She is certified by the American Board of Urology.

Wesley Baas, MD  
Assistant Professor of Urology  
Director of Men’s Health Program  

Dr. Baas is fellowship trained and specializes in genitourinary reconstruction, male infertility, and male sexual dysfunction.

Pediatric Urology  

Under the directorship of Dr. Pramod Reddy, the Cincinnati Children’s pediatric urology program is ranked No. 1 in the 2023-2024 list of Best Children’s Hospitals published by U.S. News & World Report. The division performs the entire spectrum of pediatric urologic surgery. The world-renowned full-time pediatric urologists practice at Cincinnati Children’s Hospital Medical Center, one of the largest and most prestigious pediatric facilities in the nation.

Pediatric Urology Faculty  

Pramod P. Reddy, MD, FACS  
Professor of Clinical Surgery  
Director, Division of Pediatric Urology  

Dr. Reddy specializes in general pediatric urology surgery, minimally invasive robotic-assisted surgery, complex genitourinary reconstructive surgery, anorectal malformations, disorders of sex development, neurogenic bladder, renal transplant in the neurogenic bladder, prenatal evaluation and fetal care, kidney stones, ESWL, clinical trials, and basic science research. He is certified by the American Board of Urology with subspecialty certification in Pediatric Urology.

W. Robert DeFoor, Jr., MD  
Professor of Clinical Surgery  
Director, Pediatric Urology Fellowship  
Program Director, Clinical Research Program  
Residency Education Site Director, Cincinnati Children’s Hospital Medical Center  

Dr. DeFoor specializes in general pediatric urology surgery, robotic-assisted laparoscopic surgery, complex genitourinary reconstructive surgery, kidney stones, uro-oncology, vesicoureteral reflux, prenatal hydronephrosis, posterior urethral valves, clinical outcomes research, and clinical trials. He is certified by the American Board of Urology with subspecialty certification in Pediatric Urology.
Eugene Minevich, MD  
Professor of Clinical Surgery  
Director of the Stone Center

Dr. Minevich specializes in general pediatric urology surgery, complex genitourinary reconstructive surgery, kidney stones, ESWL, microscopic hypospadias, and endoscopic treatment of VUR. He is certified by the American Urological Association with subspecialty certification in Pediatric Urology.

Andrew C. Strine, MD  
Assistant Professor of Clinical Surgery  
Co-Director of Comprehensive Fertility Care and Preservation Program

Dr. Strine specializes in general pediatric urology surgery, complex genitourinary reconstructive surgery, minimally invasive robotic-assisted surgery, disorders of sex development, prenatal evaluation and fetal care, neurogenic bladder, and fertility care and preservation.

Brian VanderBrink, MD  
Associate Professor of Clinical Surgery

Dr. VanderBrink specializes in spina bifida, complex genitourinary reconstructive surgery, prenatal evaluation and fetal care, and neurogenic bladder. He is certified by the American Board of Urology.

Active Volunteer Faculty

Good Samaritan Hospital:
Eric Kuhn, MD (Residency Program Educational Site Director)  
Ryan Flynn, MD  
Matthew Fulton, MD  
Rebecca Roedersheimer, MD

Cincinnati Veterans Affairs Medical Center:
Lisa Filipkowski, MD  
Laura Bertrand, MD  
Natalie Singer, MD

Additional information on the section of urology can be viewed at med.uc.edu/depart/surgery.
The Section of Vascular Surgery

Joseph S. Giglia, MD, FACS, RPVI
Professor of Surgery
Interim Chief, Section of Vascular Surgery
Joseph.Giglia@uc.edu
513-558-5367

The University of Cincinnati section of vascular surgery is a tertiary referral center for all aspects of vascular surgery and serves as the regional referral center for the treatment of complex vascular problems. The section performs all open and endovascular procedures for aneurysmal and occlusive disease, redo aortic surgery, and lower extremity revascularization. In addition, the section serves as a resource for the region for less common disorders including right side aortic arch pathology with dysphagia, aortomesenteric bypass operations, and redo aortic surgery.

The section of vascular surgery offers treatment of vascular disorders at the University of Cincinnati Medical Center (UCMC), West Chester Hospital, West Chester Surgical Hospital, the UC Health Physicians Medical Arts Building in Clifton, as well as the UC Vein Center at the UC Health Physicians’ Office North in West Chester. Outpatient non-invasive vascular diagnostic testing is available at both the UC Health Physicians Medical Arts Office in Clifton adjacent to the University of Cincinnati Medical Center, and at the UC Health Physicians’ Office North in West Chester adjacent to West Chester Hospital.

The UC Health Aortic Center, directed by Amit Jain, MD, has a team with a wide breadth of expertise, including endovascular and open techniques providing a variety of treatment options and works closely with the division of cardiac surgery to provide complete care of aortic pathology.

Innovations in vascular care include laparoscopic aortic procedures and minimally invasive approaches for critical limb ischemia. Dr. Joseph Giglia is one of only a few surgeons in the country who perform laparoscopic aortobifemoral bypass for aortoiliac arterial occlusive disease.
Faculty

Joseph S. Giglia, MD, FACS, RPVI
Professor of Surgery
Interim Chief, Section of Vascular Surgery

Dr. Giglia has a special interest in complex aortic surgery, laparoscopic aortic surgery, and minimally invasive treatment of thoracic and abdominal aortic pathology. He is board certified in Vascular Surgery, General Surgery, and Surgical Critical Care.

Amit Jain, MBBS, FACS, RPVI
Associate Professor of Surgery
Director of Aortic Center

Dr. Jain’s clinical interests include complex open and endovascular aortic surgery for aortic aneurysms, dissections and occlusive disease of both thoracic and abdominal aorta, cerebrovascular diseases including carotid stenosis and dissections, peripheral vascular diseases, hemodialysis access, non-atherosclerotic vascular pathologies including thoracic outlet, and popliteal entrapment syndromes. He is board certified in Vascular and General Surgery.

Sung Yang, MD, RPVI
Assistant Professor of Clinical Surgery
Director, Integrated Vascular Surgery Residency and Fellowship Program

Dr. Yang’s clinical interests include open and endovascular surgery (including aortic procedures), carotid stenting and endarterectomy, visceral arterial occlusive disease, hemodialysis access surgery and maintenance, vascular trauma and the vascular laboratory. He is fellowship trained and Board Certified in Vascular Surgery.

Jose Oyama Moura Leite, MD, PhD, RPVI
Assistant Professor of Surgery

Dr. Leite’s clinical interests include all aspects of open and endovascular surgery. He was a fully trained vascular surgeon in his native Brazil prior to completing a PhD and a vascular surgery residency in the United States.

Additional information on the section of vascular surgery can be viewed at med.uc.edu/depart/surgery.
The affiliated educational programs are crucial for our strategy to provide breadth and depth of surgical experience, a diversity of case mix, and a strong connection to the community. These programs provide some of our highest valued training experience and are guided by a group of some of our best and most awarded surgeon educators.

There is an abundance and variety of clinical experiences in the hospitals and outpatient offices of our integrated and affiliated institutions which include:

The Christ Hospital is a 555-bed acute-care hospital located 1.5 miles from the UC College of Medicine. The hospital remains an important part of the integrated surgical residency in general surgery. UC surgeons utilize the Christ
Hospital for patient care in the areas of general, colorectal, vascular, weight loss, transplantation surgery and surgical oncology.

Cincinnati Children’s Hospital Medical Center is a nationally and internationally recognized leader in the treatment and research of pediatric and adolescent diseases. Cincinnati Children’s has 587 beds and is the only Level I pediatric trauma center in southwestern Ohio, northern Kentucky and southeastern Indiana. The hospital is a major teaching site for our surgery residents both in the clinical arena and in the NIH-funded laboratories directed by outstanding surgeon-scientists.

The Cincinnati Department of Veterans Affairs Medical Center is a major 269-bed acute-care hospital for veterans in Southwest Ohio. General surgery, urology and vascular surgery represent three of the largest volume sections within the VA surgical service. The surgical service continues to encounter a wide variety of pathological conditions which require surgical treatment, thus providing a significant opportunity for faculty research and a vital cornerstone for the surgical education of residents and medical students.

The Holzer Clinic is a modern, 100-plus physician, multispecialty group practice facility located in Gallipolis, Ohio, near the West Virginia border. This clinic provides primary, secondary and tertiary care to patients in the Southeastern Ohio and Western West Virginia region, with a population base of about 300,000 and over 150,000 clinic visits per year. Approximately 6,000 operations are performed yearly and there are over 16,000 Emergency Department visits per year. Virtually all surgery residents select a two-month elective rotation to this facility, which exposes these residents to a rural, broadly-defined general surgery experience.

### Clinical Trials

Frasier L (Investigator): Survey of United States attending surgeons on audio video recording practices.

Gobble R (Investigator): Resensation: Restoring sensation with breast reconstruction after mastectomy.

Guitron J (Investigator): Evaluation of fresh lung tissue after surgical extraction with clinical correlations.

Holm T (Investigator): Clinical outcomes in endocrine disease.

Holm T (Investigator): Clinical outcomes in indeterminate thyroid nodules.

Holm T (Investigator): Clinical outcomes of thyroid cancer patients.

Shaughnessy EA (Investigator): Implantable marker devices in breast surgery, to localize a lesion that cannot be felt.

Shaughnessy EA (Investigator): Alliance A221702 - A prospective trial to study rates of lymphedema and regional recurrence after sentinel lymph node biopsy and sentinel lymph node biopsy followed by axillary lymph node dissection with and without axillary reverse mapping.

Shaughnessy EA (Investigator): A randomized phase III trial evaluating the role of axillary lymph node dissection in breast cancer patients (Ct1-3 N1) who have positive sentinel lymph nodes.

Shaughnessy EA (Investigator): A randomized phase III trial of adjuvant therapy comparing chemotherapy alone (six cycles of docetaxel plus cyclophosphamide or four cycles of doxorubicin).

Shaughnessy EA (Investigator): A011401- Randomized phase III trial evaluating the role of weight loss in adjuvant treatment of overweight and obese women with early breast cancer.
Sidana A (Investigator): Ea8191 phase III study of local or systemic therapy intensification directed by PET in prostate cancer patients with post-prostatectomy biochemical recurrence (Indicate).

Sidana A (Investigator): Ea8183 - Phase III double blinded study of early intervention after radical prostatectomy with androgen deprivation therapy with or without darolutamide vs. placebo in men at highest risk of prostate cancer metastasis by genomic stratification (Eradicate).

Sidana A (Investigator): Nrg-Gu008 randomized phase III trial incorporating abiraterone acetate with prednisone and apalutamide and advanced imaging into salvage treatment for patients with node-positive prostate cancer after radical prostatectomy.

Sidana A (Investigator): S1802 - Phase III randomized trial of standard systemic therapy (Sst) versus standard systemic therapy plus definitive treatment (surgery or radiation) of the primary tumor in metastatic prostate cancer.

Van Haren R (Investigator): Predictors of chronic pain and new persistent opioid use after lung resection.

**Funded Grants:**

Ahmad SA (Principal Investigator): SWOG Network Group Operations Center of the NCTN. National Cancer Institute.

Ahmad SA (Co-Investigator): Monitoring and control of human liver cancer ablation using real-time, 3D echo decorrelation imaging. National Cancer Institute.

Athota K (Principal Investigator): Smart Oxygenation System (SOS) provides early warning of lung injury. Department of the Army Medical Research and Materiel Command.

Blakeman TC (Co-Investigator): Multiple patients on a single ventilator - Potential solutions. Air Force Research Laboratory.

Blakeman TC (Co-Investigator): Detecting Asynchrony and Risk of Aspiration (DARS) Phase II. Air Force Research Laboratory.

Blakeman TC (Co-Investigator): Development of a targeted intravascular therapy to stop non-compressible torso. Air Force Research Laboratory.

Blakeman TC (Co-Investigator): Smart Oxygenation System (SOS) provides early warning of lung injury. Department of the Army Medical Research and Materiel Command.

Branson RD (Principal Investigator): Multiple patients on a single ventilator - Potential solutions. Air Force Research Laboratory.

Branson RD (Principal Investigator): Detecting Asynchrony and Risk of Aspiration (DARS) Phase II. Air Force Research Laboratory.

Caldwell CC. (Principal Investigator): Intergovernmental Personnel Act Agreement for Charles Caldwell. Department of Veterans Affairs.

Caldwell CC. (Co-Investigator): Roles of Sectm1a in macrophages and cardiac function during sepsis. National Institute of General Medical Sciences.

Dale, EL (Principal Investigator): The Acute Burn ResUscitation multicenter Prospective Observational Trial 2 - (ABRUPT 2). Department of the Army Medical Research Acquisition Activity.

Frasier LL (Co-Investigator): Validation of dynamic preload assessment technologies at cabin altitude pressure with and without a temporary abdominal closure using a swine model with graded hemorrhage. Air Force Research Laboratory.

Gomaa, Dina (Co-Investigator): Multiple patients on a single ventilator - Potential solutions. Air Force Research Laboratory.

Goodman MD (Principal Investigator): Type O whole blood and assessment of AGE during prehospital resuscitation. Department of the Army Medical Research Acquisition Activity.

Goodman MD (Co-Investigator): Detecting Asynchrony and Risk of Aspiration (DARS) Phase II. Air Force Research Laboratory.

Goodman MD (Principal Investigator): Validation of dynamic preload assessment technologies at cabin altitude pressure with and without a temporary abdominal closure using a swine model with graded hemorrhage. Air Force Research Laboratory.

Goodman MD (Co-Investigator): Multiple patients on a single ventilator - Potential solutions. Air Force Research Laboratory.

Goodman MD (Co-Investigator): Development of a targeted intravascular therapy to stop non-compressible torso. Air Force Research Laboratory.
Goodman MD (Co-Investigator): DM190198 - Rapid ketone infusion to prevent brain energy depletion and secondary brain injury in severe TBI with hemorrhagic shock. Department of the Army Medical Research Acquisition Activity.

Heyl JR (Co-Investigator): Multiple patients on a single ventilator - Potential solutions. Air Force Research Laboratory.

Krishnan D (Principal Investigator): Immune Correlations of Neck Infections with Clinical Outcomes (ICONICO). OMS Foundation.

Lentsch AB (Principal Investigator): Host Response to Trauma Research Training Program. National Institute of General Medical Sciences.

Pritts TA (Co-Investigator): Multiple patients on a single ventilator - Potential solutions. Air Force Research Laboratory.

Pritts TA (Principal Investigator): Development of a targeted intravascular therapy to stop non-compressible torso. Air Force Research Laboratory.

Pritts TA (Principal Investigator): Red blood cell microparticles and lung inflammation after hemorrhage and resuscitation. National Institute of General Medical Sciences.

Pritts TA (Co-Investigator): Strategies to Innovate EmeRgENcy Care Clinical Trials Network (SIREN). National Institute of Neurological Disorders and Stroke.

Supp DM (Principal Investigator): In situ skin regeneration for full thickness burn injuries. Shriners Hospital for Children - International Headquarters.

Supp DM (Principal Investigator): Correction of epidermolysis bullosa via genome editing and tissue engineering. Shriners Hospital for Children - International Headquarters.

Supp DM (Principal Investigator): The role of vitamin D and the vitamin D receptor in fibrotic wound healing. Shriners Hospital for Children - International Headquarters.

Woodle ES (Principal Investigator): Plasma cell depletion and co-stimulation blockade to treat antibody-mediated rejection. National Institute of Allergy and Infectious Diseases.

Woodle ES (Principal Investigator): Proteasome targeting for alloreactive plasma cells. National Institute of Allergy and Infectious Diseases.

Principal photography by residents and staff of the Department of Surgery, with contributions from UC Academic Health Center Public Relations & Communications. Graphic design by Tammy Adelhardt of Adelgraph Design.
Our education values are to:

Attract and train the medical students and residents with the greatest potential for success as surgeons and leaders.

Celebrate our individual strengths and diversity, and support each other as we overcome our hurdles to success, all while sharing common goals of clinical excellence, scientific discovery and professional growth.

Promote and support our residents to go on to the most highly competitive fellowships and academic positions, and to become successful leaders advancing surgical excellence.
